You Should Quit Reddit Jacob Desforges, 2023-02-21 In recent years countless books articles and documentaries have addressed the negative effects that social media platforms have wrought on their users and society However these former works are incomplete nearly no attention has been paid to Reddit one of the most popular websites in the world Reddit is certainly unique among social platforms but its potential for addiction and darker side of nefarious activity should absolutely not be understated Additionally nearly no actionable advice has been provided to users of these platforms The audience is told that these websites and apps are harming their mental health wasting their time and that they are addictive which would logically make the task of quitting rather difficult but then provided zero guidance on how to disconnect from them Over 200 000 users gather on Reddit's r/NoSurf community to discuss reducing their internet use the forum is filled with reports of people who want to quit Reddit but find themselves psychologically compelled to return to the site over and over For moderate to heavy users of these platforms quitting is clearly not so simple **You Should Quit Reddit** is a paradigm shift in the genre Jacob Desforges was a Reddit user of over a decade and a self admitted Reddit addict who spent on average around three hours daily on the site Not only is this the first book investigating Reddit's flaws as a platform but it is also written from the perspective of someone who experienced firsthand the struggle that comes with quitting these addictive platforms This book therefore also provides readers with the practical advice tools and techniques needed to shatter the cycle of digital addiction enabling them to quit visiting Reddit and other time wasting websites for good so they can effectively reclaim their time to use in a more intentional manner

Advances in Visual Informatics Halimah Badioze Zaman, Peter Robinson, Alan F. Smeaton, Renato Lima De Oliveira, Bo Nørregaard Jørgensen, Timothy K. endures vast fortunes made from decentralized networks not controlled by any single entity and not yet regulated by many governments The recent growth of crypto would have been all but impossible if not for a brilliant young man named Vitalik Buterin and his creation Ethereum In this book Laura Shin takes readers inside the founding of this novel cryptocurrency network which enabled users to launch their own new coins thus creating a new crypto fever She introduces readers to larger than life characters like Buterin the Web3 wunderkind his short lived CEO Charles Hoskinson and Joe Lubin a former Goldman Sachs VP who became one of crypto s most well known billionaires Sparks fly as these outsized personalities fight for their piece of a seemingly limitless new business opportunity This fascinating book shows the crypto market for what it really is a deeply personal struggle to influence the coming revolution in money culture and power **Price Manipulation in the Bitcoin Ecosystem** Erman Yilmaz, To its proponents the cryptocurrency Bitcoin offers the potential to disrupt payment systems and traditional currencies It has also been subject to security breaches and wild price fluctuations This paper identifies and analyzes the impact of suspicious trading activity on the Mt Gox Bitcoin currency exchange in which approximately 600 000 bitcoins BTC valued at 188 million were fraudulently acquired During both periods the USD BTC exchange rate rose by an average of four percent on days when suspicious trades took place compared to a slight decline on days without suspicious activity Based on rigorous analysis with extensive robustness checks the paper demonstrates that the suspicious trading activity likely caused the unprecedented spike in the USD BTC exchange rate in late 2013 when the rate jumped from around 150 to more than 1 000 in two months **Communication, Networks and Computing** Ranjeet Singh Tomar, Shekhar Verma, Brijesh Kumar Chaurasia, Vrijendra Singh, Jemal H. Abawajy, Shyam Akashe, Pao-Ann Hsiung, Ramjee Prasad, 2023-09-26 These two volumes constitute the selected and revised papers presented at the Second International Conference on Communication Networks and Computing CNC 2022 held in Gwalior India in December 2022 The 53 full papers were thoroughly reviewed and selected from the 152 submissions They focus on the exciting new areas of wired and wireless communication systems high dimensional data representation and processing networks and information security computing techniques for efficient networks design vehicular technology and applications and electronic circuits for communication systems that promise to make the world a better place to live in **Deep Learning Theory and Applications** Allel Hadjali, Emanuele Maiorana, Oleg Gusikhin, Carlo Sansone, 2025-10-30 This book constitutes revised selected papers from the 6th International Conference on Deep Learning Theory and Applications DeLTA 2025 which took place in Bilbao Spain during June 12 13 2025 The 9 full papers and 13 short papers presented in this volume were carefully reviewed and selected from 42 submissions The conference is focusing on models and algorithms machine learning Big Data analytics computer vision applications and natural language understanding **Conference Proceedings Trends in Business Communication 2024** Peter Schneckenleitner, Wolfgang Reitberger, Alexandra Brunner-Sperdin, 2025-07-01 The 10th edition of the international academic conference Trends in Business Communication TIBCOM once again presents the

latest research findings in marketing and communication This proceedings volume gives the reader a compact overview of the key findings All published scientific papers have undergone a detailed review process The TIBCOM Conference 2024 focused on topics like Artificial Intelligence Employer Branding Femvertising or the effects of visual distractors in webshops

