dramatically lower the risk of heart disease if you have Syndrome X The approach seems paradoxical Everyone knows that fat is bad so how can more fat possibly lead to better health The answer lies in the type of fat and the body chemistry of the people who consume it If you have the abnormal metabolism called Syndrome X eating a low fat high carbohydrate diet to lower your LDL and blood fats won't protect you In fact doing so will increase the odds of heart disease Millions of Americans have the potentially deadly yet easily identifiable signs of Syndrome X but few cases are detected in time because most physicians don't know what to look for This trailblazing book will change that making doctors and patients aware of the problem and its easy solution an integrated program of diet and exercise that simultaneously reduces all the risk factors for heart disease including Syndrome X Dr Reaven's discovery of Syndrome X has shown us that the standard approach to preventing heart disease is dangerous for many of us Now his safe proven new approach explains how millions can drastically reduce their risk of heart disease His program works not only for those who have Syndrome X but also for anyone who simply wants to reduce the risk of heart disease
