Neon Metropolis How Las Vegas Started The Twenty First Century:

Neon Metropolis Hal Rothman, 2002 First Published in 2003 Routledge is an imprint of Taylor Francis an informal company *Tucumcari Tonite!* David H. Stratton, 2022-04-01 Tucumcari New Mexico was founded in 1901 by the Rock Island Railroad and soon had major railroad lines converging there from Chicago Los Angeles and Memphis as well as a northern branch line from the Dawson coalfields The federal highway system established Route 66 the Main Street of America through the middle of town in 1926 Tucumcari flourished as a tourist mecca welcoming travelers with its blazing displays of neon lights But mergers reorganizations and financial problems of the railroads as well as the creation of the interstate highway system that bypassed small places brought a sharp decline to the once prosperous town Tucumcari Tonite blends in depth research and personal and family experiences to re create a memoir of Tucumcari Drawing on newspapers and government documents as well as business records personal interviews and archival holdings Stratton weaves a poignant tale of a western town s rise and decline providing a prime example of the destructive forces that have been inflicted on small towns in the West and all across America *A Companion to the American West* William Devereaux, 2008-04-15 A Companion to the American West is a rigorous illuminating introduction to the history of the American West Twenty five essays by expert scholars synthesize the best and most provocative work in the field and provide a comprehensive overview of themes and historiography Covers the culture politics and environment of the American West through periods of migration settlement and modernization Discusses Native Americans and their conflicts and integration with American settlers **American Architectural History** Keith Eggner, 2004-07-31 Offering some 30 essays this volume concentrates on recent writings by historians of American architecture urbanism The essays are arranged chronologically from colonial to contemporary accessible in thematic groupings **The 1970s** Thomas Borstelmann, 2012 A compelling framework for understanding the importance of the 1970s for America and the world The 1970s looks at an iconic decade when the cultural left and economic right came to the fore in American society and the world at large While many have seen the 1970s as simply a period of failures epitomized by Watergate inflation the oil crisis global unrest and disillusionment with military efforts in Vietnam Thomas Borstelmann creates a new framework for understanding the period and its legacy He demonstrates how the 1970s increased social inclusiveness and at the same time encouraged commitments to the free market and wariness of government As a result American culture and much of the rest of the world became more and less equal Borstelmann explores how the 1970s forged the contours of contemporary America Military political and economic crises undercut citizens confidence in government Free market enthusiasm led to lower taxes a volunteer army individual 401 k retirement plans free agency in sports deregulated airlines and expansions in gambling and pornography At the same time the movement for civil rights grew promoting changes for women gays immigrants and the disabled And developments were not limited to the United States Many countries gave up colonial and racial hierarchies to develop a new formal commitment to human rights while economic

deregulation spread to other parts of the world from Chile and the United Kingdom to China Placing a tempestuous political culture within a global perspective The 1970s shows that the decade wrought irrevocable transformations upon American society and the broader world that continue to resonate today

Dreams + Disillusions CJ Lim, Luke Angers, 2024-04-25 Dreams Disillusions explores the plethora of ideas and ideologies that have shaped and reshaped cities in profound ways However unlike a conventional title on the history of urbanism and architecture its research fluctuates between the world of concrete reality and the multiple universes that exist in lucid prose poetic visions and the outrageous imaginations of history's greatest and most in famous minds In their thoughts are the foundations for political trends and new civilisations alternative mappings and unlikely phenomena The six chapters reveal dreams that were fundamental to the origin of great cities underpinning the stories of the many lives within and how through circumstance or manipulation fortunate coincidence or planned perfection desires are sometimes left defeated and disillusioned Myth and belief Tradition and logic Revolution and marginalisation Ignorance and hubris Sins and excess Seasons and climate Continuously interacting shifting to enlighten and to enrage these themes combine critical thinking with deep rooted influences and new agencies that are a true sign of the times The 18 illustrated speculations provide an abundance of curious imaginings diverse provocations and satirical criticism While there are distinctions between dreams and disillusionments could virtues be made of sins or sensitivity be borne from hubris Could progress advocate tradition or should we re attempt revolutions formerly experienced as disillusionments Whether by bold gestures or by subtle attrition cities are continually re written crucibles for the human condition In this book we develop a better understanding of the discourse of cities tailored to the determining factors of climate resources and humanity's idiosyncrasies to address a world in crisis **Death Valley National Park** Hal Rothman, Char Miller, 2013-09-03 The first comprehensive study of the park