Following the Ticker Ian G. Anson, 2023-03-01 Drawing on a wide variety of empirical methodologies including large scale survey analysis survey experiments and content analyses *Following the Ticker* explores the complex relationship between stock market performance and political judgments through distinctive patterns of coverage in American news media Building an eclectic theory that explores the interplay between media agenda setting and partisan motivated reasoning author Ian G Anson helps to explain why the stock market increasingly occupies the minds of Americans when they evaluate the performance of incumbent presidents In doing so *Following the Ticker* contributes to a growing literature exploring the links between public opinion and economic inequality in American society Because the stock market is not the economy the increasing salience of the stock market as a source of political judgments reflects a worrying development for classic models of democratic accountability

Token Economy Shermin Voshmgir, 2025-04-20 The third edition of *Token Economy* is not just an update it is a reworking of a foundational book that has helped thousands make sense of how Bitcoin and other blockchain networks like Ethereum or Solana are reshaping our digital financial and political systems The book serves as an excellent primer for understanding the key aspects of the technological infrastructure as well as the decentralized applications built on top of it from DeFi to various token types and decentralized organizations It also explains the difference between DeFi CeFi and TradFi why blockchain networks can be considered the backbone of Web3 and the increasing role of AI This edition adds many practical use cases blending history systems theory and real world use cases to demystify everything from Bitcoin to Tokens and DAOs It explains how blockchain architecture token design and incentive mechanisms intersect with regulation politics and economics You ll learn how crypto rewrites money what stablecoins actually do how DAOs govern digital communities and why many token ecosystems fail not because of code but because of incentives and governance If you re learning building investing teaching or regulating in Web3 this book offers critical clarity in a field full of jargon As a longtime voice of clarity in the crypto world the author Shermin Voshmgir weaves together historical analysis technical insight and interdisciplinary critique in a way that makes complex systems both legible and accessible The third edition includes many more use cases than previous editions and reflects a maturing industry one where many early promises of decentralization have collided with the realities of centralization custody risk regulatory capture and broken incentive design While many books on crypto focus on trading or superficial overviews the book remains rooted in systems thinking and long term relevance

What This Book Offers A holistic framework for understanding Web3 infrastructure including blockchain architectures consensus mechanisms privacy scalability and the economics of decentralization A critical exploration of money and tokenization offering both historical context and future scenarios It asks hard questions about

whether cryptocurrencies and stablecoins can replace fiat money and explains how financial literacy remains the first line of defense against fraud and hype A grounded analysis of decentralized autonomous organizations DAOs and purpose driven tokens using real world case studies of protocols like Bitcoin Helium Ocean Protocol and MakerDAO A design thinking framework for evaluating token incentives governance structures and stakeholder dynamics bridging political science economics cybernetics and complex systems theory Whether you re a builder policymaker regulator academic investor or simply crypto curious Token Economy will help you Understand the difference between hype and real infrastructure Explore the incentives and governance dynamics embedded in every protocol Make better decisions around investing building or regulating digital assets Bridge the gap between idealism and realism in Web3

Computational Science - ICCS 2025

Workshops Maciej Paszynski, Amanda S. Barnard, Yongjie Jessica Zhang, 2025-08-06 The 6 volume set constitutes the workshop proceedings of the 25th International Conference on Computational Science ICCS 2025 which took place in Singapore Singapore during July 7 9 2025 The 137 full papers and 32 short papers presented in these proceedings were carefully reviewed and selected from 322 submissions The papers are organized in the following topical sections Volume I Advances in high performance computational earth sciences numerical methods frameworks artificial intelligence approaches for network analysis artificial intelligence and high performance computing for advanced simulations and biomedical and bioinformatics challenges for computer science Volume II Computational health computational modeling and artificial intelligence for social systems and computational optimization modelling and simulation Volume III Computational science and AI for addressing complex and dynamic societal challenges equitably computer graphics image processing and artificial intelligence computing and data science for materials discovery and design and large language models and intelligent decision making within the digital economy Volume IV Machine learning and data assimilation for dynamical systems and multi criteria decision making methods applications and innovations Volume V Credible Multiscale modelling and simulation numerical algorithms and computer arithmetic for computational science quantum computing retrieval augmented generation and simulations of flow and transport modeling algorithms and computation Volume VI Smart systems bringing together computer vision sensor networks and artificial intelligence solving problems with uncertainty and teaching computational science

Shareworthy Robin Landa, Greg Braun, 2024-06-25 In today s highly competitive marketplace a brand must tell meaningful stories that resonate with their target audiences across media channels People want more than a utilitarian benefit stories are ultimately what drive us to engage with brands And we want to align ourselves with brands that are ethical and purpose driven and that take responsibility for their actions and messaging This indispensable book reveals what makes brand stories shareworthy and guides readers through creating relevant and resonant advertising Combining practitioner and academic perspectives Robin Landa and Greg Braun offer a roadmap for conceiving and developing creative advertising campaigns that are responsible and inclusive and that audiences enthusiastically share They demonstrate that

shareworthy storytelling embraces diversity equity inclusion purpose and brand activism and eschews tropes stereotypes and negative messaging The book features candid interviews with expert practitioners spanning diverse global communities who share the hard earned wisdom of their award winning campaigns as well as insightful case studies from major companies such as Amazon Nike the New York Times and Dove Timely and actionable Shareworthy shows current and aspiring marketing professionals how to craft a story connect with the audience and embrace social responsibility throughout
