Negotiating Minefields The Landmines Ban In American Politics:

Negotiating Minefields Leon V. Sigal, 2013-05-13 Against all odds the International Campaign to Ban Landmines helped to enact a global treaty banning antipersonnel mines in 1997 For that achievement it was awarded the Nobel Peace Prize In this volume Leon Sigal shows how a handful of NGOs with almost no mass base got more than 100 countries to outlaw a weapon that their armies had long used It is a story of intrigue and misperception of clashing norms and interests of contentious bureaucratic and domestic politics It is also a story of effective leadership of sustained commitment to a cause of alliances between campaigners and government officials of a US senator who championed the ban and of the skilful use of the news media Despite this monumental effort the campaign failed to get the United States to sign the treaty Drawing on extensive internal documents and interviews with US officials and ban campaigners Sigal tells the story of the in fighting inside the Clinton administration in the Pentagon and within the ban campaign itself that led to this major setback for an otherwise unprecedented successful global effort Negotiating Minefields will be of interest to students and scholars of military and strategic studies and politics and international relations

Arms Control Policy Marie Isabelle Chevrier, 2012-08-17 In this work an expert on biological weapons offers a thoughtful examination of the political and technical issues that have affected the implementation of arms control agreements from the 1960s to the present Arms Control Policy A Guide to the Issues examines the history of the major arms control treaties since the early 1960s It offers readers a broad understanding of the ways in which arms control agreements were negotiated and implemented during the Cold War the international and national events that

affected treaty negotiation and implementation and how the arms control landscape has changed in the war's aftermath. Specifically, the handbook overviews the obligations contained in bilateral U.S.-Soviet/Russian and multilateral arms control agreements covering nuclear and nonnuclear weapons. It also treats such agreements as the Biological Weapons Convention, the Chemical Weapons Convention, the Treaty to Ban Land Mines, and the Treaty to Ban Cluster Munitions. The book concludes with a look at the current challenges in the implementation of arms control agreements and the future of arms control.

The Turkey and the Eagle Caleb S. Rossiter, 2010 This book is about not just the effects but the making of U.S. foreign policy. It shows how advocates of basing U.S. relations on progress toward democracy struggle in Washington with advocates of support for repressive regimes in return for economic benefits such as trade, investment, and mineral resources and military benefits such as access to their territory for U.S. armed and covert forces. By arguing that the outcome of this struggle is determined by the average citizen's position, the book makes readers participants rather than observers. By arguing that a cultural pump constantly promotes a vision of American domination as a positive force in the world, it encourages readers to analyze the day-to-day effect of this vision on their own perceptions. Intended for a general audience, the book features enough inside tales and colorful characters to intrigue the casual reader but also provides the clear themes and historical context needed for a high school or college text on U.S. policy after World War II toward the colonized and then post-colonial countries.

The Wall Ramazan Aras, 2020-05-21 Through an anthropological analysis, this book uncovers life stories and testimonies that relate the processes of separation as a result of the constructed political borders of nation states newly founded on the inherited territories of the Ottoman Empire. As it recounts ruptured social, cultural, political, religious, and economic structures and autochthonous bonds, this work not only critically analyzes the making of the Turkish-Syrian border through an exploration of statist discourse, state practices, and the state's diverse apparatuses but further analyzes the unmaking border practices of local subjects in the light of local Kurdish people's counter-perceptions, discourses, family histories, narratives, and daily practices, each of which can be interpreted as a practice of local defiance, resilience, and adaptation in everyday life.

Humanitarian Disarmament Treasa Dunworth, 2020-08-06 The humanitarian framing of disarmament is not a novel development but rather represents a re-emergence of a much older and long-standing sensibility of humanitarianism in disarmament. The book rejects the big bang theory that presents the Anti Personnel Landmines Convention 1997 and its successors, the Convention on Cluster Munitions 2008 and the Treaty on the Prohibition of Nuclear Weapons 2017 as a paradigm shift from an older traditional state-centric approach towards a more progressive humanitarian approach. It shows how humanitarian disarmament has a long and complex history which includes these treaties. This book argues that the attempt to locate the birth of humanitarian disarmament in these treaties is part of the attempt to cleanse humanitarian disarmament of politics, presenting humanitarianism as a morally superior discourse in disarmament. However, humanitarianism carries its own blind spots and has its own hegemonic leanings. It may be silencing other potentially more transformative discourses.

Disarming States Kenneth R. Rutherford, 2010-12-07 This book provides a detailed history of the global movement to ban anti-personnel landmines (APL), marking the first case of a successful worldwide civil society movement to end the use of an entire category of weapons. In March 1995, Belgium became the first state to pass a domestic anti-personnel landmine ban. In December 1997, 122 states joined Belgium in signing the comprehensive Mine Ban Treaty, also known as the Ottawa Treaty. The movement to ban landmines became a turning point in global politics that continues to influence policy and strategy decisions regarding weapon use today. *Disarming States: The International Movement to Ban Landmines* describes how non-government organizations (NGOs) brought the landmine issue to international attention by forming the International Campaign to Ban Landmines (ICBL). The author presents new information gleaned from interviews and intensive research conducted around the world. The critical role of mid-size states such as Austria, Canada, and Switzerland, recruited to back the movement's goals, is examined. The book concludes by examining how NGOs affect the international political agenda, especially in seeking legal prohibitions on weapons and changes in states' behaviors.

