Order Of The Lycan:

Caging the Beast Paula Droege, 2003-06-30 A major obstacle for materialist theories of the mind is the problem of sensory consciousness How could a physical brain produce conscious sensory states that exhibit the rich and luxurious qualities of red velvet a Mozart concerto or fresh brewed coffee **Caging the Beast** A Theory of Sensory Consciousness offers to explain what these conscious sensory states have in common by virtue of being conscious as opposed to unconscious states After arguing against accounts of consciousness in terms of higher order representation of mental states the theory claims that sensory consciousness is a special way we have of representing the world The book also introduces a way of thinking about subjectivity as separate and more fundamental than consciousness and considers how this foundational notion can be developed into more elaborate varieties An appendix reviews the connection between consciousness and attention with an eye toward providing a neuropsychological instantiation of the proposed theory Series A *A Female Alpha's Revenge (Part XI)* T.H.Jessica, Adelaide the daughter of the Alpha of the Shadow Fang Pack used to live a very happy life until her father and brother died in the battle for the Lycan King She followed the agreement between the packs and became the Luna of Ulric the Alpha of the Blood Moon Pack After waiting for a year Alpha Ulric returned from the battlefield with glory However he told Adelaide that he had fallen in love with another female werewolf Velda He hoped that Velda could become his mate To compensate Adelaide he allowed her to stay in the Blood Moon Pack Under the mockery and humiliation of everyone in the Blood Moon Pack she returned to the Shadow Fang Pack Adelaide went to the battlefield On the battlefield she was both intelligent and brave and she made many military achievements winning the admiration of everyone At the same time she met Lance an Alpha who had a crush on her since they were young And at this moment Alpha Ulric regretted his actions

Self-representational Approaches to Consciousness Uriah Kriegel, Kenneth Williford, 2006 Leading theorists examine the self representational theory of consciousness as an alternative to the two dominant reductive theories of consciousness the representational theory of consciousness and the higher order monitoring theory In this pioneering collection of essays leading theorists examine the self representational theory of consciousness which holds that consciousness always involves some form of self awareness The self representational theory of consciousness stands as an alternative to the two dominant reductive theories of consciousness the representational theory of consciousness RTC and the higher order monitoring HOM theory combining elements of both RTC and HOM theory in a novel fashion that may avoid the fundamental deficiencies of each Although self representationalist views have been common throughout the history of both Western and Eastern philosophy they have been largely neglected in the recent literature on consciousness This book approaches the self representational theory from a range of perspectives with contributions from scholars in analytic philosophy phenomenology and history of philosophy as well as two longer essays by Antonio Damasio and David Rudrauf and Douglas Hofstadter The book opens with six essays that argue broadly in favor of self representationalist views which are followed by five that argue

broadly against them Contributors next consider connections to such philosophical issues as the nature of propositional attitudes knowledge attention and indexical reference Finally Damasio and Rudrauf link consciousness as lived with consciousness as described in neurobiological terms and Hofstadter compares consciousness to the strange loop of mathematical self reference brought to light by G del s incompleteness theorems Contributors Andrew Brook Peter Carruthers Antonio Damasio John J Drummond Jason Ford Rocco J Gennaro George Graham Christopher S Hill Douglas R Hofstadter Terry Horgan Tomis Kapitan Uriah Kriegel Keith Lehrer Joseph Levine Robert W Lurz David Rudrauf David Woodruff Smith John Tienson Robert Van Gulick Kathleen Wider Kenneth Williford Dan Zahavi

Figuratively Speaking Robert J. Fogelin, 2011-02-24 In this book the author examines figures of speech that concern meaning irony hyperbole understatement similes metaphors and others to show how they work and to explain their attraction The author contends that figurative language derives its power from the insistence that the reader participate in the text looking beyond the literal meaning of the figurative language to the meanings that are implied He demonstrates that the intellectual and aesthetic force of figurative language is derived from the opportunity it provides for unlimited elaboration
