Nested Security Conflict Management European:

Nested Security Erin K. Jenne, 2015-11-02 Why does soft power conflict management meet with variable success over the course of a single mediation In *Nested Security* Erin K Jenne asserts that international conflict management is almost never a straightforward case of success or failure Instead external mediators may reduce communal tensions at one point but utterly fail at another point even if the incentives for conflict remain unchanged Jenne explains this puzzle using a nested security model of conflict management which holds that protracted ethnic or ideological conflicts are rarely internal affairs but rather are embedded in wider regional and or great power disputes Internal conflict is nested within a regional environment which in turn is nested in a global environment Efforts to reduce conflict on the ground are therefore unlikely to succeed without first containing or resolving inter state or trans state conflict processes Nested security is neither irreversible nor static ethnic relations may easily go from nested security to nested insecurity when the regional or geopolitical structures that support them are destabilized through some exogenous pressure or shocks including kin state intervention transborder ethnic ties refugee flows or other factors related to regional conflict processes Jenne argues that regional security regimes are ideally suited to the management of internal conflicts because neighbors that have a strong incentive to work for stability provide critical hard power backing to soft power missions Jenne tests her theory against two regional security regimes in Central and Eastern Europe the interwar minorities regime under the League of Nations German minorities in Central Europe Hungarian minorities in the Carpathian Basin and disputes over the land Islands Memel and Danzig and the ad hoc security regime of the post Cold War period focusing on Russian speaking minorities in the Baltic States and Albanian minorities in Montenegro Macedonia and northern Kosovo

Nested Security Erin K. Jenne, 2015-11-02 In *Nested Security* Erin K Jenne asserts that international conflict management is almost never a straightforward case of success or failure Instead external mediators may reduce communal tensions at one point but utterly fail at another point even if the incentives for conflict remain unchanged

The Routledge Handbook of Ethnic Conflict Karl Cordell, Stefan Wolff, 2016-01-22 A definitive global survey of the interaction of ethnicity nationalism and politics this handbook blends rigorous theoretically grounded analysis with empirically rich illustrations to provide a state of the art overview of the contemporary debates on one of the most pervasive international security challenges today Fully updated for the second edition the book includes a new section which offers detailed analyses of contemporary cases of conflict such as in Ukraine Kosovo the African Great Lakes region and in the Kurdish areas across the Middle East thus providing accessible examples that bridge the gap between theory and practice The contributors offer a 360 degree perspective on ethnic conflict from the theoretical foundations of nationalism and ethnicity to the causes and consequences of ethnic conflict and to the various strategies adopted in response to it Without privileging any specific explanation of why ethnic conflict happens at a particular place and time or why attempts at preventing or settling it might fail or succeed The Routledge Handbook of Ethnic Conflict enables

readers to gain a better insight into such defining moments in post Cold War international history as the disintegration of the Soviet Union and Yugoslavia and their respective consequences the genocide in Rwanda and the relative success of conflict settlement efforts in Northern Ireland By contributing to understanding the varied and multiple causes of ethnic conflicts and to learning from the successes and failures of their prevention and settlement the Handbook makes a powerful case that ethnic conflicts are neither unavoidable nor unresolvable but rather that they require careful analysis and thoughtful and measured responses

Conflict Management and the Future of EU Foreign and Security Policy Riccardo Alcaro, Pol Bargués, 2025-01-23 This book analyses how the European Union EU has dealt with crises and conflicts including Russia s invasion of Ukraine Iran s nuclear dispute and Syria s civil war to understand the peculiar nature of its role in international security Rather than focusing on the institutional set up of the EU s foreign and security policy the authors look at the outer world concentrating on crises and conflicts impinging on Europe s security They argue that the EU and its member states policies are constrained by systemic factors such as acute geopolitical rivalries and the fragmentation of regional governance systems as well as by multi source internal contestation of policies across member states Hence building on pragmatist informed analysis they show that the EU s actorness in international security is first and foremost constituted by interactions with its domestic and systemic context and as such it should be understood as a relational power This volume will be of great use to scholars and students of International Relations European Studies Security Conflict and Peace Studies and Diplomacy Studies seeking to deepen their understanding of the subject

Effective Participation of National Minorities and Conflict Prevention William Romans, Iryna Ulasiuk, Anton Petrenko Thomsen, 2019-10-21 The effective management of differences between groups within democracies means moving beyond the examination of individual rights In the field of national minorities conflict prevention diplomacy promoting the effective participation of national minorities in public life is a primary objective Enhancing participation encourages a sense of belonging contributes to societal integration and promotes cohesion within the multi ethnic state The Lund Recommendations on the Effective Participation of National Minorities in Public Life directly address these challenges and the OSCE High Commissioner on National Minorities works with states and national minority groups to advance functional solutions that reduce tensions and foster stability This volume analyses the components of a balanced legal and policy framework related to effective participation of national minorities with a view to preventing conflict and reviews the related work of the OSCE and other international organisations

