out more units He considered inventory evil He knew how to make subordinates sweat with withering questions Jobs selected Cook as his successor and Cook oversaw a period of tremendous revenue growth that has lifted Apple's valuation to 2 trillion He built a commanding business in China and rapidly distinguished himself as a master politician who could forge global alliances and send the world's stock market into freefall with a single sentence Author Tripp Mickle spoke with more than 200 current and former Apple executives as well as figures key to this period of Apple's history including Trump administration officials and fashion luminaries such as Anna Wintour while writing *After Steve* His research shows the company's success came at a cost Apple lost its innovative spirit and has not designed a new category of device in years Ive's departure in 2019 marked a culmination in Apple's shift from a company of innovation to one of operational excellence and the price is a company that has lost its soul
