Interdisciplinary Approaches to Distance Teaching Alan Blackstock, Nathan Straight, 2015-11-19 Synchronous technologies, particularly interactive video conferencing (IVC), are becoming common modes of teaching and delivering college courses. The increasing popularity of IVC in the U.S. and abroad calls for more pedagogically effective practices for instructors using this technology. This volume focuses on innovative and proven approaches to IVC teaching in a variety of disciplines: English, history, biology, chemistry, geology, engineering, social work, and elementary and special education. Contributors hail from a pioneering university at the forefront of distance education and understand the practice and potential of IVC teaching at the highest levels. Chapters outline the challenges and benefits of IVC teaching from pedagogical, technical, and administrative perspectives.

Igniting The Chemical Ring Of Fire: Historical Evolution Of The Chemical Communities Of The Pacific Rim Seth C. Rasmussen, 2018-01-18 From the rise of chemical technology in antiquity to the present day, *Igniting the Chemical Ring of Fire* tracks the development of professional chemistry communities in the countries of the Pacific Rim. Critical in this process was the development of local education and training in chemistry. The doctorate in chemistry is generally regarded as coming into existence in early 19th-century Germany, with the model spreading globally as time passed. In early years, it was common for international chemistry scholars to train at the ranking German or English universities before returning to their home countries to seed a local version of the doctorate. However, little has been formally written about this process outside of Europe. Representing a first in the field for countries of the Pacific Rim, this book documents the detailed history of chemical communities in ten countries from a team of internationally renowned historians. Providing insights into how and when these countries initiated local chemistry PhD programs and became independent chemical entities, *Igniting the Chemical Ring of Fire* shows that there is no single path to development.
