Medication Management In Older Adults Medication Management In Older Adults:

Medication Management in Older Adults Susan Koch, F. Michael Gloth, Rhonda Nay, 2010-08-14 Medication use is the predominant form of health intervention in our society And as we age the likelihood of medication use increases dramatically with more than 80 percent of those over age 65 using one or more medications Along with that the potential for medication errors also increases Indeed adverse drug reactions ADRs and adverse drug events ADEs are a significant problem in older adults Written in a practical format by contributors from Australia and the United States Medication Management in Older Adults A Concise Guide for Clinicians presents the available evidence on research interventions designed to reduce the incidence of medication errors in older adults with a focus on acute subacute and residential long term care settings Because medication errors can occur at all stages in the medication process from prescription by physicians to delivery of medication to the patient by nurses and in any site in the health system it is essential that interventions be targeted at all aspects of medication delivery Chapters cover the principles of medical ethics in relation to medication management common medication errors in the acute care sector medication management in long term care settings nutrition and medications the outcomes of a systematic review dose form alterations Electronic Health Records EHR Computerized Order Entry COE Beers criteria and pharmacokinetics and pharmacodynamics For those clinicians especially concerned with providing the best possible outcomes for their older adult patients Medication Management in Older Adults A Concise Guide for Clinicians is an invaluable resource and a significant contribution to the burgeoning literature on medication errors Improving Medication Management in Home Care Dennee Frey, 2016-05-06 Help stop the widespread problem of medication errors among the elderly The problem of medication errors among the elderly is widespread Improving Medication Management in Home Care Issues and Solutions tackles this tough issue by closely examining the challenges faced in preventing medication errors in home and community care program settings and putting forth effective solutions to better manage medication use Respected experts discuss the unique role of the pharmacist in improving patient safety presenting a comprehensive collection of evidence based studies featuring national and international viewpoints cutting edge interventions and cost effective procedures that address medication problems in older adults Polypharmacy is the term used for patients receiving too many medications for a specific treatment The implications for drug drug interactions can be dangerous for the unaware patient Improving Medication Management in Home Care Issues and Solutions focuses on several different effective management programs and examines each in detail completely explaining the positive and negative results This hands on practical information is useful for all professionals and field providers working with older adults and their medication concerns The book also provides valuable lessons through the experiences of national home health leaders in various settings hospital based rural large or small etc as well as community based programs for dually eligible older adults The book is extensively referenced and includes an abundance of clear helpful tables figures and Web resources Improving Medication

Management in Home Care Issues and Solutions explores developing computerized risk assessment screenings implementing pharmacist centered interventions improving transitional care from hospital to home the Prescription Intervention and Lifelong Learning PILL program Medication Therapy Management Services a quality improvement project to reduce falls and improve medication management outcome based quality improvement for patient safety intern programs that can provide cost effective consultant services Improving Medication Management in Home Care Issues and Solutions is essential reading for home health care administrators clinicians managers pharmacists physicians educators students those professionals involved in the field of aging and health practitioners world wide

Medication Management in Care of Older People

Maggi Banning,2008-04-15 Medication Management in Care of Older People is an accessible introduction to medication management and its role in the management of older people and their medicines It addresses key issues in medication management evaluates professional roles and clinical practice initiatives and explores healthcare policy and prescribing initiatives This text explores the biology and neurobiology of ageing pathological conditions such as Parkinson s and Alzheimer s disease medication errors issues of concordance long term conditions and the older person the principles of applied pharmacology and its relationship to older people Medication Management in Care of Older People will be of interest to health care professionals who either have an interest in medication management and older people or who are qualified independent or supplementary prescribers and will enable them to comprehend the principles of applied pharmacology and medication management to enable them to use this knowledge in their daily practice Illustrates the current issues concerns and approaches used to manage older people and their medicines Builds on pertinent current policy and research initiatives including the NSF for Older People and Building a Safer NHS for Patients the role of medication safety Each chapter features case studies learning outcomes and implications for practice I found this book to be interesting and highly relevant to OT practice I would recommend this book as a learning resource to inform review and support clinical therapy practice Occupational Therapists could well appreciate many of the contributory factors relating to medication problems with Older People using this resource could raise own standards but also assist with reducing the negative impacts of medication issues on older people Sarah Montgomery A E Occupational Therapist and Communications Officer COT Specialist Section Older People London UK

