Race in American Sports James L. Conyers, Jr., 2014-05-21 These essays critically examine the issue of race in college and professional sports, beginning with the effects of stereotypes on black female college athletes and the self-handicapping of black male college athletes. Also discussed is the movement of colleges between NCAA designated conferences and the economic impact and effects on academics for blacks. An essay on baseball focuses on changes in Brooklyn during the Jackie Robinson years, and another essay on how the Leland Giants became a symbol of racial pride. Other essayists discuss the use of American Indian mascots, the Jeremy Lin spectacle surrounding Asians in pro sports, the need to hire more NFL coaches of color, and ideals of black male masculinity in boxing. Instructors considering this book for use in a course may request an examination copy here.

Determining the College Football Playoff: Weighted Wins, A Better Approach Ray D. Theis, Mark G. Terwilliger, 2021-09-21 In this book, we explore the history of college football and, in particular, the mythical college championship from 1869 to the present day. For several years, different media outlets took it upon themselves to declare a national championship, which led to nothing short of confusion. In one year, four different teams were named champion. This chaotic situation and accompanying controversy ultimately led to the creation of the Bowl Championship Series, or BCS. Initially, the BCS selection was based on a formula that incorporated several polls and computer models. However, the proprietary nature of the computer models and the complexity of the mathematics used to combine the data sources to arrive at the final selection did very little to quiet the controversy. This led to the creation of a selection committee to choose the four best teams to compete in a four-team playoff. Again, controversy has ensued, with many questioning the politics and nebulous, capricious nature of the criteria. We have created an alternate model, which we have dubbed the weighted wins system, that defines a simple, unbiased, and consistent mechanism for evaluating and comparing the records of the teams in the NCAA's Bowl Subdivision. We have compared the results of the weighted wins model against forty years of actual game results and found that it generates very similar outcomes. The primary difference is that it completely removes politics from the selection process and offers a clear path to the playoffs for all members of the Bowl Subdivision.
