Nelson Textbook of Pediatrics E-Book Robert Kliegman, Bonita F. Stanton, Joseph W. St. Geme III, Nina F. Schor, Richard E. Behrman, 2011-06-10 Nelson Textbook of Pediatrics has been the world's most trusted pediatrics resource for nearly 75 years. Drs. Robert Kliegman, Bonita Stanton, Richard Behrman, and two new editors, Drs. Joseph St. Geme and Nina Schor, continue to provide the most authoritative coverage of the best approaches to care. This streamlined new edition covers the latest on genetics, neurology, infectious disease, melamine poisoning, sexual identity, and adolescent homosexuality, psychosis associated with epilepsy, and more. Understand the principles of therapy and which drugs and dosages to prescribe for every disease. Locate key content easily and identify clinical conditions quickly thanks to a full color design and full color photographs. Access the fully searchable text online at www.expertconsult.com along with abundant case studies, new references, and journal articles. Clinics articles and exclusive web-only content. Stay current on recent developments and hot topics such as melamine poisoning, long-term mechanical ventilation in the acutely ill child, sexual identity, and adolescent homosexuality, age-specific behavior disturbances, and psychosis associated with epilepsy. Tap into substantially enhanced content with world-leading clinical and research expertise from two new editors, Joseph St. Geme III MD and Nina Schor MD, who contribute on the key subspecialties including pediatric infectious disease and pediatric neurology. Manage the transition to adult healthcare for children with chronic diseases through discussions of the overall health needs of patients with congenital heart defects, diabetes, and cystic fibrosis. Recognize, diagnose, and manage genetic conditions more effectively using an expanded section that covers these diseases, disorders, and syndromes extensively. Find information on chronic and common dermatologic problems more easily with a more intuitive reorganization of the section.

context **The 'Resource' Approach to Mathematics Education** Luc Trouche, Ghislaine Gueudet, Birgit Pepin, 2019-11-29 This edited volume will help educators better analyze methodological and practical tools designed to aid classroom instruction. It features papers that explore the need to create a system in order to fully meet the uncertainties and developments of modern educational phenomena. These have emerged due to the abundance of digital resources and new forms of collective work. The collected papers offer new perspectives to a rising field of research known as the Documentational Approach to Didactics. This framework was first created by the editors of this book. It seeks to develop a deeper understanding of mathematics teaching expertise. Readers will gain insight into how to meet the theoretical questions brought about by digitalization. These include how to analyze teachers' work when they prepare for their teaching, how to conceptualize the relationships between individual and collective work, and how to follow the related processes over the long term. The contributors also provide a comparative view in terms of contrasting selected phenomena across different educational cultures and education systems. For instance, they consider how differences in curriculum resources are available to teachers and how teachers make use of them to shape instruction. Coverage also considers the extent to which teachers make use of additional material, particularly those available through the global marketplace on the Internet. This book builds on works from the Resources 2018 Conference Understanding teachers' work through their interactions with resources for teaching, held in Lyon, France.

American Universities and Colleges Praeger Publishers, 2010-04-16 For well over a half century *American Universities and Colleges* has been the most comprehensive and highly respected directory of four-year institutions of higher education in the United States. A two-volume set that *Choice* magazine hailed as a most important resource in its November 2006 issue, this revised edition features the most up-to-date statistical data available to guide students in making a smart yet practical decision in choosing the university or college of their dreams. In addition, the set serves as an indispensable reference source for parents, college advisors, educators, and public academic and high school librarians. These two volumes provide extensive information on 1,900 institutions of higher education, including all accredited colleges and universities that offer at least the baccalaureate degree. This essential resource offers pertinent statistical data on such topics as tuition, room and board, admission requirements, financial aid, enrollments, student life, library holdings, accelerated and study abroad programs, departments, and teaching staff, buildings and grounds, and degrees conferred. Volume two of the set provides four indexes, including an institutional Index, a subject accreditation index, a levels of degrees offered index, and a tabular index of summary data by state. These helpful indexes allow readers to find information easily and to make comparisons among institutions effectively. Also contained within the text are charts and tables that provide easy access to comparative data on relevant topics.

The Energetic Line in Figure Drawing Alon Bement, 2009-04-23 Well-crafted and class-tested, this guide to figure drawing features a unique teaching method. It focuses on learning to draw complete figures prior to the study of individual components, and it stresses action figures rather than the customary static

examples favored by most drawing and anatomy texts Employing more text than typical art instruction books it presents thirty figure drawing lessons and fifty six drawings and figures Each lesson includes detailed instructions on anatomical drawing accompanied by visual examples of strokes boxes and measurements Author Alon Bement taught art instruction to future art teachers at Columbia University and later founded the prestigious Maryland Institute of Art His students included Georgia O Keeffe who regarded him as a mentor and major influence Bement s nontraditional approach offers students at all levels an excellent opportunity to build their visual acuity and technical skills

Parenting Out of Control Margaret K. Nelson, 2012-03 They go by many names helicopter parents hovercrafts PFHs Parents from Hell Drawing on a wealth of eye opening interviews with parents across the country Margaret K Nelson cuts through the stereotypes and hyperbole to examine the realities of what she terms parenting out of control Situating this phenomenon within a broad sociological context she finds several striking explanations for why today s prosperous and well educated parents are unable to set realistic boundaries when it comes to raising their children Analyzing the goals and aspirations parents have for their children as well as the strategies and technologies they use to reach them Nelson discovers fundamental differences among American parenting styles that expose class fault lines both within the elite and between the elite and the middle and working classes Today s parents are faced with unprecedented opportunities and dangers for their children and are evolving novel strategies to adapt to these changes this lucid and insightful work provides an authoritative examination of what happens when these new strategies go too far
