Preparing for an Influenza Pandemic Institute of Medicine, Board on Health Sciences Policy, Committee on Personal Protective Equipment for Healthcare Workers During an Influenza Pandemic, 2007-12-28 During an influenza pandemic healthcare workers will be on the front lines delivering care to patients and preventing further spread of the disease As the nation prepares for pandemic influenza multiple avenues for protecting the health of the public are being carefully considered ranging from rapid development of appropriate vaccines to quarantine plans should the need arise for their implementation One vital aspect of pandemic influenza planning is the use of personal protective equipment PPE the respirators gowns gloves face shields eye protection and other equipment that will be used by healthcare workers and others in their day to day patient care responsibilities However efforts to appropriately protect healthcare workers from illness or from infecting their families and their patients are greatly hindered by the paucity of data on the transmission of influenza and the challenges associated with training and equipping healthcare workers with effective personal protective equipment Due to this lack of knowledge on influenza transmission it is not possible at the present time to definitively inform healthcare workers about what PPE is critical and what level of protection this equipment will provide in a pandemic The outbreaks of severe acute respiratory syndrome SARS in 2003 have underscored the importance of protecting healthcare workers from infectious agents The surge capacity that will be required to reduce mortality from a pandemic cannot be met if healthcare workers are themselves ill or are absent due to concerns about PPE efficacy The IOM committee determined that there is an urgent need to address the lack of preparedness regarding effective PPE for use in an influenza pandemic Preparing for an Influenza Pandemic Personal Protective Equipment for Healthcare Workers identifies that require expeditious research and policy action 1 Influenza transmission research should become an immediate and short term research priority so that effective prevention and control strategies can be developed and refined The current paucity of knowledge significantly hinders prevention efforts 2 Employer and employee commitment to worker safety and appropriate use of PPE should be strengthened Healthcare facilities should establish and promote a culture of safety 3 An integrated effort is needed to understand the PPE requirements of the worker and to develop and utilize innovative materials and technologies to create the next generation of PPE capable of meeting these needs

Medicine Science and Dreams David A. Schwartz, 2010-10-17 Physician scientists are unusual creatures While we are drawn to the clinical challenges of our patients we are also drawn to the opportunities that our patients medical problems bring to science This book contains the unique

experiences and encounters that drew 20 accomplished physician scientists to this profession These personal stories are those of people and circumstances that have had profound effects on our career decisions our creative opportunities and our lives These stories also serve to highlight the lessons learned along the way and the distinct attributes of these women and men of medicine and science Our combined hope is that our collective biographies will enhance the public understanding of our profession will move people from medicine to science and from science to medicine and will inspire those who are contemplating this extraordinary profession It is a rare gift to benefit from the collective wisdom of so many individuals at the same time These physician scientists have provided readers with helpful advice and thoughtful encouragement The interesting and thought provoking essays in *Medicine Science and Dreams* can be read and digested one at a time or all at once in sequence They provide lessons to be learned by any physician scientist whether just starting out or in the middle of a research career Schwartz has done readers a great service and has added to the legacy of these prominent and successful physician scientists Book review in JAMA September 7 2011 Vol 306 No 9 by Derek S Wheeler MD
