Apple's Secret Of Success - Traditional Marketing Vs. Cult Marketing Sascha Schneiders, 2011 There is possibly no other company which is so casual and at the same time so powerful as the computer and entertainment manufacturer Apple The company controls the online music market the market for portable music players and is now capturing the high tech mobile phone market Apple moves into new electronic markets with strong competitors in order to monopolise them just a short time later The CEO Steve Jobs has brought a brand into being that is different and at the same time mainstream A strong magnetic brand which yields more influence in people's life than one would care to admit This is absolutely the reason why every company in the world wishes for a strong magnetic brand which can be defined as a CULT BRAND They get repeatedly chosen over the competition They bring higher prices than the competition And if they are a strong enough brand their customers not only use their products but evangelize them to the world This project aims to analyze Apple's marketing activities in order to figure out what makes this company so successful It adds to the traditional marketing theory the new theory of cult marketing because traditional marketing delivers no approach to explain the behavior of cult brands The phenomena of a Cult Brand are comparable to the patterns of a religion and Apple as well has strong believers When it comes to their favorite brand they enjoy telling who ever will listen how great it is and why they love it so much People are camping in front of Apple's stores just to get their latest innovative product And if their Messiah Steve Jobs enters the stage to introduce a new product to thousands of viewers he brings the house down This book discusses Apple's unique Marketing Strategy and delivers a guideline on the Example of Apple of the needed conditions to convert an ordinary brand into a CULT BRAND

the most dramatic improvements because their battery hardware is capable of good performance once properly configured. Battery health below 80% indicates degradation contributing to drain though optimization still provides meaningful improvement. The guide includes decision frameworks helping determine when optimization alone suffices versus when battery replacement should be considered. I need all my apps and features I can't disable things. Optimization doesn't require disabling features you actually use. It involves disabling features and permissions you're not using or don't realize are enabled. Most users discover 10-15 apps with location access they don't remember granting background refresh for apps they haven't opened in months and notifications from apps they ignore. The guide emphasizes selective optimization: keep features providing value, disable features consuming battery without providing proportional benefit. Location access for Maps is appropriate; location access for shopping apps tracking you for advertising is not. You decide which trade-offs align with your priorities. This probably requires technical expertise I don't have. Every procedure includes specific step-by-step instructions with exact Settings navigation paths. Open Settings Privacy. Specific procedures with exact Settings navigation paths. Emergency fixes, systematic optimization and long-term maintenance. Quick reference checklists and troubleshooting flowcharts. Model-specific guidance for all current iPhone models. FAQ addressing 21 common battery concerns. Decision frameworks for every battery-related choice. Your investment: 1-2 hours of initial configuration, 15 minutes monthly maintenance. Your return: Reliable all-day battery performance, eliminated charging anxiety, extended device lifespan and complete understanding of your iPhone's battery behavior. Battery optimization isn't complex; it's systematic. This guide provides the system. Implementation is in your hands. Get started now. Your iPhone's battery performance transforms within days of implementing these procedures.
