West,2016-10-18 Big unexpected changes are here to stay Slow incremental change has become a relic of the past Today s shifts come fast and big what Darrell West calls megachanges in which dramatic disruptions in trends and policies occur on a regular basis Domestically we see megachange at work in the new attitudes and policies toward same sex marriage health care smoking and the widespread legalization of marijuana use Globally we have seen the extraordinary rise and then collapse of the Arab Spring the emergence of religious zealotry the growing influence of nonstate actors the spread of ISIS fomented terrorism the rise of new economic and political powers in Asia and the fracturing of once stable international alliances Long held assumptions have been shattered and the proliferation of unexpected events is confounding experts in the United States and around the globe Many of the social and political institutions that used to anchor domestic and international politics have grown weak or are in need of dramatic reform What to do West says that we should alter our expectations about the speed and magnitude of political and social change We also need to recognize that many of our current governing processes are geared to slow deliberation and

promote incremental change not large scale transformation With megachange becoming the new normal our domestic and global institutions must develop the ability to tackle the massive economic political and social shifts that we face World Resources, 1994-95 World Resources Institute,1994 World Resources 1992-93 World Resources Institute,1992 This title includes the following features The most authoritative source of information on natural resources prepared by a leading policy research organization Readable and accessible Concise accounts of the latest trends in environmental studies Fully cross referenced and indexed Complete set of data tables and maps Parameters ,2000 *Constructionism* Idit Harel,Seymour Papert,1991 In 1985 the Media Lab was created at MIT to advance the idea that computation would give rise to a new science of expressive media Within the media lab the Epistemology and Learning group extends the traditional definition of media by treating as expressive media materials with which children play and learn The Group s work follows a paradigm for learning research called Constructionism Several of the chapters directly address the theoretical formulation of Constructionism and others describe experimental studies which enrich and confirm different aspects of the idea Thus this volume can be taken as the most extensive and definitive statement to date of this approach to media and education research and practice This book is structured around four major themes learning through designing and programming epistemological styles in constructionist learning children and cybernetics and video as a research tool for exploring and documenting constructionist environments **Books in Print Supplement** ,1994 **Forthcoming Books** Rose Arny,1999 **Books in Print** ,1991 **Subject Guide to Books in Print** ,1996
