Current Issues in Romance Languages Teresa Satterfield, Christina Tortora, Diana Cresti, 2002. This book presents an enlightening collection of papers contributing to theoretical discussions across many topics within the study of Romance Languages and Linguistics. The selected papers have been reworked for the current publication.

New Perspectives on Romance Linguistics Chiyo Nishida, Jean-Pierre Y. Montreuil, 2006-08-31. This is the first of two volumes emanating from the Linguistic Symposium on Romance Languages held at the University of Texas at Austin in February 2005. It features the keynote address delivered by Denis Bouchard on exaptation and linguistic explanation as well as seventeen contributions by emerging and internationally recognized scholars of Spanish, French, Italian as well as Rumanian. While the emphasis bears on formal analyses, the coverage is remarkably broad as topics range from morphology, syntax, semantics, pragmatics and language acquisition. Each article seeks to represent a new perspective on these topics and a variety of frameworks and concepts are exploited: distributive morphology, entailment theory, grammaticalization, information structure, left periphery, polarity, lattice, spatial individuation, thematic hierarchy etc. This volume will challenge anyone interested in current issues in theoretical Romance Linguistics.
