

Basic Cells of the Nervous System

Neuron

- Basic functional cell of nervous system
- Transmits impulses (up to 250 mph)

Parts of a Neuron

- **Dendrite** – receive stimulus and carries it impulses toward the cell body
- **Cell Body** with nucleus – nucleus & most of cytoplasm
- **Axon** – fiber which carries impulses away from cell body
- **Schwann Cells**- cells which produce myelin or fat layer in the Peripheral Nervous System
- **Myelin sheath** – dense lipid layer which insulates the axon – makes the axon look gray
- **Node of Ranvier** – gaps or nodes in the myelin sheath
- Impulses travel **from dendrite to cell body to axon**

Three types of Neurons

- **Sensory neurons** – bring messages to CNS
- **Motor neurons** - carry messages from CNS
- **Interneurons** – between sensory & motor neurons in the CNS

Impulses

- A **stimulus** is a change in the environment with sufficient strength to initiate a response.
- **Excitability** is the ability of a neuron to respond to the stimulus and convert it into a nerve impulse
- **All of Nothing Rule** – The stimulus is either strong enough to start and impulse or nothing happens
- Impulses are always the **same strength along a given neuron** and they are **self-propagation** – once it starts it continues to the end of the neuron in only one direction- **from dendrite to cell body to axon**
- The nerve impulse causes a movement of ions across the cell membrane of the nerve cell.

Synapse

- **Synapse** - small gap or space between the axon of one neuron and the dendrite of another - **the neurons do not actually touch at the synapse**
- It is junction between neurons which uses neurotransmitters to start the impulse in the second neuron or an effector (muscle or gland)
- The synapse insures one-way transmission of impulses

Neurotransmitters

Neurotransmitters – Chemicals in the junction which allow impulses to be started in the second neuron

Chemicals called neurotransmitters cross a gap in the synapse and continue the nerve impulse.

Nerve System Study Guide

James Macfarlane Macbirnie

Nerve System Study Guide:

Study Guide for The Human Body in Health and Illness - E-Book Barbara Herlihy, 2013-12-06 Corresponding to the chapters in The Human Body in Health and Illness 4th Edition by Barbara Herlihy this study guide offers fun and practical exercises to help you review understand and remember basic A P Even if you find science intimidating this book can help you succeed Each chapter includes three parts Mastering the Basics with matching ordering labeling diagram reading and coloring exercises Putting It All Together including multiple choice quizzes and case studies Challenge Yourself with critical thinking questions and puzzles Textbook page references are included with the questions to make it easier to review difficult topics Objectives at the beginning of each chapter reinforce the goals of the textbook and set a framework for study UPDATED content matches the new and revised material in the 5th edition of the textbook UPDATED coloring exercises improve your retention of the material NEW exercises are included on the endocrine system hematocrit and blood coagulation the preload and afterload function of the heart identifying arteries and veins the lymphatic system and the components of the stomach **Study Guide for Clayton's Basic Pharmacology for Nurses - E-Book** Michelle J.
