underlying the change comes from China where finance and technology are being merged into a system with consequences that resonate far beyond China's border. The changes of this global revolution in finance and technology (fintech) will be as powerful as those wrought in social media, retailing and advertising by giants such as Amazon, Facebook, Google and Twitter, which have overturned how we shop and communicate. China reinvented money with lightning speed, transforming a backward, antiquated cash-based finance system into one centered on super apps created by technology giants Alibaba and Tencent. More powerful than anything available outside of China, they allow their billion users to pay, borrow, invest, buy goods and services, travel, chat and far more, all fused together in one mobile phone application. Think Facebook, Google, Twitter, Goldman Sachs, Amazon, J.P. Morgan Chase all rolled into one app. We in the West need to understand China's cashless revolution for reasons ranging from the macroeconomic to issues of personal liberty. The cutting edge of finance is now in China, forcing major financial firms in the United States and the West to figure out how not to be left behind. China's cashless revolution is also a harbinger of our future: if we let the genie out of the bottle and allow big tech to become big finance, as money goes digital and central banks around the world consider launching digital currencies, we may have both immense convenience and a frightening concentration of power that could violate our privacy, stifle competition, increase financial risk and give big firms or the government more control over our financial lives. And once this genie is out of the bottle, the struggle to put it back in may be impossible.

The Unknowing Box Jumper: How the church can avoid playing a role in the future deception Daniel Richter, 2024-09-20 In the Bible when it speaks of the End times there is a warning that many will be deceived even the elect With the rapid advancement of technology we are living in a time when many of these deceptions and components of the system of the Antichrist can be accomplished and implemented respectively We actually use many of these components in our day to day lives without considering how they can be used against us During the recent global pandemic many individual technologies were introduced that were used to control the population and in my opinion most churches did not do enough to challenge the State because similar to individuals they have accepted these tech advancements in their daily operations The seamless switch to online virtual church services was a major step to control a part of the population that traditionally pushes back against government overreach into the religious lives of its citizens Fear dominated the spirit of many churches and their physical doors remained closed to not only their congregants but also millions who were seeking Truth in confusing times By not asking the difficult questions that we are challenged with in Scripture and by being willfully obedient to the growing technocracy I propose that the Church runs the risk of being used by Satan unknowingly as part of the coming deceptions My hope is that this book will serve as a wake up call to Christians to realize that we have been engaged in a Spiritual war that has been raging from before we existed A key to understanding the End times lies in our understanding of the earliest books of the Bible It is also critical that churches realize that our blind acceptance of technology has harmed us and our mission A reassessment is long overdue Many of the dots are connected from one existing technology to another to reveal how they can be weaponized against God s children Many aspects of the pandemic response were a proving ground for the technology that will be used against the Church when the world system is implemented If churches do not acknowledge this and retool there may not be another chance There is a groundswell of people coming to faith in Jesus Christ and they are desperately looking for something that looks different from the world Truth If the Church continues along its

path of keeping up with the world in culture and technology it will miss this opportunity to live out the Great Commission of Matthew 28 and instead shepherd its flock into the slaughterhouse of deception *Fintech Wars* James da Costa,2024-10-03 Fintech touches every part of our lives from cashless economies to crypto and even our climate This book draws back the curtain on this fascinating world full of friction failure and fortune Fintech Wars delves into one of the world s most lucrative and fast growing sectors Witness the bold strategies groundbreaking innovations and relentless drive that propelled fintech unicorns like PayPal Nubank and Monzo to transform the world Featuring interviews with generational founders including Reid Hoffman LinkedIn Nigel Morris Capital One and Martha Lane Fox Lastminute com the narrators of this book have built companies that represent over one trillion dollars in market capitalization As the founder of a digital bank James da Costa is a fintech insider He draws upon his network and first hand experiences to offer a fascinating look into the intricacies and motivations behind building billion dollar disruptors Step into the fascinating unpredictable and inspiring world of fintech
