Medicare's Midlife Crisis Sue A. Blevins, 2001 Errata slip inserted Includes bibliographical references p 105 121 and index Healthy Competition Michael F. Cannon, Michael D. Tanner, 2007-10-10 Government control has driven health care costs sky high at the same time that it has reduced the quality of care As America's health care system cries out for reform should policymakers embrace even more government planning or should they fight for more individual freedom In this updated edition of their 2005 book the authors tackle proposals that would let government manage even more of America's health care sector The continuing problem of ever rising health care costs makes this book as timely as ever **A Republic No More** Jay Cost, 2016-07-12 After the Constitutional Convention Benjamin Franklin was asked Well Doctor what have we got a Republic or a Monarchy Franklin's response A Republic if you can keep it This book argues we couldn't keep it A true republic privileges the common interest above the special interests To do this our Constitution established an elaborate system of checks and balances that disperses power among the branches of government which it places in conflict with one another The Framers believed that this would keep grasping covetous factions from acquiring enough power to dominate government Instead only the people would rule Proper institutional design is essential to this system Each branch must manage responsibly the powers it is granted as well as rebuke the other branches when they go astray This is where subsequent generations have run into trouble we have overloaded our government with more power than it can handle The Constitution's checks and balances have broken down because the institutions created in 1787 cannot exercise responsibly the powers of our sprawling immense twenty first century government The result is the triumph of special interests over the common interest James Madison called this factionalism We know it as political corruption Corruption today is so widespread that our government is not really a republic but rather a special interest democracy Everybody may participate yes but the contours of public policy depend not so much on the common good as on the push and pull of the various interest groups encamped in Washington DC *Government's Greatest Achievements* Paul C. Light, 2010-12-01 In an era of promises to create smaller more limited government Americans often forget that the federal government has amassed an extraordinary record of successes over the past half century Despite seemingly insurmountable odds it helped rebuild Europe after World War II conquered polio and other life threatening diseases faced down communism attacked racial discrimination reduced poverty among the elderly and put men on the moon In *Government's Greatest Achievements* Paul C Light explores the federal government's most successful accomplishments over the previous five decades and anticipates the most significant challenges of the next half century While some successes have come through major legislation such as the 1965 Medicare Act or large scale efforts like the Apollo space program most have been achieved through collections of smaller often unheralded statutes Drawing on survey responses from 230 historians and 220 political scientists at colleges and universities nationwide Light ranks and summarizes the fifty greatest government achievements from 1944 to 1999 The achievements were ranked

based on difficulty importance and degree of success Through a series of twenty vignettes he paints a vivid picture of the most intense government efforts to improve the quality of life both at home and abroad from enhancing health care and workplace safety to expanding home ownership to improving education to protecting endangered species to strengthening the national defense The book also examines how Americans perceive government s greatest achievements and reveals what they consider to be its most significant failures America is now calling on the government to resolve another complex difficult problem the defeat of terrorism Light concludes by discussing this enormous task as well as government s other greatest priorities for the next fifty years

Blevins, George C. McClintock, 2001-11-25 Do you know the real facts about Medicare Even before Medicare was created in 1965 more than three out of four seniors were protected by a safety net for medical assistance financed by federal and state government revenues The average life expectancy for older Americans was on the rise long before Medicare began paying their health care bills Today Medicare's insurance coverage is so limited that it doesn't protect seniors against catastrophic medical costs It also fails to cover many routine health services outside the hospital such as prescription drugs dental care eye examinations and physical examinations Seniors now are paying nearly as large a share of their income for out of pocket health care costs as they were before Medicare But they cannot refuse Medicare's hospital coverage unless they forfeit all of their Social Security retirement benefits And the federal government effectively prohibits Medicare beneficiaries from paying physicians privately for Medicare covered services Most Americans and even most seniors know little or nothing about Medicare and the efforts being made to reform it Blevins examines the program's origins evolution and future policy options She recounts how Medicare was created as part of a larger plan for universal health insurance Blevins points out how Medicare costs grew far beyond the original estimates used to muster political support for the program She finds that Medicare restricts health care choices jeopardizes the doctor patient relationship and threatens to invade the medical privacy of seniors We won't regain control over our health care until we learn the lessons revealed through an examination of Medicare's history and consider the steps Blevins recommends for dealing with Medicare today **The Best American Science and Nature Writing 2020** Michio Kaku, Jaime Green, 2020 Presents an anthology of the best science and nature writing published in the previous year selected from American periodicals Big Choices Kenneth Stephen Apfel, Betty S.
