How are users influenced by social media platforms when they generate content and does this influence affect users compliance with copyright laws These are pressing questions in today s internet age and Regulating Content on Social Media answers them by analysing how the behaviours of social media users are regulated from a copyright perspective Corinne Tan an internet governance specialist compares copyright laws on selected social media platforms namely Facebook Pinterest YouTube Twitter and Wikipedia with other regulatory factors such as the terms of service and the technological features of each platform This comparison enables her to explore how each platform affects the role copyright laws play in securing compliance from their users Through a case study detailing the content generative activities undertaken by a hypothetical user named Jane Doe as well as drawing from empirical studies the book argues that in spite of copyright s purported regulation of certain behaviours users are nudged by the social media platforms themselves to behave in ways that may be inconsistent with copyright laws Praise for Regulating Content on Social Media This book makes an important contribution to the field of social media and copyright It tackles the real issue of how social media is designed to encourage users to engage

in generative practices in a sense effectively seducing users into practices that involve misuse or infringement of copyright whilst simultaneously normalising such practices Melissa de Zwart Dean of Law Adelaide Law School Australia This timely and accessible book examines the regulation of content generative activities across five popular social media platforms Facebook Pinterest YouTube Twitter and Wikipedia Its in depth critical and comparative analysis of the platforms growing efforts to align terms of service and technological features with copyright law should be of great interest to anyone studying the interplay of law and new media Peter K Yu Director of the Center for Law and Intellectual Property Texas A M University
