Mennema,A.J. Quene-Boterenbrood,C.L. Plate,2013-12-11 There is an element of fascination which many people feel about geographical maps because these maps allow fantasies about strange landscapes other peoples travels even adventures Distribution maps depicting the area which a plant or animal species occupies would appear to be less romantic but they are equally able to exercise our imagination or rather to stimulate our scientific curiosity Some distribution patterns are repeated time and time again although rarely fully identical and with their study comes the inescapable question what is it that determines a plant s area of distribution Almost immediately we find ourselves in the area of ecology for it is the plant s demands of its environment climate soil which determines where it will be able to grow and where not However that is not all there is to it for species as well as landscapes have their history and one needs to be informed about the climate and about the distribution of land and sea in the past for instance before one can understand present distributions This aspect of change in space and time historical plant geography is possibly the most fascinating part of plant geography However this atlas covering a minuscule part of the world is not meant to be primarily a book of historical plant geography It is true that a dynamic aspect is very prominent but this is on the smaller time scale of man made changes which mostly led to impoverishments **Kaleidoscoop der Nederlandse**

Op zoek naar de geschiedenis van het landschap Hans Renes, 2010 Oorspronkelijke natuur is in ons land zeer schaars. Eigenlijk bestaat heel Nederland uit cultuurlandschap: landschap dat door de mens grondig is aangepast aan de eigen behoeften. Daar zijn eeuwen overheen gegaan en in ons huidige landschap zijn sporen uit verschillende tijden bewaard gebleven. Soms zijn die eenvoudig te herkennen door een goede waarnemer zoals hooggelegen oude dorpskernen in het vlakke westen, een wiel naast een dijk, een terp, uitgestrekte heidevelden in Oost-Nederland, een jaagpad, een tiendweg, een oude es, een motte. Veel andere sporen zijn bijna onzichtbaar en vragen een geoefend oog. Deel 6 in de Zoekreeks geeft een beschrijving van de verschillende cultuurlandschappen en van hun voorgeschiedenis. Uitgebreid komt aan de orde welke bronnen en methodes er zijn om zelf op zoek te gaan naar de achtergronden van het historische landschap.
