Community Organizing and Community Building for Health and Social Equity, 4th edition Meredith Minkler, Patricia Wakimoto, 2021-12-10 The fourth edition of Community Organizing and Community Building for Health and Social Equity provides both classic and recent contributions to the field with a

special accent on how these approaches can contribute to health and social equity The 23 chapters offer conceptual frameworks skill building and case studies in areas like coalition building organizing by and with women of color community assessment and the power of the arts the Internet social media and policy and media advocacy in such work The use of participatory evaluation and strategies and tips on fundraising for community organizing also are presented as are the ethical challenges that can arise in this work and helpful tools for anticipating and addressing them Also included are study questions for use in the classroom Many of the book's contributors are leaders in their academic fields from public health and social work to community psychology and urban and regional planning and to social and political science One author was the 44th president of the United States himself a former community organizer in Chicago who reflects on his earlier vocation and its importance Other contributors are inspiring community leaders whose work on the ground and in partnership with us outsiders highlights both the power of collaboration and the cultural humility and other skills required to do it well

Throughout this book and particularly in the case studies and examples shared the role of context is critical and never far from view Included here most recently are the horrific and continuing toll of the COVID 19 pandemic and a long overdue yet still greatly circumscribed national reckoning with systemic racism in the aftermath of the brutal police killing of yet another unarmed Black person and then another and another seemingly without end In many chapters the authors highlight different facets of the Black Lives Matter movement that took on new life across the country and the world in response to these atrocities In other chapters the existential threat of climate change and grave threats to democracy also are underscored View the Table of Contents and introductory text for the supplementary instructor resources https://d3tto5i5w9ogddcloudfront.net/wp-content/uploads/2022/02/04143046_9781978832176_optimized_sampler.pdf Supplementary instructor resources are available on request <https://www.rutgersuniversitypress.org/communityorganizing> **Telling Stories with**

Data Rohan Alexander, 2023-07-27 The book equips students with the end to end skills needed to do data science That means gathering cleaning preparing and sharing data then using statistical models to analyse data writing about the results of those models drawing conclusions from them and finally using the cloud to put a model into production all done in a reproducible way At the moment there are a lot of books that teach data science but most of them assume that you already have the data This book fills that gap by detailing how to go about gathering datasets cleaning and preparing them before analysing them There are also a lot of books that teach statistical modelling but few of them teach how to communicate the results of the models and how they help us learn about the world Very few data science textbooks cover ethics and most of those that do have a token ethics chapter Finally reproducibility is not often emphasised in data science books This book is based around a straight forward workflow conducted in an ethical and reproducible way gather data prepare data analyse data and communicate those findings This book will achieve the goals by working through extensive case studies in terms of gathering and preparing data and integrating ethics throughout It is specifically designed around teaching how to write about the data

and models so aspects such as writing are explicitly covered And finally the use of GitHub and the open source statistical language R are built in throughout the book Key Features Extensive code examples Ethics integrated throughout Reproducibility integrated throughout Focus on data gathering messy data and cleaning data Extensive formative assessment throughout