Remaking Central Europe Peter Becker, Natasha Wheatley, 2020-12-29 Over the last two decades the new international order of 1919 has grown into an expansive new area of research across multiple disciplines With the League of Nations at its heart the interwar settlement s innovations in international organizations international law and many other areas shaped the world we know today This book presents the first study of the relationship between this new international order and the new regional order in Central and Eastern Europe after the collapse of the Habsburg empire An analysis of the co implication of these two orders

is grounded in four key scholarly interventions understanding the legacies of empire in international organizations examining regionalism in the work of interwar international institutions creating an integrated history of the interwar order in Europe and testing recent claims of the conceptual connection between nationalism and internationalism With chapters covering international health international financial oversight human trafficking minority rights scientific networks technical expertise passports commercial treaties borders and citizenship and international policing this book pioneers a regional approach to international order and explores the origins of today's global governance in the wake of imperial collapse

Independence Movements and Their Aftermath Jon B. Alterman, Will Todman, 2018-11-23 This volume explores the varied outcomes that self-determination movements around the world have achieved and in particular seeks to understand what factors promote better outcomes and what factors promote worse ones Rather than focusing on the metric of achieving independence the project evaluates the quality of societies after independence including such elements as economic strength and political resilience and it analyzes what factors contribute to different outcomes The study finds that the single most determinative factor in the success of any independence movement is frequently beyond the control of such a movement often relating to the global and historical contexts in which the movement finds itself However a whole host of factors are within the control of such a movement but movements do not always seek to act on many of them Activists become so convinced in the justness of the independence cause that they do not focus on actions that would contribute to greater success after independence

Scott, 2025-01-09 This topical textbook outlines conflict crisis and war as central challenges in the international security arena exploring their history evolution nature dynamics and trends Patrick James and James M Scott discuss the major approaches to analysing conflict crisis and war and identify the key avenues for managing them

Plural International Relations in a Divided World Stephen Chan, 2017-02-27 The world is troubled and full of misunderstandings It seems a new world order of fundamentalist violence and meaningless atrocity is upon us whilst civilised instruments for cooperation and compromise are becoming increasingly ineffective In this timely book Stephen Chan explores the historical and philosophical roots of difference and discord in the international system He begins with the introduction of the Westphalian system showing how throughout the 20th century new states from the Middle East Asia and Africa entered that system with reservations preconditions and great efforts to introduce new forms of concerts and congresses but without seriously challenging the international status quo By contrast the 21st century has brought turmoil and change in the form of militant Islam be it the Taleban Al Qaeda or ISIS whose varied roots and fluid emergence have so far prevented the West from being able to understand and combat it Developing Kissinger's suspicion of Saudi Arabia as an Islamic state in Westphalian dress Chan argues that what is at stake today is not the development of a new Caliphate or an old radicalism but the effort to supplant and replace the Westphalian system itself This is the complex and challenging reality to which a truly modern and persuasively relevant plural international relations must now adapt

Whether it can do so remains to be seen Routledge Handbook of the Future of Warfare Artur Gruszczak, Sebastian Kaempf, 2023-09-19 This handbook provides a comprehensive problem driven and dynamic overview of the future of warfare The volatilities and uncertainties of the global security environment raise timely and important questions about the future of humanity's oldest occupation war This volume addresses these questions through a collection of cutting edge contributions by leading scholars in the field Its overall focus is prognostic rather than futuristic highlighting discernible trends key developments and themes without downplaying the lessons from the past By making the past meet the present in order to envision the future the handbook offers a diversified outlook on the future of warfare which will be indispensable for researchers students and military practitioners alike The volume is divided into six thematic sections Section I draws out general trends in the phenomenon of war and sketches the most significant developments from the past to the present and into the future Section II looks at the areas and domains which actively shape the future of warfare Section III engages with the main theories and conceptions of warfare capturing those attributes of contemporary conflicts which will most likely persist and determine the dynamics and directions of their transformations The fourth section addresses differentiation and complexity in the domain of warfare pointing to those factors which will exert a strong impact on the structure and properties of that domain Section V focuses on technology as the principal trigger of changes and alterations in the essence of warfare The final section draws on the general trends identified in Section I and sheds light on how those trends have manifested in specific local contexts This section zooms in on particular geographies which are seen and anticipated as hotbeds where future warfare will most likely assume its shape and reveal its true colours This book will be of great interest to students of strategic studies defence studies war and technology and International Relations **Regions, Power, and Conflict** William R. Thompson, Thomas J. Volgy, Paul Bezerra, Jacob Cramer, Kelly Marie Gordell, Manjeet Pardesi, Karen Rasler, J. Patrick Rhamey Jr., Kentaro Sakuwa, Rachel Van Nostrand, Leila Zakhirova, 2022-08-16 The three main levels of analysis in international relations have been the systemic the national and the individual A fourth level that falls between the systemic and the national is the region It is woefully underdeveloped in comparison to the attention afforded the other three Yet regions tend to be distinctive theaters for international politics Otherwise we would not recognize that Middle Eastern interstate politics somehow does not resemble Latin American interstate politics or interstate politics in Southern Africa although once the Middle East and Southern Africa may have seemed more similar in their mutual fixation with opposition to domestic policies in Israel and South Africa respectively This book divided into three parts first makes a case for studying regional politics even though it must also be appreciated that regional boundaries are also hazy and not always easy to pin down empirically The second part examines power distributions within regions as an important entry point to studying regional similarities and differences Two emphases are stressed One is that regional power assessments need to be conditioned by controlling for weak states which are more common in some regions than they are in others The other

