Medicine Quest Mark J. Plotkin, 2001 In *Medicine Quest* Mark Plotkin moves beyond the Amazon rainforests of his classic *Tales of a Shaman's Apprentice* to describe the ongoing race to find new medicines for intractable diseases such as AIDS cancer diabetes and tuberculosis in far flung places all over the world While highlighting the unlikely marriage of natural products indigenous wisdom and biotechnology Plotkin details discoveries that are producing stunning results in the laboratory painkillers from the skin of rainforest frogs anticoagulants from leech saliva and antitumor agents from snake venom An entertaining and educational weave of medicine ecology ethnobotany history exploration and adventure *Medicine Quest* will thrill scientists naturalists and armchair explorers and heighten our appreciation for the inexhaustible therapeutic potential of our natural world

Enviromedics Jay Lemery, Paul Auerbach, 2017-10-20 Many of us have concerns about the effects of climate change on Earth but we often overlook the essential issue of human health This book addresses that oversight and enlightens readers about the most important aspect of one of the greatest challenges of our time The global environment is under massive stress from centuries of human industrialization The projections regarding climate change for the next century and beyond are grim The impact this will have on human health is tremendous and we are only just now discovering what the long term outcomes may be By weighing in from a physician's perspective Jay Lemery and Paul Auerbach clarify the science dispel the myths and help readers understand the threats of climate change to human health No better argument exists for persuading people to care about climate change than a close look at its impacts on our physical and emotional well being The need has never been greater for a grounded informative and accessible discussion about this topic In this groundbreaking book the authors not only sound the alarm but address the health issues likely to arise in the coming years

The Sacred Science Nick Polizzi, 2019-03-05 In 2010 Nick Polizzi did something unimaginable He assembled a group of eight desperately ill patients from around the world and brought them into the heart of the Amazon rainforest to put the mysterious medicines of native shamans to the test The healing journey that unfolded would change

their lives and his own forever In *The Sacred Science* we join Nick as he explores these primordial traditions and learns firsthand what it takes to truly heal ourselves of physical disease emotional trauma and the sense of lostness that so many of us feel in these modern times We venture into a place where the ordinary rules we live by even survival instincts don't apply where the only thing to do is to step forward and be ready for anything Nick is not a guru or shaman he is an ordinary guy who pieced together an illuminating journey one experience at a time In this riveting true story we're shown the many layers that must be peeled away in order for us to find the truth of who we are and why we're here This book is a bridge between the flashy fast moving modern world and the forgotten ways of a healthier earth connected ancestral past You'll find practices and principles of native wisdom that you can put to use in your own life and you'll gain a new understanding of what it means to heal In the end what will become of the eight patients who set out on this path with Nick Will the exotic jungle medicines and harrowing rites of passage destroy them or give them a new lease on life Five will return with remarkable healing results Two will return disappointed One won't return at all [Barcoding Nature](#) Claire

Nourishment Fred Provenza, 2018 Reflections on feeding body and spirit in a world of change Animal scientists have long considered domestic livestock to be too dumb to know how to eat right but the lifetime research of animal behaviorist Fred Provenza and his colleagues has debunked this myth Their work shows that when given a choice of natural foods livestock have an astoundingly refined palate nibbling through the day on as many as fifty kinds of grasses forbs and shrubs to meet their nutritional needs with remarkable precision In *Nourishment* Provenza presents his thesis of the wisdom body a wisdom that links flavor feedback relationships at a cellular level with biochemically rich foods to meet the body's nutritional and medicinal needs Provenza explores the fascinating complexity of these relationships as he raises and answers thought provoking questions about what we can learn from animals about nutritional wisdom What kinds of memories form the basis for how herbivores and humans recognize foods Can a body develop nutritional and medicinal memories in utero and early in life Do humans still possess the wisdom to select nourishing diets Or has that ability been hijacked by nutritional authorities Consumers eager for a quick fix have empowered the multibillion dollar a year supplement industry but is taking supplements and enriching and fortifying foods helping us or is it hurting us On a broader scale Provenza explores the relationships among facets of complex poorly understood ever changing ecological social and economic systems in light of an unpredictable future To what degree do we lose contact with life sustaining energies when the foods we eat come from anywhere but where we live To what degree do we lose the mythological relationship that links us physically and spiritually with Mother Earth who nurtures our lives Provenza's paradigm changing exploration of these questions has implications that could vastly improve our health through a simple change in the way we view our relationships with the plants and animals we eat Our health could be improved by eating biochemically rich foods and by creating cultures that know how to combine foods into meals that nourish and satiate Provenza contends the voices of authority disconnect most people from a personal search to discover the inner wisdom that can nourish body and spirit That journey means embracing wonder and uncertainty and avoiding illusions of stability and control as we dine on a planet in a universe bent on consuming itself Plant Talk
