About Face Richard T. Gray, 2004 A critical history of physiognomic thought in German speaking Europe that traces the roots of twentieth century racial profiling to the Enlightenment Once associated with astrology and occultist prophecy the art of interpreting personal character based on facial and other physical features dates back to antiquity About Face tells the intriguing story of how physiognomics became particularly popular during the Enlightenment no longer as a mere parlor game but as an empirically grounded discipline The story expands to illuminate an entire tradition within German culture stretching from Goethe to the rise of Nazism In

About Face Richard T Gray explores the dialectical reversal from the occult to the scientific realm that entered physiognomic thought in the late eighteenth century beginning with the positivistic writings of the Swiss pastor Johann Caspar Lavater Originally claimed to promote understanding and love physiognomics devolved into a system aimed at valorizing a specific set of physical moral and emotional traits and stamping everything else as deviant This development not only reinforced racial national and characterological prejudices but lent such beliefs a presumably scientific grounding In the period following World War I physiognomics experienced yet another unprecedented boom in popularity Gray explains how physiognomics had by then become a highly respected super discipline that embraced many prominent strands of German thought the Romantic philosophy of nature the life philosophy propagated by Dilthey and Nietzsche the cultural pessimism of Schopenhauer Husserl's method of intuitive observation Freudian psychoanalysis and early twentieth century eugenics and racial biology A rich exploration of German culture About Face offers fresh insight into the intellectual climate that allowed the dangerous thinking of National Socialism to take hold

A Decade of the Berkeley Math Circle Zvezdelina Stankova, Tom Rike,2015-02-03 Many mathematicians have been drawn to mathematics through their experience with math circles The Berkeley Math Circle BMC started in 1998 as one of the very first math circles in the U S Over the last decade and a half 100 instructors university professors business tycoons high school teachers and more have shared their passion for mathematics by delivering over 800 BMC sessions on the UC Berkeley campus every week during the school year This second volume of the book series is based on a dozen of these sessions encompassing a variety of enticing and stimulating mathematical topics some new and some continuing from Volume I from dismantling Rubik's Cube and randomly putting it back together to solving it with the power of group theory from raising knot eating machines and letting Alexander the Great cut the Gordian Knot to breaking through knot theory via the Jones polynomial from entering a seemingly hopeless infinite raffle to becoming friendly with multiplicative functions in the land of Dirichlet M bius and Euler from leading an army of jumping fleas in an old problem from the International Mathematical Olympiads to improving our own essay writing strategies from searching for optimal paths on a hot summer day to questioning whether Archimedes was on his way to discovering trigonometry 2000 years ago Do some of these scenarios sound bizarre having never before been associated with mathematics Mathematicians love having fun while doing serious mathematics and that love is what this book intends to share with the reader Whether at a beginner an intermediate or an advanced level anyone can find a place here to be provoked to think deeply and to be inspired to create In the interest

of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people their parents and teachers and the mathematics profession Titles in this series are co published with the Mathematical Sciences Research Institute MSRI
