School Science Practical Work in Africa Umesh Ramnarain, 2020-06-01 School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry based learning which signals a definite paradigm shift from the traditional teacher dominated to a learner centered approach. The book provides empirical research on approaches to practical work contextual factors in the enactment of practical work and professional development in teaching practical work. This book will be of great interest to academics, researchers and post graduate students in the fields of science education and educational policy.

Ideas that Work, 1999 *The U.S. Department of Education's Gender Equity Expert Panel* United States. Department of Education. Gender Equity Expert Panel, 2001. The U.S. Department of Education developed the Gender Equity Expert Panel to identify promising and exemplary programs that promote gender equity in and through education. This panel of experts reviewed self-nominated programs to determine whether they met four criteria: evidence of success, effectiveness in promoting gender equity, quality of the program, educational significance and usefulness to others, replicability. Submitted for review during the review cycle from 1996-99 were 100 gender equity products, programs and policies. Eleven exemplary and promising programs are recommended here. The updated reviews in this report provide descriptive and evaluative information on the 11 programs, one recommended as exemplary and 10 as promising. The 11 summary reviews in the report are grouped into four topic areas that generally correspond to expert subpanels: gender equity in vocational technical education and school to work, gender equity in mathematics, science and technology, prevention of violence and sexual and racial harassment in higher education, and gender equity in teacher education and professional development.
