## ACTIVITY

1

### Applying Laws of Chance to Genetics

#### What you need

(Materials Needed Per Group)

2 Coins, plastic

1 Cup

In addition to chance, geneticists use a diagram called a "Punnet Square", named for its inventor, Reginald Punnet, to predict possible ways genes can combine during fertilization. A simple monohybrid cross - a cross that provides data about one trait - is the simplest form of a Punnet Square.

During gametogenesis, each chromosome of a pair separates and goes to one of the two gametes produced. The two alleles for a trait separate as the chromosomes on which they are located separate. During fertilization, new pairs of chromosomes and alleles are created.

In Activity 1, you will compare the expected results of a monohybrid cross - obtained by completing a Punnet square - to the actual results of a monohybrid cross obtained by tossing coins. One coin represents the two

A Christian Student'S Guide to Truth in Science Stanley J. O'Briant, 2015-03-13 This book exposes the attempt to teach atheistic evolution to students often ridiculing their faith in God The classrooms in our schools have become the battlegrounds for the minds of our children Since the introduction of evolution by Charles Darwin there has been a growing list of atheist professors who vigorously fight any religion The classrooms of America should not be the battlegrounds of any religion but evolution is a religion It has no place in the classroom since it does not offer any information that improves the teaching of any science class except evolution itself There is no proof of evolution only assertions innuendos credulity belief without proof and suppositions Fully one third of all geology textbooks deal with evolution which is founded only opinion and undocumented assertions Therefore it should be removed from all textbooks Dr David Menton who taught medicine at the Washington School of Medicine in St Louis Missouri for twenty five years stated that he never once needed to reference evolution in any medical class A coalition of organizations such as the National Academy of Sciences whose members are 93% atheist or agnostic and the National Center for Science and Education control most of the government grants intended for schools use fully support the atheism of evolution and they attack any criticism of evolution **Project Earth Science** Alfredo L. Aretxabaleta, Gregg R. Brooks, Nancy W. West, 2011 How well can your students Explain why ice floats Model ocean currents Predict tides Describe the proper clean up of an oil spill Project Earth Science Physical Oceanography Revised 2nd Edition immerses students in activities that focus on water the substance that covers nearly three quarters of Earth s surface Eighteen ready to use teacher tested classroom activities and supplemental readings offer explorations and straightforward explanations to foster intuitive understanding of key science concepts Students cover topics such as the structure of water molecules saltwater and fres *The Present and Future of Immunology Education* Andrea Bottaro, Deborah M. Brown, John Gregory Frelinger, 2022-01-24 The explosion of basic and applied immunology in the first decades of the 21st century has brought forth new opportunities and challenges for immunology education at all academic levels from professional to undergraduate medical graduate and post graduate instruction Moreover developing methods and techniques for educating general audiences on the importance and benefits of immunology will be critical for increasing public awareness and support One major immediate challenge consists in accommodating within the confines of traditional immunology curricula a body of knowledge that continues to grow exponentially in both size and complexity Furthermore the practical toolbox of immunological research has vastly expanded and even in the present environment of highly interdisciplinary and collaborative science future immunologists will likely need to be at least conversant in for instance computational structural and system biology nanotechnology and tissue engineering At the same time our perspective of the immune system has progressively developed from primarily a host defense mechanism to a fundamental homeostatic system with organism wide physiological and clinical significance and with potentially transformative biotechnological and

therapeutic applications As a consequence in addition to stand alone courses immunology is increasingly integrated into other courses or distributed longitudinally throughout a multi year curriculum This necessitates inter disciplinary approaches to reach an expanding range of disciplines as diverse as neurobiology cancer biology oncology infectious diseases pharmacology orthopedics and bioengineering Creative approaches and pedagogical flexibility will be needed to avoid the pitfall of one size fits all instruction and to tailor level and discipline appropriate content to different types of students using multiple teaching formats Finally like most other disciplines immunology education is also under strong pressure to introduce new didactic strategies that are relevant and meaningful to a generation of students who are digital natives comfortable with and expect on demand and multi modal learning diversified sources and active engagement Thankfully the dynamic and interactive behavior of immune system cells now visualized with striking immediacy by in vivo imaging has the ability to capture and hold the interest of even the most jaded learner The need for an increasingly immunology knowledgeable workforce not just academic and industry scientists but also clinical and research lab technicians biomedical engineers and physicians in a growing array of specialties will also expand job opportunities for immunologists as educators and for content creators dedicated to generating new didactic tools in this field Acknowledgement We acknowledge the initiation and support of this Research Topic by the International Union of Immunological Societies IUIS Science Teacher Retention: Mentoring and Renewal Jack Rhoton, Patricia Bowers, 2003-06
