Government Gazette ,1898 *Gender and Tourism Sustainability* Claudia Eger,Ana María Munar,Cathy H.C. Hsu,2023-03-21 This book examines the relationship between gender and sustainability in tourism Whilst an extensive body of work exists in the areas of gender and sustainability these two fields of knowledge are seldom combined to examine

tourism phenomena When we look at the evolution of tourism we see that sustainability has become an essential element in educational programmes policy making and strategic considerations for organisations and destinations Whilst the beginnings of tourism sustainability were challenging presently its relevance is seldom questioned However this situation is not the case with gender research Although gender theorising and research have existed for over a century and a rich legacy of knowledge exists on this topic meaningful and respectful engagement with this line of scholarship is thus far peripheral in tourism studies The aim of this book is to reflect on and rethink the intersection of gender and tourism sustainability through the lens of gender theory and feminist epistemology to stay with the trouble and devise pathways for sustainability gender knowledge This book will be of great interest to students researchers and academics in tourism gender and sustainability as well as tourism management The chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism

A Guide to the Literature on Semirings and their Applications in Mathematics and Information Sciences K. Glazek, 2013-06-29 This volume presents a short guide to the extensive literature concerning semirings along with a complete bibliography The literature has been created over many years in variety of languages by authors representing different schools of mathematics and working in various related fields In many instances the terminology used is not universal which further compounds the difficulty of locating pertinent sources even in this age of the Internet and electronic dissemination of research results So far there has been no single reference that could guide the interested scholar or student to the relevant publications This book is an attempt to fill this gap My interest in the theory of semirings began in the early sixties when together with Bogdan W. Glazek I tried to investigate some algebraic aspects of compactifications of topological spaces semirings of semicontinuous functions and the general ideal theory for special semirings Unfortunately local algebraists in Poland told me at that time that there was nothing interesting in investigating semiring theory because ring theory was still being developed However some time later we became aware of some similar investigations having already been done The theory of semirings has remained my first love ever since and I have been interested in the results in this field that have been appearing in literature even though I have not been active in this area myself
