Artificial Intelligence in Acute Neurology Tarun Singh, Alejandro Rabinstein,2025-05-14 In recent years the intersection of artificial intelligence AI and neurology has led to extraordinary advancements in the diagnosis treatment and management of acute neurological conditions AI driven technologies such as machine learning algorithms and deep neural networks have shown immense promise in transforming the landscape of acute care for patients facing neurological emergencies This special issue aims to provide a comprehensive platform for researchers to showcase their cutting edge work and explore the transformative potential of AI in acute neurology The goal of this Research Topic is to shed light on the remarkable strides made in AI applications within acute neurology and emphasize their critical role in addressing existing gaps in patient care As we move towards an era of personalized medicine AI based tools have the potential to revolutionize early detection diagnosis and treatment decision making in acute neurological scenarios By sharing your novel findings and perspectives you will contribute to bridging the gap between AI research and clinical practice fostering evidence based approaches to improve patient outcomes

Recent Advances in Artificial Intelligence in Cost Estimation in Project Management Nevena Rankovic,Dragica Ranković,Mirjana Ivanovic,Ljubomir Lazić,2024-12-06 This book focuses on the practical application of AI tools and techniques in software project management offering detailed theoretical explanations and practical examples of over 40 state of the art machine learning and deep learning algorithms applied across each project phase as well as in risk and resource management Helping the business world estimate projects more accurately while saving costs and resources is crucial in today s rapidly changing fast paced technological landscape Moreover it presents specific aspects of combined approaches through ensemble models incorporating Taguchi s optimization method to further improve estimation accuracy advancing this area of software project management A valuable resource for students and professionals to deepen their knowledge and skills it also serves as a great manual for companies adopting smarter strategies to manage and develop projects more efficiently and effectively

Advanced PeopleSoft Financials: Optimizing Processes and Customizing Functionality 2025 UTHOR1:- Chandan Mishra, AUTHOR2:- Dr. Sanjoli Kaushik, PREFACE In today s fast paced business environment organizations are continuously looking for ways to streamline their operations and enhance financial management capabilities PeopleSoft Financials an enterprise resource planning ERP solution stands out as one of the most powerful platforms for managing critical financial data and processes However to truly harness the potential of PeopleSoft Financials it is essential to optimize and customize its features to meet specific business needs Advanced PeopleSoft

Financials Optimizing Processes and Customizing Functionality is a comprehensive guide designed to provide professionals consultants and administrators with a deep understanding of how to leverage PeopleSoft Financials to its full potential This book offers insights into advanced features process optimization strategies and customization techniques that can significantly improve the efficiency scalability and adaptability of your PeopleSoft Financials system Throughout the chapters we will explore best practices for optimizing the core financial processes such as accounts payable accounts receivable general ledger and asset management Additionally we will delve into the customization aspects highlighting how to tailor the system to fit your organization s specific requirements whether it s through user defined fields customized reports or workflows The book also covers the integration of PeopleSoft Financials with other systems enabling seamless data flow and decision making across the organization Written by experts in the field this book provides practical real world examples and case studies to illustrate the concepts discussed offering readers actionable strategies for implementing them in their own organizations Whether you are a seasoned PeopleSoft user or a new adopter this book will help you navigate the complexities of PeopleSoft Financials and unlock its full potential to drive business success As the financial landscape continues to evolve mastering the advanced features and customization capabilities of PeopleSoft Financials will be key to staying competitive and responsive to changing business needs By embracing the optimization and customization techniques outlined in this book readers will be well equipped to lead their organizations towards greater efficiency accuracy and profitability in their financial operations Authors Chandan Mishra Dr Sanjoli Kaushik

The First Steps of Artificial Intelligence in Cardiology Patrizia Presbitero, Mauro Chiarito, Alessandro Gaj Levra, 2025-08-23 This work is intended to be a guide for cardiologists unfamiliar with artificial intelligence as well as for engineers and data scientists unfamiliar with cardiology To the best of our knowledge there is currently a lack of similar work presenting the current state of the art on the use of artificial intelligence based models in cardiology Similarly there is a paucity of texts that thoroughly discuss the pros and cons of using this cutting edge technology in the field of cardiology both in routine clinical practice and in the context of research This volume will be of interest to all those interested in the application of artificial intelligence in the medical field and specifically in cardiology