emphasis is on regional power hierarchies Some regions have strong regional hierarchies while others do not Regions with strong hierarchies operate much differently from those without them in the sense that the former are more pacific than the latter The third part of the book focuses on regional differences in terms of conflict behavior order preferences rivalries and rivalry termination

Contemporary European Security David J. Galbreath, Jocelyn Mawdsley, Laura Chappell, 2019-03-20 Contemporary European Security explores the complex European security architecture and introduces students to the empirical theoretical and conceptual approaches to studying the subject Written by experts in each subfield it addresses key topics within the wider strategic context of international security Presenting traditional and critical debates to illuminate this ever changing field it addresses specifically European security since 2000 and the end of the Cold War The evolution of International Relations theories in understanding security in Europe The role of NATO in the post war period and its strategy impact and enlargement The institutionalisation of the CSCE and the political tensions within the OSCE The EU's Common Security and Defence Policy and recent policy initiatives in defence Feminist conceptions of European security European military innovation Security challenges in the post Soviet space and the growing instability in the Middle East and North Africa The emergence of human security Internal and societal security This essential textbook will be of key interests to students and scholars of European Security Security and Military studies Strategic Studies European Politics and International Relations

Routledge Handbook of Proxy Wars Assaf Moghadam, Vladimir Rauta, Michel Wyss, 2023-07-28 This Handbook is the first volume to comprehensively examine the challenges intricacies and dynamics of proxy wars in their various facets The volume aims to capture the significantly growing interest in the topic at a critical juncture when wars of many guises are becoming multifaceted proxy wars Most often proxy wars have wide ranging implications for international security and are therefore a critically important subject of inquiry The Handbook seeks to understand and explain proxy wars conceptually theoretically and empirically with a focus on the numerous policy challenges and dilemmas they pose To do so it presents a multi and interdisciplinary assessment of proxy wars focused on the causes dynamics and processes underpinning the phenomenon across time and space and a multitude of actors throughout human history The Handbook is divided into six thematic sections as follows Part I Approaches to the Study of Proxy Wars Part II Historical Perspectives on Proxy Wars Part III Actors in Proxy Wars Part IV Dynamics of Proxy Wars Part V Case Studies of Proxy Wars Part VI The Future of Proxy Wars By bringing together many leading scholars in a synthesis of expertise this Handbook provides a unique and rigorous account of research into proxy war which so far has been largely missing from the debate This book will be of much interest to students of strategic studies security studies foreign policy political violence and International Relations

The MENA Region and COVID-19 Zeina Hobaika, Lena-Maria Möller, Jan Claudius Völkel, 2022-05-30 Focusing on the Middle East and North Africa MENA region which comprises some of the world's richest countries next to some of the poorest this book offers excellent insights into the discriminatory consequences of the COVID 19 pandemic With a geographic focus on the MENA

region the multidisciplinary case studies collected in this edited volume reveal that the coronavirus's impact patterns are a question of two variables: governance performance and socioeconomic potency. Given the global unprecedented complex and systemic nature of COVID-19 and its long-term implications for societies, governments, international organisations, citizens, and corporations, this volume entails a relevance to regions undergoing similar dynamics. Analyses in the book therefore have implications for the comparative study of the pandemic and its impact on societies around the globe. Understanding related dynamics and implications and making use of lessons learned are a pathway to deal with future similar crises. Questions covered in the volume are relevant to geopolitics, social implications, and the relations between political leaders and citizens as beings embedded in various strategies of communication. The volume will appeal to scholars of international politics, political science, risk or crisis governance, economics, and sociology, human rights, and security, political communication, and public health. The Challenge of European Political Will
Rachel Ellehuus, Seth G. Jones, 2022-09-02

