Language, Writing, and Mobility Florian Coulmas, 2022 This book brings together three subjects which command our attention because of their changing roles in everyday life language writing and mobility In different ways borders are being crossed redrawn and redefined as we watch and while comparable processes could be observed in the past they are today more conspicuous than ever being propelled by demographics technological innovation and consumer capitalism The said three subjects interact in various ways and have an impact on language contact which as this book is designed to show are best captured by a processual view along the lines laid out for social analysis by Norbert Elias The processual view of language and society adopted here is congenial with the sociolinguistic paradigm developed over the past several decades with one important difference it assigns writing a central position Sociolinguistics has always concentrated heavily on speech and largely ignored writing although the social importance of writing cannot be denied Giving written language its due in this book then has four reasons 1 Writing is the most consequential technology ever invented 2 Writing both suggests stability and defines borders 3 Linguistics while emphasizing that writing is external to language is nevertheless indebted for its analytic categories to writing 4 By turning virtually everyone into a writer producer of texts the digital revolution has fundamentally changed communication patterns in ways that impact both social formations and language Computer mediated communication CMC has transformed the social functions of writing and through it language Publisher **Trade and Empire in Early Nineteenth-century Southeast Asia** G. R. Knight, 2015 Discusses the complexities of a trading network in this period outlining commodity chains links between colonies and colonial centres and tensions between local polities and competing empires De Kampioen, 2003-07 De Kampioen is the magazine of The Royal Dutch Touring Club ANWB in The Netherlands It is published 10 times a year with a circulation of approximately 3.5 million copies **An Introduction to Multilingualism** Florian Coulmas, 2017-12-21 This book offers an introduction to the many facets of multilingualism in a changing world It begins with an overview of the multiplicity of human languages and their geographic distribution before moving on to the key question of what multilingualism actually is and what is understood by terms such as mother tongue native speaker and speech community In the chapters that follow Florian Coulmas systematically explores multilingualism with respect to the individual institutions cities nations and cyberspace In each of these domains the dynamics of language choice are undergoing changes as a result of economic political and cultural forces Against this background two chapters discuss the effects of linguistic diversity on the integration and separation of language and society before a final chapter

describes and assesses research methods for investigating multilingualism Each chapter concludes with problems and questions for discussion which place the topic in a real world context The book explores where when and why multilingualism came to be regarded as a problem and why it presents a serious challenge for linguistic theory today It provides the basic tools to analyse different kinds of multilingualism at both the individual and society level and will be of interest to students of linguistics sociology education and communication studies
