**Value-Added Decision Making for Managers** Kenneth Chelst, Yavuz Burak Canbolat, 2011-10-05. Developed from the authors' longstanding course on decision and risk analysis, *Value Added Decision Making for Managers* explores the important interaction between decisions and management action and clarifies the barriers to rational decision making. The authors analyze strengths and weaknesses of the best alternatives, enabling decision makers to improve on these alternatives by adding value and reducing risk. The core of the text addresses decisions that involve selecting the best alternative from diverse choices. The decisions include buying a car, picking a supplier or home contractor, selecting a technology, picking a location for a manufacturing plant or sports stadium, hiring an employee, or selecting among job offers, deciding on the size of a sales force, making a late design change, and sourcing to emerging markets. The book also covers more complex decisions arising in negotiations, strategy, and ethics that involve multiple dimensions simultaneously. Numerous activities interspersed throughout the text highlight real world situations, helping readers see how the concepts presented can be used in their own work environment or personal life. Each chapter also includes discussion questions and references.

**Web Resource:** The book's website at <http://ise.wayne.edu/research/decision.php> offers tutorials of Logical Decisions software for multi-objective decisions and Precision Tree software for probabilistic decisions. Directions for downloading student versions of the DecisionTools Suite and Logical Decisions software can be found in the appendices. Password-protected PowerPoint presentations for each chapter and solutions to all of the numeric examples are available for instructors.

**Tourist Customer Service Satisfaction** Francis Noe, Muzaffer Uysal, Vincent Magnini, 2010-10-04. Customer satisfaction and loyalty in the tourism sector is highly dependent upon the behaviours of front-line service providers. Service is about people; how they relate to one another, fulfill each other's needs, and ultimately care for each other. Yet surprisingly, there are few or any books which focus on the detailed specifics of the social exchange and interaction between the service provider and customer. *Tourist Customer Service Satisfaction* fully explores this relationship by defining the specific kind of verbal and non-verbal messages needed for successful exchanges, outlining how the service provider ought to behave, cope in a situation, as well as detailing positive approaches that enhance a service provider's role performance. The book uses encounter theory to examine the customer-provider relationship, as well as drawing on current research and theories from hospitality, tourism, management, psychology, and bodies of literature. In doing so, the book offers important insight into how employee-centric competitive advantage in this sector can be achieved in various markets. This book is unique in its approach by focusing on the specifics of the social exchange and interaction between the service provider and customer. It therefore offers a novel synthesis of knowledge on service satisfaction in the tourism sector, which will serve as valuable pedagogical and research reference for students and academics interested in hospitality and tourism.
