Hoffmeier,1988 **British Medical Journal** ,1871 *Defending Democracy in an Age of Sharp Power* William J. Dobson,Tarek Masoud,Christopher Walker,2023-07-25 Explores how authoritarian regimes are deploying sharp power to undermine democracies from within by weaponizing universities institutions media technology and entertainment industries The world's dictators are no longer content with shoring up control over their own populations they are now exploiting the openness of the free world to spread disinformation sow discord and suppress dissent In *Defending Democracy in an Age of Sharp Power* editors William J Dobson Tarek Masoud and Christopher Walker bring together leading analysts to explain how the world's authoritarians are attempting to erode the pillars of democratic societies and what we can do about it Popular media entertainment industries universities the tech world and even critical political institutions are being manipulated by dictators who advance their regimes interests by weakening democracies from within Autocrats use of sharp power constitutes one of the gravest threats to liberal representative government today The optimistic early twenty first century narrative of how globalization the spread of the internet and the rise of social media would lead to liberalization everywhere is now giving way to the realization that these same forces provide inroads to those wishing to snuff out democracy at the source And while autocrats can do much to wall their societies off from democratic and liberal influences free societies have not yet fully grasped how they can resist the threat of sharp power while preserving their fundamental openness and freedom Far from offering a counsel of despair the international contributors in this collection identify the considerable resources that

democracy provides for blunting sharp power's edge. With careful case studies of successful resistance efforts in such countries as Australia, the Czech Republic, and Taiwan, this book offers an urgent message for anyone concerned with the defense of democracy in the twenty-first century. Resident Duty Hours. Institute of Medicine, Committee on Optimizing Graduate Medical Trainee (Resident) Hours and Work Schedules to Improve Patient Safety, 2009-05-27. Medical residents in hospitals are often required to be on duty for long hours. In 2003, the organization overseeing graduate medical education adopted common program requirements to restrict resident workweeks, including limits to an average of 80 hours over 4 weeks and the longest consecutive period of work to 30 hours, in order to protect patients and residents from unsafe conditions resulting from excessive fatigue. *Resident Duty Hours* provides a timely examination of how those requirements were implemented and their impact on safety, education, and the training institutions. An in-depth review of the evidence on sleep and human performance indicated a need to increase opportunities for sleep during residency training to prevent acute and chronic sleep deprivation and minimize the risk of fatigue-related errors. In addition to recommending opportunities for on-duty sleep during long-duty periods and breaks for sleep of appropriate lengths between work periods, the committee also recommends enhancements of supervision, appropriate workload, and changes in the work environment to improve conditions for safety and learning. All residents, medical educators, those

involved with academic training institutions specialty societies professional groups and consumer patient safety organizations will find this book useful to advocate for an improved culture of safety **The Medical Times and Gazette** ,1867 Federal Funding Sources for Rural Areas M.
