Improving Equity in Data Science Colby

Tofel-Grehl, Emmanuel Schanzer, 2024-06-03 Improving Equity in Data Science offers a comprehensive look at the ways in which data science can be conceptualized and engaged more equitably within the K 16 classroom setting moving beyond merely broadening participation in educational opportunities This book makes the case for field wide definitions literacies and practices for data science teaching and learning that can be commonly discussed and used and provides examples from research of these practices and literacies in action Authors share stories and examples of research wherein data science advances equity and empowerment through the critical examination of social educational and political topics In the first half of the book readers will learn how data science can deliberately be embedded within K 12 spaces to empower students to use it to identify and address inequity The latter half will focus on equity of access to data science learning opportunities in higher education with a final synthesis of lessons learned and presentation of a 360 degree framework that links access curriculum and pedagogy as multiple facets collectively essential to comprehensive data science equity work Practitioners and teacher educators will be able to answer the question how can data science serve to move equity efforts in computing beyond basic inclusion to empowerment whether the goal is to simply improve definitions and approaches to research on data science or support teachers of data science in creating more equitable and inclusive environments within their classrooms
