Die mittelniederländische Urkundensprache in Privaturkunden des 13. Und 14. Jahrhunderts Ute K. Boonen, 2009 Während des Mittelalters wird das Lateinische als traditionelle Urkundensprache allmählich von den Volkssprachen verdrängt Dieser Prozess der u.a mit der Entstehung des Bürgerertums und dem Erstarken der Städte zusammenhängt beginnt im Südwesten Europas und setzt sich mit zeitlicher Verzögerung in nördlicher und östlicher Richtung fort In den Niederlanden erfolgt die Ablösung des Lateins durch das Mittelniederländische während des 13 und 14 Jahrhunderts Der Prozess der Verschriftlichung des Mittelniederländischen und das Verhältnis von Latein und Volkssprache stehen seit einigen Jahren verstärkt im Interesse der Forschung Diese Studie untersucht wie Skribenten bei der Umsetzung der lateinischen Formeln ins Niederländische vorgehen Wird das Lateinische wörtlich übersetzt Entwickelt sich eine eigene mittelniederländische Fachsprache Die Untersuchung von rund 2000 Urkunden zeigt dass die Skribenten bestimmte Formeln als Vorlage auswählten und sich bei der Übertragung ins Mittelniederländische langsam von den Vorlagen emanzipieren Trotz des stereotypen Sprachgebrauchs in den Urkunden lassen sich lexikalische und syntaktische Unterschiede feststellen die durch die regional unterschiedliche Ausprägung der mittelniederländischen Schreibsprache bedingt sind During the middle ages Latin gets ousted as the traditional language of record by the vernacular languages in Europe This process which comes together with the rise of the commonalty and the growing influence of the cities begins in the Southwest of Europe and proceeds northwards and eastwards In the Low Countries Latin gets replaced by Middle Dutch during the thirteenth and fourteenth centuries In recent years researchers have focused on the introduction of Middle Dutch as a documentary language and the relationship between Latin and the vernacular This study analyses how scribes transfer Latin formulas into Dutch ones Are the Latin formulas translated word by word Is a vernacular documentary language developing The examination of about 2000 mediaeval charters shows that the scribes select some formulas as a model for their translation and finally emancipate from the Latin model Although stereotypical language use is common for charters there are lexical and syntactical differences that are caused by the peculiarities of the different regional written languages

Die starken Verben im Deutschen und Niederländischen Ute Hempen, 2010-09-15 Die Buchreihe Linguistische

Arbeiten hat mit über 500 Beiträgen zur linguistischen Theoriebildung der letzten Jahrzehnte in Deutschland und international wesentlich beigetragen. Die Reihe wird auch weiterhin neue Impulse für die Forschung setzen und die zentrale Einsicht der Sprachwissenschaft präsentieren: dass Fortschritt in der Erforschung der menschlichen Sprachen nur durch die enge Verbindung von empirischen und theoretischen Analysen sowohl diachron wie synchron möglich ist. Daher laden wir hochwertige linguistische Arbeiten aus allen zentralen Teilgebieten der allgemeinen und einzelsprachlichen Linguistik ein, die aktuelle Fragestellungen bearbeiten, neue Daten diskutieren und die Theorieentwicklung vorantreiben.

Morphologie G. E. Booij, Christian Lehmann, Joachim Mugdan, 2000 This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction. For classic linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation. To attain these objectives the series will aim for a standard comparable to that of the leading handbooks in other disciplines and to this end will strive for comprehensiveness, theoretical explicitness, reliable documentation of data and findings and up to date methodology. The editors both of the series and of the individual volumes and the individual contributors are committed to this aim. The languages of publication are

English German and French The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks however no inflexible pre set limits will be imposed on the scope of each volume The series is open ended and can thus take account of further developments in the field This conception coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care means that there is no set time table for the publication of the whole series Each volume will be a self contained work complete in itself The order in which the handbooks are published does not imply any rank ordering but is determined by the way in which the series is organized the editor of the whole series enlist a competent editor for each individual volume Once the principal editor for a volume has been found he or she then has a completely free hand in the choice of co editors and contributors The editors plan each volume independently of the others being governed only by general formal principles The series editor only intervene where questions of delineation between individual volumes are concerned It is felt that this modus operandi is best suited to achieving the objectives of the series namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume **Das Tagebuch / The Diary / Le Journal** Simone Schroth, **The Morphology of Dutch** Geert

Booij, 2019-04-17 This volume provides a detailed and comprehensive description of the morphological system of Dutch Following an introduction to the basic assumptions of morphological theory separate chapters are devoted to the inflectional system derivation and compounding the interface between morphology and phonology the interaction between morphology and syntax and new to this edition a more detailed study of the features of separable complex verbs Geert Booij demonstrates in this book that the morphology of Dutch poses multiple interesting descriptive and theoretical challenges The volume also contributes to ongoing discussions on the nature and representation of morphological processes the role of paradigmatic relations between words and between words and phrases and the interaction between morphology phonology and syntax This second fully revised edition has been updated throughout with expanded coverage of Dutch morphological phenomena and results from new research Alongside a brand new chapter on separable complex verbs it also includes a more sophisticated analysis of the relation between morphology and syntax and an introduction to the basic tenets of Construction Morphology

Corver, 2019-02-05 14% discount on a subscription to the complete series please contact us via orders aup nl The Syntax of Dutch aims at presenting a synthesis of the currently available syntactic knowledge of Dutch It is primarily concerned with language description and not with linguistic theory and provides support to all researchers interested in matters relating to the syntax of Dutch including advanced students of language and linguistics Syntax of Dutch Verbs and Verb Phrases consists of three volumes Volume 1 opens with a general introduction to verbs including a review of various verb classifications and

discussions on inflection tense mood modality and aspect This is followed by a comprehensive discussion of complementation argument structure and verb frame alternations Volume 2 continues the discussion of complementation but is more specifically focused on clausal complements the reader will find detailed discussions of finite and infinitival argument clauses complex verb constructions and verb clustering Volume 3 concludes with a description of adverbial modification and the overall structure of clauses in relation to e g word order verb placement wh movement extraposition phenomena scrambling etc

The Syntax of Dutch Jan-Wouter Zwart, 2011-09-15 Dutch is a West Germanic language closely related to English and German but its special properties have long aroused interest and debate among students of syntax This is an informative guide to the syntax of Dutch offering an extensive survey of both the phenomena of Dutch syntax and their theoretical analyses over the years In particular the book discusses those aspects of Dutch syntax that have played an important role in the development of syntactic theory in recent decades Presupposing only a basic knowledge of syntax and complete with an extensive bibliography this survey will be an important tool for students and linguists of all theoretical persuasions and for anyone working in Germanic linguistics linguistic typology and linguistic theory

Computational Linguistics in the Netherlands 1998 F. van Eynde, Ineke Schuurman, Ness Schelkens, 2000 This volume provides a selection of the papers which were presented at the ninth conference on Computational Linguistics in the Netherlands Leuven 1998 It gives an accurate and up to date picture of the lively scene of computational linguistics in the Netherlands and Flanders In terms of topics the contributions can be grouped under three headings the use of statistical methods in speech and language processing 6 papers the analysis of syntactic and semantic phenomena in the framework of computationally oriented formalisms such as Head driven Phrase Structure Grammar 5 papers and the development of NLP applications such as document processing dialogue modelling and teaching 3 papers The volume covers the whole range from theoretical to applied research and development and is hence of interest to both academia and industry The target audience consists of advanced students and scholars of computational linguistics and speech and language processing Linguistics Computer Science Electrical Engineering
