Mathematics for Tackling Complex Problems 3 István Á. Harmati, László T. Kóczy, Jesús Medina, Eloísa Ramírez-Poussa, 2021-08-25 Complex problems and systems which prevail in the real world cannot often be tackled and solved either by traditional methods offered by mathematics or even the traditional computer science CS and artificial intelligence AI What is the way out of this dilemma Advanced methodologies and tools and techniques mimicking human reasoning or the behavior of animals animal populations or certain parts of the living body based on traditional computer science and the initial approaches of artificial intelligence are often referred to as biologically inspired methods or often computational intelligence CI Computational intelligence offers effective and efficient solutions to many unsolvable problems However it is far from being a ready to use and complete collection of approaches and is rather a continuously developing field without clear borders The emerging new models and algorithms of computational intelligence are deeply rooted in the vast apparatus of traditional mathematics Thus the investigation of connections and synergy between mathematics and computational intelligence is an eminent goal which is periodically pursued by a group of mathematicians and computational intelligence researchers who regularly attend the annual European Symposia on Computational Intelligence and Mathematics ESCIM Some relevant papers from the last ESCIM 2020 are included in this volume *Exploring Enterprise Service Bus in the Service-Oriented Architecture Paradigm* Bhadoria, Robin Singh, Chaudhari, Narendra, Tomar, Geetam Singh, Singh, Shailendra, 2017-02-14 Web browsing would not be what it is today without the use of Service Oriented Architecture SOA Although much has been written about SOA methodology this emerging platform is continuously under development Exploring Enterprise Service Bus in the Service Oriented Architecture Paradigm is a detailed reference source that examines current aspects and research methodologies that enable enterprise service bus to unify and connect services efficiently on a common platform Featuring relevant topics such as SOA reference architecture grid computing applications complex event computing and java business integration this is an ideal resource for all practitioners academicians graduate students and researchers interested in the discoveries on the relationship that Service Oriented architecture and enterprise service bus share