Evidence-Based Geriatric Nursing Protocols for Best Practice

Marie Boltz,Marie P. Boltz,Elizabeth Capezuti,Terry T. Fulmer,2024-09-26 Praise for previous editions The evidence based protocols are designed as a primary reference and are useful substantive and timely The broader contributions of useful format and succinct review of the evidence make it likely that this text will continue to be the leading resource in nursing education and practice The Gerontologist As a gerontological clinical educator research nurse I will often use this as a reference The format and the content are good and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice Score 97 Doodys The result of a collaboration between expert practitioners and

educators in geriatric nursing the seventh edition of this acclaimed reference has been updated and revised with new information on chronic conditions and emerging models of care presented in 10 completely new chapters It provides the most current evidence based protocols for improving both quality of care and patient outcomes when caring for older adults in multiple disciplines and settings As in past editions the seventh edition is distinguished by its use of a rigorous systematic method AGREE Appraisal of Guidelines for Research and Evaluation to improve the validity of the book s evidence based content Chapters provide assessment and management principles clinical interventions and information on specialty practice and models of care Included in most chapters are protocols developed for each clinical condition by experts in that specific area Evidence is current and derived from all settings of care including community primary acute and long term care Protocols include an overview and evidence based assessment and intervention strategies Illustrative case studies with discussion are presented in most chapters along with chapter objectives and references with evidence ratings Instructor s resources include an AACN Mapping Grid Course Cartridge Transition Guide PowerPoints and Test Bank New to the Seventh Edition Updated to encompass the latest trends in older adult care chronic conditions and emerging models of care New chapters on care and management of diabetes and respiratory care New chapters on issues surrounding nutrition and dementia and mental illness New chapter on care and comfort at the end of life New chapters on adopting principles of diversity equity and inclusion and an age friendly health system into practice New chapters on models of care in long term community based and primary care Key Features Delivers easy to follow geriatric protocols for best practices Updates evidence regularly to reflect current practice standards Encompasses a broad scope of content including detailed information rarely covered in professional literature Offers case studies and discussions to illustrate application of protocol to practice Written by renowned leaders in geriatric nursing education and practice Use of AGREE Appraisal of Guidelines for Research and Evaluation to improve the validity of evidence throughout the text Evidence-Based Geriatric Nursing Protocols for Best Practice Deanna Gray-Miceli,2007-11-16 Designated a Doody s Core Title As a gerontological clinical educator research nurse I will often use this as a reference The format and the content are good and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice Score 97 5 stars Doody s This third edition holds the promise of bringing yet another level of depth and sophistication to understanding the best practices for assessment interventions and anticipated outcomes in our care of older adults Evidence Based Geriatric Nursing Protocols for Best Practice is intended to bring the most current evidence based protocols known to experts in geriatric nursing to the audience of students both graduate and undergraduate practitioners at the staff level from novice to expert clinicians in specialty roles educators care managers and advanced practice nurses and nursing leaders of all levels We owe a debt of gratitude to the many authors and the editors for bringing this work to us from the preface by Susan Bowar Ferres PhD RN CNAA BC Senior Vice President Clinical Nurse Specialist Durham Veterans Administration Medical Center

Geriatric Research Education and Clinical Center This is the third thoroughly revised and updated edition of the book formerly entitled Geriatric Nursing Protocols for Best Practice The protocols address key clinical conditions and circumstances likely to be encountered by a hospital nurse caring for older adults They represent best practices for acute care of the elderly as developed by nursing experts around the country as part of the Hartford Foundation s Nurses Improving Care to the Hospitalized Elderly project NICHE This third edition includes 17 revised and updated chapters and more than 15 new topics including critical care diabetes hydration oral health care palliative care and substance abuse Each chapter includes educational objectives assessment of the problem nursing intervention or care strategies and references most chapters have case studies

Interdisciplinary Practice in Industrial Design Yong-Gyun Ghim,Cliff (Sungsoo) Shin,2025-07-26 Proceedings of the 16th International Conference on Applied Human Factors and Ergonomics and the Affiliated Conferences Orlando Florida USA 26 30 July 2025
