National Library of Medicine Current Catalog National Library of Medicine (U.S.), **Neuroanatomy** Richard S. Snell,1992-01-01 *Speech and Language Disorders Associated with Subcortical Pathology* Bruce E. Murdoch,2009-03-25 This book provides comprehensive coverage of speech and language disorders arising from pathological processes involving the subcortical structures of the brain It gives an understanding of these disorders in terms of their neuropathological basis clinical symptomatology and prognosis A full discussion of contemporary models and theories of subcortical participation in speech and language processing is given including discussion of the possible roles of structures such as the basal ganglia subthalamic nucleus thalamus and cerebellum The book covers speech and language disorders associated with a variety of subcortical conditions ranging from major degenerative conditions such as Parkinsons Disease Huntington s chorea and dystonia through to acquired non degenerative subcortical lesions arising from for example cerebrovascular accidents and stereotactic surgically induced lesions In addition a full description of the relevant assessment and treatment procedures currently recommended for use for each of the subcortical communication disorders is given First Aid for the USMLE Step 1 ,1995 *First Aid for the USMLE Step 1* Vikas Bhushan,Chirag Amin,1998 Military Medicine ,1995 **First Aid for the Boards** Vikas Bhushan,1994 **British Journal of Neurosurgery** ,1993 *Geriatric Psychiatry Basics* Kenneth Sakauye,2008-04-17 Doctors who know something about working with the elderly are in greater demand than ever before This is also true in psychiatry where the number of geriatric psychiatry specialists falls far short of the need Because of this unbalance general psychiatrists many of whom have little or no training or experience in dealing with older adults and their specific issues are now being called upon to offer care to this population In this book Sakauye covers issues fundamental to the field of geriatric psychiatry that are not addressed well in general adult training Late life development Biology of aging Common medical illnesses associated with aging Neurobiology of degenerative disorders Geriatric psychopharmacology Psychotherapeutic modifications for special populations such as patients with cognitive impairment Multidisciplinary care and family involvement Specific studies of older adults as a special population differences While specialists will find it a useful resource for brushing up on fundamentals Geriatric Psychiatry Basics is the ideal handbook for non specialists who need a quick reference or primer on the issues central to geriatric care In it Sakauye a geriatric psychiatrist who worked closely with the elderly victims of Hurricane Katrina explores the most commonly encountered issues and problems from memory impairment Alzheimer s delirium dementia and cognitive disorders to depression psychosis anxiety substance abuse somatoform and sleep disorders Assessment diagnosis and treatment options including pharmacotherapy are addressed for each presenting problem and clinical pearls nuggets of critical information common pitfalls differentiation protocols between normal and abnormal behavior etc are clearly addressed The use of psychotherapeutic interventions for older adults as well

as psychiatric care in nursing homes and other inpatient facilities is also explained making this an immensely practical and user friendly handbook for all mental health professionals on how to deliver proper geriatric mental health services

The Nature of Consciousness Ned Block, Owen Flanagan, Guven Guzeldere, 1997-09-10 Intended for anyone attempting to find their way through the large and confusingly interwoven philosophical literature on consciousness this reader brings together most of the principal texts in philosophy and a small set of related key works in neuropsychology on consciousness through 1997 and includes some forthcoming articles Its extensive coverage strikes a balance between seminal works of the past few decades and the leading edge of philosophical research on consciousness As no other anthology currently does The Nature of Consciousness provides a substantial introduction to the field and imposes structure on a vast and complicated literature with sections covering stream of consciousness theoretical issues consciousness and representation the function of consciousness subjectivity and the explanatory gap the knowledge argument qualia and monitoring conceptions of consciousness Of the 49 contributions 18 are either new or have been adapted from a previous publication

Contributions of Behavior Analysis to Reading and Writing Comprehension Alessandra Rocha de Albuquerque, Raquel Maria de Melo, 2023-10-13 This book shows how behavior analysis can be applied to teaching reading and writing to primary school students and to special populations such as children with intellectual and hearing disabilities and illiterate adults Originally published in Portuguese this contributed volume is now translated into English and presents for the first time to international researchers and students a comprehensive overview of a research program developed for more than three decades in Brazil which gave birth to a unique teaching program based on the concept of stimulus equivalence the Learning to Read and Write in Small Steps The book is divided into four parts The first part presents the theoretical framework and the historical context in which the teaching program was developed by the group led by Drs Julio Cesar de Rose and Deisy das Gra as de Souza currently organized in the National Institute of Science and Technology on Behavior Cognition and Learning INCT ECCE The second part describes the modules that make up the Learning to Read and Write in Small Steps teaching program The third part presents results of empirical research conducted with children with intellectual and hearing disabilities and illiterate adults Finally the fourth part presents contributions from other areas of knowledge such as speech therapy linguistics and education to the understanding of reading and writing and possible dialogues between them and behavior analysis Contributions of Behavior Analysis to Reading and Writing Comprehension will be of interest to researchers and students in the fields of psychology and education interested in the application of behavior analysis to teaching and learning processes It will also be a valuable resource for professionals directly working in educational institutions such as elementary school teachers and psycho pedagogues The translation of the original manuscript in Portuguese was done with the help of artificial intelligence The present version has been revised technically and linguistically by the authors in collaboration with a professional translator

