

The background of the slide is a collage. At the top, there is a light blue calendar strip with days of the week like 'TUES', 'WED', 'THUR', and 'FRI' visible. Below the calendar, a large, semi-circular, light green pill is positioned in the center. To the right of this pill, several white, oblong pills are scattered. In the foreground, there are two large piles of pills: one on the left consisting of many green, oval-shaped pills, and one on the right consisting of many orange, oval-shaped pills. A single green pill is also visible on the orange pill pile.

Grenzen der Medizin Thomas Schübel, 2015-12-16

Thomas Schöbel untersucht die Gründe für die Erfolgsgeschichte des Lebensqualitäts-themas in der Medizin Diskursanalytisch rekonstruiert er Lebensqualität als Inszenierung von Rationalität angesichts medizinischer Entscheidungen die rational eigentlich gar nicht mehr getroffen werden können In der Folge lässt sich die Etablierung des Lebensqualitäts-themas in der Medizin als Immunisierungsstrategie einer um Deutungsmacht ringenden Disziplin interpretieren Der kritische Blick auf die Begründungsfiguren im medizinischen Lebensqualitätsdiskurs kann auch anderen Praxisfeldern vor Augen führen wie schwierig es ist Interventionshandeln mit Wissenschaft zu begründen

Authentizität - Modewort, Leitbild, Konzept

Ansgar Kreutzer, 2016-04-19 Authentizität ist ein schillerndes gleichzeitig aber sehr populäres Wort In Medien und Populärkultur wird authentisch sein als herausragendes Leitbild eines als gelungen definierten Lebens angesehen Im religiösen Feld gilt vielen allenfalls ein authentisch gelebter Glaube noch als glaubwürdig Soziologisch hängt die Hochkonjunktur des Begriffs damit zusammen dass die orientierende Kraft von Traditionen Gemeinschaften und Organisationen brüchig geworden ist sodass die Einzelnen auf der Suche nach Identität immer mehr auf sich selbst verwiesen sind Aus philosophischer sozial und kulturwissenschaftlicher Perspektive sowie in theologischen Aufnahmen untersuchen die Autorinnen und Autoren die Tragweite und die zeitdiagnostische Bedeutung des Begriffes Authentizität Die Schriften der Katholischen Privat Universität Linz widmen sich aktuellen Auseinandersetzungen mit gesellschaftlich relevanten Themen und präsentieren die philosophisch theologischen Forschungsaktivitäten an der KU Linz

Psychiatry Thomas Szasz, 2019-02-28 For more than half a century Thomas Szasz has devoted much of his career to a radical critique of psychiatry His latest work Psychiatry The Science of Lies is a culmination of his life's work to portray the integral role of deception in the history and practice of psychiatry Szasz argues that the diagnosis and treatment of mental illness stands in the same relationship to the diagnosis and treatment of bodily illness that the forgery of a painting does to the original masterpiece Art historians and the legal system seek to distinguish forgeries from originals Those concerned with medicine on the other hand physicians patients politicians health insurance providers and legal professionals take the opposite stance when faced with the challenge of distinguishing everyday problems in living from bodily diseases systematically authenticating nondiseases as diseases The boundary between disease and nondisease genuine and imitation truth and falsehood thus becomes arbitrary and uncertain There is neither glory nor profit in correctly demarcating what counts as medical illness and medical healing from what does not Individuals and families wishing to protect themselves from medically and politically authenticated charlatanism are left to their own intellectual and moral resources to make critical decisions about human dilemmas miscategorized as mental diseases and about medicalized responses misidentified as psychiatric treatments Delivering his sophisticated analysis in lucid prose and with a sharp wit Szasz continues to engage and challenge readers of all backgrounds

arrangements of Turkey's evolving health care and welfare system. In the transition from traditional itinerant circumcisers to low ranking health officers in the 1960s and hospital doctors in the 1990s the medicalization of male circumcision has become entangled with state formation, market fetishism and class inequalities. Based on Oyman Ba'aran's extensive ethnographic and historical research, *Circumcision and Medicine in Modern Turkey* is a close examination of the socioreligious practice of circumcision in twenty five cities and their outlying towns and villages in Turkey. By analyzing the changing subjectivity of medical actors who seek to alleviate suffering in male circumcision, Ba'aran offers a psychoanalytically informed alternate approach to the standard sociological arguments surrounding medicalization and male circumcision.

Poststructural and Narrative Thinking in Family Therapy Victoria Dickerson, 2016-04-25. This brief applies variations in poststructural thinking and practice to the field of family therapy. Poststructural thinking pervades the world of therapeutic practice in ways that are often invisible to both the theoretician as well as the practitioner. In this brief, the authors focus on what poststructuralism has brought to our understanding. What follows are chapters that speak to training and teaching principles as well as to practices that draw on ideas about becoming, relationality and the aesthetics of engagement. Each chapter builds on the other, with the last one reprising a key component of narrative understanding. From a teaching institution in Auckland, NZ to an online training program in Minneapolis, from new thinking about auto ethnography to a de centered practice to poetic resistance, the

chapters in this brief offer exciting ideas and practice possibilities

Restricting Freedoms Vladimir Shlapentokh, Eric Beasley, 2013-02-28 Today freedom is so closely associated with the United States that most people still view America as the ultimate symbol of freedom This is one reason why the desire to immigrate to the United States from almost anywhere in the world has not waned for more than a century Because of this image the idea that Americans are constrained by restrictive ordinances and rules seems contrary and therefore difficult for most citizens to accept Vladimir Shlapentokh and Eric Beasley argue that the idea of basing American society upon unadulterated freedom in all spheres of life is both unrealistic and simplistic The authors define freedom as the ability to choose one of many available alternatives They note that this concept of freedom sometimes leads to a paradox occasionally

freedoms are expanded through the creation of additional restrictions because the restrictions provide people with more alternatives Thus being free or restricted is not an all or nothing proposition but rather a question of degrees Many works discuss restrictions in relation to a particular area of life but none of them explore the magnitude of how limitations shape people s everyday lives Restricting Freedoms is unique in that the authors provide case studies that illustrate a wide variety of social contexts in relation to religious activity noise making and sexual activities among others This overview of the role of restrictions in American life will be of interest to all American readers A Traveler's Guide to the Afterlife Mark
