Teaching Problems and the Problems of Teaching

Magdalene Lampert,2001-01-01 In this book an experienced classroom teacher and noted researcher on teaching takes us into her fifth grade math class through the course of a year Magdalene Lampert shows how classroom dynamics the complex relationship of teacher student and content are critical in the process of bringing each student to a deeper understanding of mathematics or any other subject She offers valuable insights into students and teaching for all who are concerned about improving the learning that happens in the classroom Lampert considers the teacher s and students work from many different angles in views large and small She analyzes her own practice in a particular classroom student by student and moment by moment She also investigates the particular kind of teaching that aims at engaging elementary school students in learning fundamentally important ideas and skills by working on problems Finally she looks at the common problems of teaching that occur regardless of the individuals subject matter or kinds of practice involved Lampert arrives at an original model of teaching practice that casts new light on the complexity in teachers work and on the ways teachers can successfully deal with teaching problems