Neuroscience: Exploring the Brain Mark

Bear, Barry Connors, Michael A. Paradiso, 2025-07-11 An overview of Neuroscience covering complex topics in an accessible style enhanced by a strong art program and contributions by leading experts in the field designed to illuminate the relevance of the material to students Psychologie Richard J. Gerrig, Philip G. Zimbardo, 2008 Der Lehrbuch Klassiker bietet eine Gesamtdarstellung der wissenschaftlichen Psychologie *Clinical Neuroanatomy* John Mendoza, Anne Foundas, 2007-12-26 A major focus of clinical neuropsychology and cognitive behavioral neurology is the assessment and management of cognitive and behavioral changes that result from brain injury or disease In most instances the task of the neuropsychologist can be divided into one of two general categories Perhaps the most common is where patients are known to be suffering from identified neurological insults such as completed strokes neoplasms major head traumas or other disease processes and the clinician is asked to assess the impact of the resulting brain damage on behavior The second involves differential diagnosis in cases of questionable insults to the central nervous system Examples of the latter might be milder forms of head trauma anoxia and dementia or suspected vascular compromise In either instance understanding the underlying pathology and its consequences depends in large part on an analysis of cognitive and behavioral changes as well as obtaining a good personal and medical history The clinical investigation will typically include assessing problems or changes in personality social and environmental adaptations affect cognition perception as well as sensorimotor skills Regardless of whether one approaches these questions having prior independent confirmation of the pathology versus only a suspicion of pathology a fairly comprehensive knowledge of functional neuroanatomy is considered critical to this process Unfortunately as neuropsychologists we too frequently adopt a corticocentric view of neurological deficits We recognize changes in personality memory or problem solving capacity as suggestive of possible cerebral compromise **Psychoanalysis, the Self, and the World** Mark Leffert, 2022-12-09 This book takes psychoanalysis into the 21st century examining issues of existentialism postphenomenology social media and death and death anxiety that have gone largely ignored in the psychoanalytic and psychotherapeutic literature Using an interdisciplinary perspective Leffert explains that it is impossible to close the door of the consulting room The therapeutic relationship is invaded by the outside world and its relationships for both patient and therapist and cannot be isolated from these influences Drawing on richly detailed case studies Leffert demonstrates how the internet social media and the metaverse have changed and expanded the self in ways that could not have been imagined in the last century In turn Leffert acknowledges recent advances in the neurosciences and addresses the lack of engagement with their implications for theories and practices of therapeutic action Finally the ways in which death and death anxiety impinge on the self which have also gone mostly undealt with in psychoanalytic literature become an important focus of this book As a novel exploration of interdisciplinary connections this book will be of use to both scholars and practitioners of psychotherapy psychoanalysis social network theory philosophy and neuroscience *Integrated Neuroscience and Neurology* Elliott M. Marcus, Stanley Jacobson, Thomas D. Sabin, 2014 This online resource addresses the basic questions of

clinical neurology It reviews the makeup of the cells within the central nervous system and the development of the regions within the central nervous system followed by a detailed anatomical overview of the nervous system starting at the spinal cord proceeding to the brain stem diencephalon and cerebrum It focuses not only on localized diseases caused by infectious diseases trauma tumours and vascular lesions within the central nervous system but also these diseases within the systems of the brain and spinal cord

Wired for Love Stephanie Cacioppo, 2022-04-05 From the world's foremost neuroscientist of romantic love comes a personal story of connection and heartbreak that brings new understanding to an old truth better to have loved and lost than never to have loved at all At thirty seven Dr Stephanie Cacioppo was content to be single She was fulfilled by her work on the neuroscience of romantic love how finding and growing with a partner literally reshapes our brains That was until she met the foremost neuroscientist of loneliness A whirlwind romance led to marriage and to sharing an office at the University of Chicago After seven years of being inseparable at work and at home Stephanie lost her beloved husband John following his intense battle with cancer In *Wired for Love* Stephanie tells not just a science story but also a love story She shares revelatory insights into how and why we fall in love what makes love last and how we process love lost all grounded in cutting edge findings in brain chemistry and behavioral science Woven through it all is her moving personal story from astonishment to unbreakable bond to grief and healing Her experience and her work enrich each other creating a singular blend of science and lyricism that's essential reading for anyone looking for connection
