**The High Price I Had To Pay** Jamila T. Davis,2015-03-26 The High Price I Had To Pay is a captivating real life story that reveals another aspect of the inside fraud perpetrated by Lehman executives that has yet to be told Years before the 2008 Financial Crisis a major epidemic of mortgage fraud surged throughout the country The FBI geared up to combat the problem imprisoning thousands who alleged to have victimized Wall Street giants such as Lehman Brothers Hidden safely behind the auspices of being a victim savvy Ivy League bank executives created additional fraudulent schemes to further their profit Utilizing their victimizers as scapegoats the bankers clever plan went undetected Consequently the real architects of the massive fraudulent lending schemes escaped unpunished And the small fries who the bankers blamed were left to do big time This illuminating synopsis by author Jamila T Davis who is currently serving a 12 Year sentence in federal prison for bank fraud is shared from a unique standpoint Davis was labeled by Lehman attorneys as the 25 year old mastermind who devised an elaborate mortgage scheme that defrauded their bank of 22 million dollars Her shocking story captures the inside tricks of Wall Street elite and takes you up close and personal into a world driven by greed and power Davis story will leave you amazed and make you think Have savvy Wall Street executives such as Richard Fuld been able to out smart the world And while these executives escape unpunished is it fair that small Fries like Davis are left to do big time

**Debt-Free U** Zac Bissonnette,2010-08-31 This book can save you more than 100 000 These days most people assume you need to pay a boatload of money for a quality college education As a result students and their parents are willing to go into years of debt

and potentially sabotage their entire financial futures just to get a fancy name on their diploma But Zac Bissonnette is walking proof that this assumption is not only false but dangerous a class con game designed to rip you off and doom your student to a post graduation life of near poverty From his unique double perspective he s a personal finance expert at Daily Finance AND a current senior at the University of Massachusetts Zac figured out how to get an outstanding education at a public college without bankrupting his parents or taking on massive loans Armed with his personal knowledge the latest data and smart analysis Zac takes on the sacred cows of the higher education establishment He reveals why a lot of the conventional wisdom about choosing and financing college is not only wrong but hazardous to you and your child s financial future You ll discover for instance that Student loans are NOT a necessary evil Ordinary middle class families can and must find ways to avoid them even without scholarships College rankings are useless designed to sell magazines and generate hype If you trust one of the major guides when picking a college you face a potential financial disaster The elite graduate programs accept lots of people with non elite bachelors degrees So do America s most selective employers The name on a diploma ultimately won t help your child have a more successful career or earn more money Zac can prove every one of those bold assertions and more No matter what your current financial situation he has a simple message for parents RELAX Your kid will be able to get a champagne education on a beer budget *Design Rules, Volume 2* Carliss Y. Baldwin, 2024-12-17

How the innate physical properties of different technologies influence the strategy and structure of the organizations implementing the technologies the sequel to *Design Rules* The Power of Modularity In *Design Rules* volume 2 Carliss Baldwin offers a comprehensive view of the digital economy by putting forth an original theory that explains how technology shapes organizations in a market economy The theory claims that complementarities arising from the physical nature of technologies can be arrayed on a spectrum ranging from strong to very weak Two basic types of technologies in turn exhibit different degrees of complementarity between their internal components Flow production technologies which are found in steel mills and auto factories specify a series of steps each of which is essential to the final product In contrast platform technologies which are characteristic of computer hardware software and networks are modular systems designed to provide options Baldwin then investigates the dynamics of strategy for firms in platform ecosystems Such firms create value by solving technical bottlenecks technical barriers to performance that arise in different parts of the system as it evolves They capture value by controlling and defending strategic bottlenecks components that are 1 essential to the functioning of some part of the system 2 unique and 3 controlled by a profit seeking enterprise Strategic bottlenecks can be acquired by solving technical bottlenecks They can be destroyed via tactics such as substitution reverse engineering bypassing the bottleneck and enveloping a smaller bottleneck within a larger one Strategy in platform ecosystems can thus be viewed as the effective management of technical and strategic bottlenecks within a modular technical system *The Economist*, 1847