Machine Learning at Scale with H2O Gregory Keys, David Whiting, 2022-07-29 Build predictive models using large data volumes and deploy them to production using cutting edge techniques Key Features Build highly accurate state of the art machine learning models against large scale data Deploy models for batch real time and streaming data in a wide variety of target production systems Explore all the new features of the H2O AI Cloud end to end machine learning platform Book Description H2O is an open source fast and scalable machine learning framework that allows you to build models using big data and then easily productionalize them in diverse enterprise environments Machine Learning at Scale with H2O begins with an overview of the challenges faced in building machine learning models on large enterprise systems and then addresses how H2O helps you to overcome them You ll start by exploring H2O s in memory

distributed architecture and find out how it enables you to build highly accurate and explainable models on massive datasets using your favorite ML algorithms language and IDE You ll also get to grips with the seamless integration of H2O model building and deployment with Spark using H2O Sparkling Water You ll then learn how to easily deploy models with H2O MOJO Next the book shows you how H2O Enterprise Steam handles admin configurations and user management and then helps you to identify different stakeholder perspectives that a data scientist must understand in order to succeed in an enterprise setting Finally you ll be introduced to the H2O AI Cloud platform and explore the entire machine learning life cycle using multiple advanced AI capabilities By the end of this book you ll be able to build and deploy advanced state of the art machine learning models for your business needs What you will learn Build and deploy machine learning models using H2O Explore advanced model building techniques Integrate Spark and H2O code using H2O Sparkling Water Launch self service model building environments Deploy H2O models in a variety of target systems and scoring contexts Expand your machine learning capabilities on the H2O AI Cloud Who this book is for This book is for data scientists and machine learning engineers who want to gain hands on machine learning experience by building and deploying state of the art models with advanced techniques using H2O technology An understanding of the data science process and experience in Python programming is recommended This book will also benefit students by helping them understand how machine learning works in real world enterprise scenarios *Mastering LLM Applications with LangChain and Hugging Face* Hunaidkhan

Pathan,Nayankumar Gajjar,2024-09-21 DESCRIPTION The book is all about the basics of NLP generative AI and their specific component LLM In this book we have provided conceptual knowledge about different terminologies and concepts of NLP and NLG with practical hands on This comprehensive book offers a deep dive into the world of NLP and LLMs Starting with the fundamentals of Python programming and code editors the book gradually introduces NLP concepts including text preprocessing word embeddings and transformer architectures You will explore the architecture and capabilities of popular models like GPT 3 and BERT The book also covers practical aspects of LLM usage for RAG applications using frameworks like LangChain and Hugging Face and deploying them in real world applications With a focus on both theoretical knowledge and hands on experience this book is ideal for anyone looking to master the art of NLP and LLMs The book also contains AWS Cloud deployment which will help readers step into the world of cloud computing As the book contains both theoretical and practical approaches it will help the readers to gain confidence in the deployment of LLMs for any use cases as well as get acquainted with the required generative AI knowledge to crack the interviews KEY FEATURES Covers Python basics NLP concepts and terminologies including LLM and RAG concepts Provides exposure to LangChain Hugging Face ecosystem and chatbot creation using custom data Guides on integrating chatbots with real time applications and deploying them on AWS Cloud WHAT YOU WILL LEARN Basics of Python which contains Python concepts installation and code editors Foundation of NLP and generative AI concepts and different terminologies being used in NLP and generative AI domain LLMs and their

importance in the cutting edge of AI Creating chatbots using custom data using open source LLMs without spending a single penny Integration of chatbots with real world applications like Telegram WHO THIS BOOK IS FOR This book is ideal for beginners and freshers entering the AI or ML field as well as those at an intermediate level looking to deepen their understanding of generative AI LLMs and cloud deployment TABLE OF CONTENTS 1 Introduction to Python and Code Editors 2 Installation of Python Required Packages and Code Editors 3 Ways to Run Python Scripts 4 Introduction to NLP and its Concepts 5 Introduction to Large Language Models 6 Introduction of LangChain Usage and Importance 7 Introduction of Hugging Face its Usage and Importance 8 Creating Chatbots Using Custom Data with LangChain and Hugging Face Hub 9 Hyperparameter Tuning and Fine Tuning Pre Trained Models 10 Integrating LLMs into Real World Applications Case Studies 11 Deploying LLMs in Cloud Environments for Scalability 12 Future Directions Advances in LLMs and Beyond Appendix A Useful Tips for Efficient LLM Experimentation Appendix B Resources and References

