Digital new deal: the quest for a natural law in a digital society Riccardo Genghini,2021-06-08 The quest for a natural law that can be applied to a digital society may sound like an oxymoron but it is a necessary quest if we hope to institute a Digital New Deal Hence the title of this book Today once again mass media is disrupting society much as radio and cinema were used to buttress totalitarianism in the 1920s or even worse in the 15th century when the printing of the Bible unleashed 100 years of war plague and instability Things get messy when people disagree on facts rather than ideas Natural law springs from the features of the physical world which contains boundaries an inside and an outside limited resources living individuals objects living animals living plants climate the four elements etc None of this is a given in the digital world which looks today like feudalism in a box with fire walled communities run by unelected autocrats system administrators ruling over countless subjects whose identities are tied to the domain of the fire walled community and whose rights can only be enforced by the autocratic system administrator This dystopic reality is neither necessary nor inevitable It is the consequence of bad technical design and inappropriate business models which are destroying the spirit of free pluralism that enabled them to thrive in the first place Information technology has its own ontology and natural rules and we must understand them and learn to regard them as being among the founding legal principles of our free open pluralistic societies Of the 12 founding digital principles addressed here the most important may well be that we must each own and control our digital identities In the world created by information technology everyone and everything should possess a UID a unique identifier Without one we are just helpless particles lost in a dark and hostile universe **HTML5 Mobile Websites** Matthew David,2013-05-02 Build HTML5 powered mobile web experiences with the aid of development frameworks that speed the development of Native App like experiences Build on your foundation of HTML and JavaScript with a complete understanding of the different mobile Web browser technologies You get carefully detailed techniques that are illustrated in full color so you can leverage the Web technologies unique to each mobile browser apply frameworks such as Sencha Touch to rapidly build out your designs and design techniques expressly suited for tablet devices Projects provide hands on practice and code is provided on the companion website www.visualizetheweb.com **Sociology in Today's World** Brian Furze,Cengage Learning Australia,Pauline Savy,2014 Sociology in Today s World explores why sociology is important and relevant to everyday life It teaches students how to think sociologically not just what to think and shows how sociology can help us make sense of our lives It comprehensively covers key aspects and current issues in Australian and New Zealand society whilst emphasising the importance of diversity and a global perspective **Speaking with a Purpose** Arthur Koch,Jason