In this follow-on report to Europe's High End Military Challenges: The Future of European Capabilities and Missions, the CSIS Europe, Russia, and Eurasia Program and International Security Program examine the other side of the coin of European military effectiveness: the political will of European countries to conduct military missions and operations. The report identifies the endogenous and exogenous factors constraining or increasing political will and maps them onto six country case studies. Four prototypes of political will emerged from the analysis: global partners, international activists, constrained partners, and minimalists. The report then assesses the political will of European allies and partners to conduct fifteen types of military missions and operations worldwide, from peacekeeping to large-scale combat. It concludes with a summary of key findings. First, it finds that internal and external factors such as strategic culture and alliance dependence respectively will continue to constrain European political will in many cases, even after the Russian invasion of Ukraine. Second, European states are more likely to have the political will to engage in military missions at the lower end of the conflict spectrum, such as maritime patrol missions, and less likely at the higher ends of the spectrum, except in cases of significant collective or national defense.

Networked Regionalism as Conflict Management
Anna Ohanyan, 2015-04-15

Most regions of the world are plagued by conflicts that are made insoluble by a confluence of complex threads from history, geography, politics, and culture. These frozen conflicts defy conflict management interventions by both internal and external agents and institutions. Worse, they constantly threaten to extend beyond their local geographies, as in the terrorist bombings in Boston by ethnic Chechens, or to escalate from skirmishes to full-scale war, as in Nagorno-Karabakh. Consequently, such conflicts cry out for alternative approaches to the classic state-focused and sovereignty-based conflict management models that are practiced in traditional diplomacy, which most often produce rather short-term, ad hoc, fragmented interventions and outcomes. Drawing upon the cases of the South Caucasus, the Western Balkans, Central America,

South East Asia and Northern Ireland Networked Regionalism as Conflict Management offers a theoretical and practical solution to this impasse by arguing for regional collective interventions that involve a long term reengineering of existing conflict management infrastructure on the ground. Such approaches have been attracting the attention of scholars and practitioners alike yet thus far these concepts have rarely involved more than simple prescriptions for regional cooperation between grassroots actors and traditional diplomacy. Specifically says Anna Ohanyan only the cultivation and establishment of regional peace systems can provide an effective path toward conflict management in these standoffs in such intractably divided regions.

Sanctions Bruce W. Jentleson, 2022 It's hard to browse the news without seeing reports of yet another wielding of economic sanctions. Given how frequently nations use them you'd think sanctions were a sure fire weapon. Yet the record is quite mixed. In *Sanctions: What Everyone Needs to Know* R. eminent Bruce Jentleson one of America's leading scholars on the subject answers the fundamental questions about sanctions today. Why are they used so much? What are their varieties? What are the key factors affecting their success? And why have they become the tool of first resort for states engaged in international conflict.

European Yearbook of Minority Issues European Centre for Minority Issues Staff, 2004 The *European Yearbook of Minority Issues* provides a critical and timely review of contemporary developments in minority majority relations in Europe. It combines analysis, commentary and documentation in relation to conflict management, international legal developments and domestic legislation affecting minorities in Europe. Part I contains scholarly articles and in 2002-3 features two special focus sections: Belgium and New Minorities accompanied by a miscellaneous articles section. Part II reviews the implementation of minority legislation and international standards at the universal and regional levels as well as new developments in relation to them and contains a list of international norms. Apart from providing a unique annual overview of minority issues for both scholars and practitioners in this field the Yearbook will be an indispensable reference tool for libraries, research institutes as well as governments and international organisations.

European Integration and the Nationalities Question John McGarry, Michael Keating, 2006-09-27 A highly topical examination of the effect of European integration on relations between states and minority nations. This new collection brings together the leading specialists in the field and covers a wide range of cases from Northern Ireland in the West to Estonia and Latvia in the East and Cyprus in the South East. The contributors assess how European integration has affected the preparedness of states to accommodate minorities across a range of fundamental criteria including enhanced rights protection, autonomy, the provision of a voice for minorities in the European and international arena and the promotion of cross border cooperation among communities dissected by state frontiers. The comprehensive chapters stress the importance of the nationality question and the fact that contrary to the hopes and beliefs of many on the left and right it is not going to go away. Beginning with an introductory essay that summarizes the impact of European integration on the nationalities question this accessible book will be of strong interest to scholars and researchers of politics, nationalism, ethnic conflict and European studies.