CONFLUENCE: CRITICAL MULTIDISCIPLINARY APPROACHES TO 21st CENTURY ISSUES Dr. Jagdish Kumar Sahu, Anjaria Mihir Bharatkumar, Mr. Subhrashek Dey, Dr. CMA. Nayankumar Mailal Malde, Dr. Abhay R, Dr. Shaik Hussain Vali, 2025-10-04 *GeoAI and Human Geography* Xiao Huang, Siqin Wang, John Wilson, Peter Kedron, 2025-07-30 This volume outlines a comprehensive journey into how geospatial artificial intelligence GeoAI is reshaping our understanding of people and places Merging traditional geographic inquiry with AI technologies it offers a holistic view of digital tools and advanced algorithms that redefine human geography Across twenty eight chapters the book chronicles the evolution of geographic thought into the GeoAI era Innovative methodologies from explainable spatial analysis and natural language processing to human centered computer vision and high performance computing reveal new patterns and relationships beyond conventional approaches Each contribution highlights both technical strides in data processing and enriched perspectives on cultural economic political health and urban studies Showcasing diverse applications in disaster management climate change adaptation and urban planning the volume demonstrates GeoAI s transformative potential It also engages with ethical sustainable and social challenges emphasizing that technological innovation must serve real world impacts and inclusivity Ideal for researchers students and practitioners alike this volume invites you to explore new frontiers at the intersection of technology and human experience

Artificial Intelligence in Clinical Practice Chayakrit Krittanawong, 2023-09-13 Artificial Intelligence in Clinical Practice How AI Technologies Impact Medical Research and Clinics compiles current research on Artificial Intelligence within medical subspecialties helping practitioners with diagnosis clinical decision making disease prediction prevention and the facilitation of precision medicine The book defines the basic concepts of big data and AI in medicine and highlights current applications challenges ethical issues and biases Each chapter discusses AI applied to a specific medical subspecialty including primary care preventive medicine general internal medicine radiology pathology infectious disease gastroenterology cardiology hematology oncology dermatology ophthalmology mental health neurology pulmonary critical

care rheumatology surgery and OB GYN This is a valuable resource for clinicians students researchers and members of medical and biomedical fields who are interested in learning more about artificial intelligence technologies and their applications in medicine Provides the history and overview of the various modalities of AI and their applications within each field of medicine Discusses current AI based medical research including landmark trials within each field of medicine Addresses the current knowledge gaps that clinicians commonly face that prevent the application of AI based research to clinical practice Encompasses examples of specific cases and discusses challenges and biases associated with AI

Hands-On Machine Learning with Scikit-Learn, Keras, and TensorFlow Aurélien Géron, 2022-10-04 Through a recent series of breakthroughs deep learning has boosted the entire field of machine learning Now even programmers who know close to nothing about this technology can use simple efficient tools to implement programs capable of learning from data This bestselling book uses concrete examples minimal theory and production ready Python frameworks Scikit Learn Keras and TensorFlow to help you gain an intuitive understanding of the concepts and tools for building intelligent systems With this updated third edition author Aurélien Géron explores a range of techniques starting with simple linear regression and progressing to deep neural networks Numerous code examples and exercises throughout the book help you apply what you've learned Programming experience is all you need to get started Use Scikit learn to track an example ML project end to end Explore several models including support vector machines decision trees random forests and ensemble methods Exploit unsupervised learning techniques such as dimensionality reduction clustering and anomaly detection Dive into neural net architectures including convolutional nets recurrent nets generative adversarial networks autoencoders diffusion models and transformers Use TensorFlow and Keras to build and train neural nets for computer vision natural language processing generative models and deep reinforcement learning

AI LAW MODEL FOR ETHICAL LEGISLATION: STRATEGIC RECOMMENDATIONS FOR THE REGULATION OF ARTIFICIAL INTELLIGENCE Oleksii

Kostenko, 2025-10-20 This study the AI Law Model for Ethical Law Strategic Recommendations for the Regulation of Artificial Intelligence was created as a conscious and purposeful scientific paradigm for systemic flaws and hidden vulnerabilities identified in existing and draft regulations of the USA EU PRC and other leading jurisdictions in the field of artificial intelligence A comprehensive analysis of international practice shows that even the most ambitious and technologically advanced AI acts leave significant gaps from vague and contradictory definitions of basic concepts insufficiently elaborated and fragmented ethical requirements to the complete absence or insufficiency of a deep assessment of the socio psychological and cultural consequences of AI implementation Such shortcomings and regulatory gaps can lead to serious