past and present Death Valley National Park probes the environmental and human history of this most astonishing desert. Established as a national monument in 1933, Death Valley was an anomaly within the national park system. Though many who knew this landscape were convinced that its stark beauty should be preserved, to do so required a reconceptualization of what a park consists of, grassroots and national support for its creation, and a long and difficult political struggle to secure congressional sanction. This history begins with a discussion of the physical setting, its geography and geology, and descriptions of the Timbisha, the first peoples to inhabit this tough and dangerous landscape. In the 19th century and early 20th century, new arrivals came to exploit the mineral resources in the region and develop permanent agricultural and resort settlements. Although Death Valley was established as a National Monument in 1933, fear of the harsh desert precluded widespread acceptance by both the visiting public and its own administrative agency. As a result, Death Valley lacked both support and resources. This volume details the many debates over the park's size, conflicts between miners, farmers, the military, and wilderness advocates, the treatment of the Timbisha, and the impact of tourists on its cultural and natural resources. In time, Death Valley came to be seen as one of the great natural wonders of the United States and was elevated to full national park status in 1994. The history of Death Valley National Park embodies the many tensions confronting American environmentalism.

Senator Howard Cannon of Nevada Michael Verneti, 2015-11-15 Howard Cannon 1912-2002

represented Nevada in the U.S. Senate from 1958 until 1982 and acquired a reputation as one of its most productive and influential members. Because he was a modest man more comfortable with hard work than self-aggrandizement, he was also one of its most underappreciated. Nonetheless, Cannon influenced many major changes in American politics and policies during his time in office. Born to a devout Mormon family in a small farming community in southwest Utah, Cannon served in the Army Air Force during World War II and emerged from the war as a hero. Soon he was part of the postwar migration of ambitious, adventurous Americans to the booming desert city of Las Vegas, where he practiced law and entered local politics. In 1958, he was elected to the U.S. Senate and joined a group of influential young Democratic senators who were to play a major role in shaping the country's future. His service on the Aeronautical and Space Sciences Committee and the Armed Services Committee led to major changes in the air travel industry, including deregulation and to increased support for national military preparedness.

A History of Occupational Health and Safety Michelle Follette Turk, 2018-05-15

The United States has a long and unfortunate history of exposing employees, the public, and the environment to dangerous work. But in April 2009, the spotlight was on Las Vegas when the Pulitzer committee awarded its public service prize to the Las Vegas Sun for its coverage of the high fatalities on Las Vegas Strip construction sites. The newspaper attributed failures in safety policy to the recent exponential growth in the Las Vegas market. In fact, since Las Vegas's founding in 1905, rapid development has always strained occupational health and safety standards. *A History of Occupational Health and Safety* examines the work hazards and health and safety programs from the early building of the railroad through the construction

of the Hoover Dam chemical manufacturing during World War II nuclear testing and dense megaresort construction on the Las Vegas Strip In doing so this comprehensive chronicle reveals the long and unfortunate history of exposing workers residents tourists and the environment to dangerous work all while exposing the present and future to crises in the region Complex interactions and beliefs among the actors involved are emphasized as well as how the medical community interpreted and responded to the risks posed Few places in the United States contain this mixture of industrial and postindustrial sites the Las Vegas area offers unique opportunities to evaluate American occupational health during the twentieth century and reminds us all about the relevancy of protecting our workers