The Logic of Humanitarian Arms Control and Disarmament Nik Hynek,Anzhelika Solovyeva,2020-11-10 This novel and original book examines and disaggregates theoretically and empirically operations of power in international security regimes These regimes varying in degree from regulatory to prohibitory are understood as sets of normative discourses political structures and dependencies anarchies hierarchies and heterarchies and agencies through which power operates within a given security issue area with a regulatory effect In International Relations regime analysis has been dominated by several generations of regime theory theorization As this book makes clear not only has the IR Regime Theory been of limited utility for security domain due to its heavy focus on economic and environmental regimes but it too heuristically suffered from its rigid pegging to general IR Theory It is not surprising then that the evolution of IR Regime Theory has largely been mirroring the evolution of IR Theory in general from the neo realist neo liberal institutionalist convergence regime theory through cognitivism to constructivist regime theory The commitment of this book is to remedy this situation by bringing together robust power analysis and international security regimes It provides the reader with a theoretically and empirically uncompromising and comprehensive analysis of the selected international security regimes which goes beyond one or another school of IR Regime Theory In doing so it completely abandons existing and piecemeal analysis of regimes within the intellectual field of IR based on conventional grand mid range theorization

Creating Consensus Mukherjee Geetanjali, 2014-10-02 This book analyses the events leading up to the cluster munitions ban the provisions of the treaty as well as assesses the progress made in the years since towards a world without the presence of cluster munitions Cluster bombs are weapons that are small but deadly They often look like small metal canisters and some of them are painted giving them the innocuous appearance of a soda can The unexploded submunitions that are scattered on the ground in effect act as landmines that can kill or severely injure anyone who comes across them sometimes even years and decades later It has been reported that 98% of all casualties of cluster munitions are civilians of which one third are children Cluster munitions have been used in numerous conflicts since the Second World War and it has been estimated that at least 1 billion submunitions were stockpiled globally For decades humanitarian organizations sought to limit the use of these weapons but international consensus on the issue was hard to come by The campaign to ban cluster munitions faced a monumental and nearly impossible task to convince governments to agree to stop using a valuable weapon in their arsenals that they stockpiled by the hundreds of thousands in a political climate where the interests of national security and state sovereignty outweighed humanitarian concerns in almost every instance However where many international agreements failed and diplomatic processes stalled the campaign to ban cluster munitions succeeded Despite strong opposition from many countries 107 countries met in Dublin in May 2008 to negotiate and adopt a treaty prohibiting the use production transfer and stockpiling of cluster munitions The outcome of the Oslo Process was a ray of hope among the usual cynicism and disenchantment of similar international processes This book explores this question how was this accomplished and are there any wider lessons to be learned from it *Power in a Complex Global System* Louis W. Pauly, Bruce W. Jentleson, 2014-05-09 Can twenty first century global challenges be met through the limited adaptation of existing political institutions and prevailing systemic norms or is a more fundamental reconstitution of governing authority unavoidable Are the stresses evident in domestic social compacts capable of undermining the fundamental policy capacity of contemporary governments This book inspired by the work of the distinguished scholar Peter J Katzenstein examines these important and pressing questions In a period of complex political transition the authors combine original research and

intensive dialogue to build on Katzenstein's innovative insights. They highlight his seminal work on variations in domestic structures on the role of ideologies of social partnership on the regionally differentiated foundations of political legitimation on diverse conceptions of civilization and on the idea and practice of power in a tenuous American imperium. Together the chapters map the complex terrain upon which legitimate political authority and effective policy capacity will have to be reconstituted to address twenty-first century global, regional, and state-level challenges. The book will be of great interest to students and scholars in international organization, global governance, foreign policy analysis, and comparative politics.

Social States Alastair Iain Johnston, 2014-06-12 Constructive engagement became a catchphrase under the Clinton administration for America's reinvigorated efforts to pull China firmly into the international community as a responsible player, one that abides by widely accepted norms. Skeptics questioned the effectiveness of this policy, and those that followed. But how is such socialization supposed to work in the first place? This has never been all that clear, whether practiced by the Association of South East Asian Nations (ASEAN), Japan, or the United States. *Social States* is the first book to systematically test the effects of socialization in international relations to help explain why players on the world stage may be moved to cooperate when doing so is not in their material power interests. Alastair Iain Johnston carries out his groundbreaking theoretical task through a richly detailed look at China's participation in international security institutions during two crucial decades of the rise of China from 1980 to 2000. Drawing on sociology and social psychology, this book examines three microprocesses of socialization: mimicking, social influence, and persuasion, as they have played out in the attitudes of Chinese diplomats active in the Conference on Disarmament, the Comprehensive Nuclear Test Ban, the Convention on Conventional Weapons, and the ASEAN Regional Forum. Among the key conclusions: Chinese officials in the post-Mao era adopted more cooperative and more self-constraining commitments to arms control and disarmament treaties thanks to their increasing social interactions in international security institutions. Casey-Maslen, 2024-01-04 Stuart Casey-Maslen's article by article commentary on the 1997 Anti-Personnel Mine Ban Convention (APMBC) addresses international law and state practice on anti-personnel mines in the first twenty-five years of the lifetime of this disarmament treaty. Publisher [Civil War Torpedoes and the Global Development of Landmine Warfare](#) Earl J. Hess, 2023-01-30 *Civil War Torpedoes and the Global Development of Landmine Warfare* recounts the use of landmines in the American Civil War from their predecessors before 1861 through their legacy in the post-Cold War era. A handful of Confederates pioneered the use of torpedoes as landmines were commonly called in the 1860s, burying them in front of fortifications along roads and as booby traps. Federal troops quickly learned how to deal with them, often using Confederate prisoners to dig them up. The first doctrine of landmine use in global history appeared during the Civil War. Hess discusses not only the technical and tactical aspects of the Civil War torpedo but the morality and doctrine that surrounded this weapon in ways that illuminate how modern landmines have shaped international conflicts to our own time. Through

intensive research in archival institutions published primary sources and technical literature Hess has created the definitive account of Civil War era landmine warfare within its global context *Identified, Tracked, and Profiled* Peter