legal conflicts ethical crises increased social tensions as well as to the loss or undermining of public trust in digital institutions and public policy in general The purpose of the project Model AI Law for Ethical Law Strategic Recommendations for the Regulation of Artificial Intelligence is not only to warn against mechanical and little critical copying of foreign regulatory models but also to form a thorough approach adapted to the realities of national jurisdictions based on deep interdisciplinary expertise and comprehensive risk analysis This approach involves considering the legal technical ethical social cultural and medical aspects of AI implementation which makes it possible to consider LLM technology as a multidimensional phenomenon with long term consequences The key idea is that AI laws cannot be the product of the work of narrow profile initiators who are far from a systematic understanding of the technology or authors specializing exclusively in one field law technology medicine etc without proper involvement of related fields Only a broad association of interdisciplinary lawyers highly qualified technical specialists sociologists psychologists doctors ethicists cybersecurity and risk management specialists as part of integrated research groups provides a real opportunity to cover the entire range of direct and indirect risks as well as to predict the long term social economic and political consequences of the development and use of AI The structure of the study provides not only a formal statement of provisions but also sections that define and disclose in detail the fundamental principles of human centeredness transparency accountability non discrimination and cyber resilience taking into account international standards and scientific approaches At the same time these sections are combined with analytical blocks which systematically describe problem areas identified in other countries provide examples of negative consequences of ignoring these principles and formulate recommendations for avoiding such risks in Ukrainian legislation In particular the following critical aspects are emphasized legal gaps and lack of clearly defined enforcement mechanisms that allow individual actors to avoid or minimize liability for the direct or indirect harmful consequences of the use of AI including economic ethical and social losses the lack of a single scientifically based and normatively fixed risk assessment scale which complicates the objective identification of the level of danger of specific AI solutions and creates opportunities for conscious or unintentional manipulations in the classification of systems in particular in order to avoid regulatory requirements or reduce the scope of verification measures lack of effective transparent and legally enshrined mechanisms of public control and independent audit capable of ensuring systematic monitoring objective assessment and public information about the compliance of AI systems with ethical and legal standards ignoring a deep and comprehensive analysis of the psychological emotional and sociocultural impacts of AI on vulnerable populations including children the elderly people with disabilities and other socially sensitive categories which can lead to deepening inequality social exclusion and negative transformations of cultural values weak integration and insufficient regulatory consolidation of internationally recognized technical standards and protocols into legal regulation which complicates the unification of requirements reduces the compatibility of national solutions with global ecosystems and creates risks of technical and legal fragmentation Thus this

draft law is not only a draft law in the traditional sense but also a deeply thought out analytical and regulatory warning designed to become a conceptual guide for future state policy in the field of artificial intelligence Its task is to incorporate a multi level preventive mechanism into AI legislation that would combine preventive adaptive and corrective regulatory tools that can flexibly respond to new technological challenges and ethical dilemmas The implementation of this approach should guarantee not only a formal balance between legal regulation technological innovation and public security but also ensure the stability of this balance in the context of rapid transformations and global competition avoiding strategic and tactical mistakes already made by world leaders in this area Scientific and Technical Aerospace Reports ,1990 **Artificial**

Intelligence in Radiation Oncology and Biomedical Physics Gilmer Valdes,Lei Xing,2023-08-14 This pioneering book explores how machine learning and other AI techniques impact millions of cancer patients who benefit from ionizing radiation It features contributions from global researchers and clinicians focusing on the clinical applications of machine learning for medical physics AI and machine learning have attracted much recent attention and are being increasingly adopted in medicine with many clinical components and commercial software including aspects of machine learning integration General principles and important techniques in machine learning are introduced followed by discussion of clinical applications particularly in radiomics outcome prediction registration and segmentation treatment planning quality assurance image processing and clinical decision making Finally a futuristic look at the role of AI in radiation oncology is provided This book brings medical physicists and radiation oncologists up to date with the most novel applications of machine learning to medical physics Practitioners will appreciate the insightful discussions and detailed descriptions in each chapter Its emphasis on clinical applications reaches a wide audience within the medical physics profession

Unveiling the Power of Verbal Beauty: An Emotional Sojourn through **Ai Tools Last 90 Days Setup**

In a global inundated with screens and the cacophony of quick interaction, the profound energy and psychological resonance of verbal artistry often fade into obscurity, eclipsed by the continuous barrage of sound and distractions.
