Picciano, 2018-07-17 Online Education is a comprehensive exploration of blended and fully online teaching platforms addressing history theory research planning and practice As colleges universities and schools around the world adopt large scale technologies and traditional class models shift into seamless digitally interactive environments critical insights are needed into the implications for administration and pedagogy Written by a major contributor to the field this book contextualizes online education in the past and present before analyzing its fundamental changes to instruction program integration social interaction content construction networked media policy and more A provocative concluding chapter speculates on the future of education as the sector becomes increasingly dependent on learning technologies **Online Education Policy and Practice** Anthony G. Picciano, 2016-09-13 Online Education Policy and Practice examines the past present and future of networked learning environments and the changing role of faculty within them As digital technologies in higher education increasingly enable blended classrooms collaborative assignments and wider student access an understanding of the creation and ongoing developments of these platforms is needed more than ever By investigating the history of online education the rise and critique of MOOCs the mainstreaming of social media mobile devices gaming in instruction and more this expansive book outlines a variety of potential scenarios likely to become realities in higher education over the next decade Peer review in scientific publications Great Britain: Parliament: House of Commons: Science and Technology Committee, 2011-07-28 This report indicates that the oversight of research integrity in the UK is unsatisfactory The Science and Technology Committee concludes that in order to allow others to repeat and build on experiments researchers should aim for the gold standard of making their data fully disclosed and made publicly available The report examines the current peer review system as used in scientific publications and the related issues of research impact data management publication ethics and research integrity The UK does not seem to have an oversight body for research integrity covering advice and assurance functions across all disciplines and the Committee recommends the creation of an external regulator It also says all UK research institutions should have a specific member of staff leading on research integrity The report highlights concerns about the use of journal Impact Factor as a proxy measure for the quality of research or of individual articles Innovative ways to improve current pre publication peer review practices are highlighted in the report including the use of pre print servers open peer review increased transparency and online repository style journals The growth of post

publication peer review and commentary also represents an enormous opportunity for experimentation with new media and social networking tools which the Committee encourages There should also be greater recognition of the work sometimes considered to be a burden carried out by reviewers by both publishers and employers In order to do this publishers need to have in place systems for recording and acknowledging the contribution of those involved in peer review
