Chart your course, following your progress with an easy to use training log. It's the shoes, choosing the right pair and why it's so important. Stretch and strengthen simple stand up exercises for before and after your walk to keep your entire body supple and toned. How am I doing? how to assess your improving health and fitness. Sticks and stones, whether hand weights and walking poles are right for you. Do the diet, hydration, nutrition, calorie burn, and cutting the fat. Moving forward, advanced techniques, speed workouts, and racewalking for the ambitious. Beyond the book, how to write your own exercise prescription and keep up this great habit now that the first ninety days are behind you.
