Negotiating Spain and Catalonia Fernando León-Solís,2003-01-01 This book is a narrative study of four main discourses of national identity in Spain with a special focus on Catalonia as disseminated in the Spanish press in the period between 1993 1996 The narrative analysis of the discourses of national identity is contained within two sections The first deals with Spanish press coverage of the 1994 USA Football World Cup The second section studies the process of negotiation towards a political pact between Partido Popular and Convergencia I Uni after the 1996 general election This study is not confined to the identification and description of discursive elements intended to shape identities but deals heavily with the symbolic struggle between different ideological agents The narrative approach and systematic application to two particular and very concrete cases makes this work unique in its field This book would be useful as a reference text for courses not only on Contemporary Spain but also on the wider field of Cultural Studies and Media Studies However the issues dealt with and the style in which it is written make it of interest to a wider and not necessarily academic audience

The Reinvention of Spain Sebastian Balfour, Alejandro Quiroga, 2007-10-25

Unravelling the debate about the Spanish nation and its identity in the new democracy this book looks at the issue as both a historical debate and a contemporary political problem particularly complex due to the legacy of the Francoist Dictatorship which deeply eroded the legitimacy of Spanish nationalism During and since the transition Spanish nationalist discourse has evolved to meet the challenge of new concepts of nation and identity These formulations argue very different configurations of the relationship between nation and state While the Constitution of 1978 defines Spain as a nation of nationalities many politicians and intellectuals now claim that Spain is a nation of nations others that it is a nation of nations and regions or a post traditional nation state or post national state For the peripheral nationalists it is merely a state of nations and regions What is at issue is not whether Spain exists or not as a nation rather it is the traditional ways of seeing Spain from both the centre and the periphery that are being challenged The Reinvention of Spain

examines the ways in which Spanish and regional identities are projected and how influence the external actions of the Spanish state It also analyses the dynamic of comparative grievance and competition between regions deriving from the peculiar architecture of the state in Spain and their effect on social and political cohesion Finally it examines scenarios of change that might foster solutions but asserts that Spain will continue to reinvent itself

Metaphors of Spain Javier Moreno-Luzón, Xosé M. Núñez Seixas, 2017-02-01 The history of twentieth century Spanish nationalism is a complex one placing a set of famously distinctive regional identities against a backdrop of religious conflict separatist tensions and the autocratic rule of Francisco Franco And despite the undeniably political character of that story cultural history can also provide essential insights into the subject Metaphors of Spain brings together leading historians to examine Spanish nationalism through its diverse and complementary cultural artifacts from formal representations such as the flag to music bullfighting and other more diffuse examples Together they describe not a Spanish national essence but a nationalism that is constantly evolving and accommodates multiple interpretations

Nationalism in Contemporary Europe Andrzej Marcin Suszycki, 2021 This book proposes a conceptualisation of nationalism with a multilevel operational character It offers three different perspectives on nationalism that consider both the discursive structure and the discursive agency of nationalism It also demonstrates a number of intra phenomenal and extra phenomenal constraints on nationalism This book underlines that nationalism in contemporary Europe should not be regarded in terms of methodological homogeneity and conceptual uniformity ideological rigidity or strategic consistency but rather as a contested segmented bounded and contextual phenomenon

Samuel Llano, 2013 In this book Llano analyzes the socio political discourses underpinning critical and musicological descriptions of Spanish music at the beginning of the nineteenth century and the discourse's connection with French politics and culture of the era Llano studies operas and other musical works for the stage as privileged sites for the production of Spanish musical identities and ultimately demonstrates that definitions of French and Spanish music during this period were to some extent interdependent
