Tips Stephen Roman, 2011-07-07 **TERM STRUCTURE OF INTEREST RATE AND ECONOMIC ACTIVITIES: OECD CASE** Assist. Prof. Dr. Erkan KARA, 2022-11-11 This study is dedicated to investigating the long run relation between interest rate spreads and economic activities which include industrial production inflation and unemployment rate in OECD countries over the period between 2005 and 2015 by using panel data analysis This study will use the latest panel data models that take

structural breaks and cross sectional dependency into account Besides using panel data analysis on this issue this paper will also try to see the effect of new monetary policies that are taking place by major central banks on yield spread and economic activities especially industrial production As it is known that in the post financial crisis of 2008 period major central banks such as the Federal Reserve¹ The FED was the first central bank that started to implement new monetary policies just after the collapse of several large scale investment banks in the U S European Central Bank Bank of Japan and Bank of England have taken action to stimulate the world economy Henceforth not only these major central banks but also other economies started to lower their policy interest rates soon in conventional way These policies pushed interest rates almost to zero and since then the rates have remained very low due to lower output level and disinflationary fears State Activities in Capital Formation Barbara R.
