for eigene Projekte *Privacy and Identity Management. Data for Better Living: AI and Privacy* Michael Friedewald, Melek Önen, Eva Lievens, Stephan Krenn, Samuel Fricker, 2020-03-10 This book contains selected papers presented at the 14th IFIP WG 9.2.9.6.11.7.11.6 SIG 9.2.2 International Summer School on Privacy and Identity Management held in Windisch Switzerland in August 2019 The 22 full papers included in this volume were carefully reviewed and selected from 31 submissions Also included are reviewed papers summarizing the results of workshops and tutorials that were held at the Summer School as well as papers contributed by several of the invited speakers The papers combine interdisciplinary approaches to bring together a host of perspectives which are reflected in the topical sections language and privacy law ethics and AI biometrics and privacy tools supporting data protection compliance privacy classification and security assessment privacy enhancing technologies in specific contexts The chapters What Does Your Gaze Reveal About You On the Privacy Implications of Eye Tracking and Privacy Implications of Voice and Speech Analysis Information Disclosure by Inference are open access under a CC BY 4.0 license at link.springer.com *What Matters for Health and Happiness Among the Older Adults in Asia* Nai Peng Tey, Halimah Awang, Shekhar Chauhan, 2024-03-11 People want to live a healthy and happy later life A large body of literature shows the close association between health status and happiness and between health and active engagement in work exercise and social and religious activities However the causation between the two can run both ways and it is difficult to determine the causal effect with cross sectional data Various authors have shown the significant influence of socioeconomic factors and human needs on older people's health status and happiness A better understanding of the factors affecting healthy and happy aging is essential for policymaking to improve the well being of older people The availability of data from HRS family studies in several Asian countries CHARLS in China LASI in India JSTAR in Japan KLoSA in Korea IFLS in Indonesia HART in Thailand MARS in Malaysia and Longitudinal Study of Ageing and Health in Viet Nam see Gateway to Global Aging Data provides an excellent opportunity for researchers to examine factors affecting health and happiness among older adults within and across Asian countries This research topic aims to gather papers that investigate the socioeconomic attitudinal and behavioural factors affecting the health status and happiness life satisfaction of older adults in Asia The dependent variables may include physical health mental health disability ADL IADL cognitive functioning self rated health health expenditure feeling of happiness and life satisfaction The independent variables may be age gender marital status place of residence educational level active engagement work exercise social and religious activities family and social relationship and support outlook in life smoking drinking and access to and utilization of healthcare services etc Manuscripts can be based on individual countries or cross country analysis preferably using the panel data to establish the causal effects of the independent variables on the dependent variables **Security in Smart Home Networks** Yan Meng, Haojin Zhu, Xuemin (Sherman) Shen, 2023-01-17 This book presents the security and privacy challenges of the smart home following the logic of terminal device voice interface application platform For each component the authors provide

answers to the three questions 1 In the terminal device layer how to conduct cross layer privacy breach analysis and provide effective countermeasures 2 In the voice interface layer how to design effective and lightweight schemes to defend against voice spoofing 3 In the application layer how to design an effective anomaly detection system without breaching the application platform The authors conduct a thorough analysis of the security threats and challenges in each component of the smart home review the existing state of the art solutions proposed by other researchers and elaborate on proposed countermeasures This book aims to provide both security threats analysis and state of the art countermeasures for the smart home network

The Smarthome Book Andrew Howe, Technology is playing an increasingly more important part in our homes as well as our day to day lives Get this simple to read guide to be introduced to structured wiring and smarthome concepts It will not only take you through the requirements necessary to implement these upgrades but also provide a long list of inspirational and useful ideas to help make your smarthome upgrade not only a reality but fun Through the chapters of this book we cover the various topics and components which will provide an insight into upgrading your home and making it smart Considering a renovation or a new build Then look no further as this will detail the basics of home cinema whole house audio and video systems security with remote monitoring energy efficiency and how best to set up your data network all wrapped up in an easy to read format with easily laid out diagrams and a glossary of terms and links at the end to further your quest Consider how long people spend deciding what flooring to lay down or what tiles to place in the kitchen or bathroom Now consider how long people spend on what type of cabling will allow them to have that cool minimalist look in their renovation Those hidden wires the intelligent lighting the surround sound the energy efficient heating Read this book before speaking to your electrician or installer Save yourself time and money by being prepared

Gerontechnologies for Home Support Alexander Moreno, Sumi Helal, Henk Herman Nap, Gloria M. Gutman, 2024-10-07 In recent years various digital and non digital gerontechnology applications in home support have been developed From medication administration aids e g reminders and alarms to environmental monitoring e g air quality sensors and cameras to fall detection and health and activity monitoring e g smartwatch these promising solutions are in the works or already in the marketplace Additionally the COVID 19 pandemic has accelerated the development and deployment of technological solutions supporting remote care and communication e g video calls and home service delivery e g meals and groceries both of which have been developed to facilitate aging in place This is significant especially as avoiding the institutionalization of older adults has become a major goal of governments and caring families around the world These technologies are a potential solution to help older adults and family caregivers age at home maintain autonomy and independence and avoid social isolation These technologies can reduce the workload of professional caregivers It is crucial to update our knowledge on evidence based technologies for home support tested simultaneously in older adults and their family caregivers Healthcare professionals and families are often disadvantaged by a lack of information demonstrating their utility and cost effectiveness This article collection focuses

on providing evidence based information about emerging and existing gerontechnologies which is essential to make an informed decision in recommending their use or deciding to purchase them For older adults it will provide proofs upon which to make an informed decision to invest in a specific technology when needed For family caregivers it will improve their judgment when trying to choose purchase and adopt a technology aiming to solve a problem at home and have peace of mind when these technologies are used to support their loved ones For clinicians it will provide a pool of evidence based technological tools that could be recommended to families facing the loss of autonomy and independence of older adults For researchers and scholars it will provide a base of knowledge for future applied research in gerontechnology Finally improving the evidence in gerontechnology will help to provide cues for policymakers and governments to create legislation aiming to protect the public and the end users of these technologies
