Routledge International Handbook of Visual Research Methods in Anthropology Rupert Cox,Chris Wright,2025-03-31 Routledge International Handbook of Visual Research Methods in Anthropology approaches the question

of method through conceptualisations of the visual world as light sight images and technologies of imaging that can be analysed and described through a range of visual practices in the course of anthropological research The aim of the book is to move beyond making a case for the importance of the visual via its notional arrangement as a subject and means of study in anthropology by showing how it is applied as a way of doing anthropological research through the explication of a series of examples Employing an innovative structure for a handbook each contribution is orientated around a single distinguishing concept and together the contributions addresses the following three issues How to see through images by treating the visual as a form of knowledge made visible A second group of entries is concerned with how to see through time by approaching the visual as a modality for representing duration and rendering legible what may no longer be available to vision Finally a third group of entries deals with the visual at a phenomenal level as a medium that we see in This handbook is a timely and useful resource for both students and researchers of anthropology at this time because the discipline s long standing theoretical and empirically rich practical engagements with visual methods provide valuable insights for the social sciences into current transmutations of the visual into the multimodal the non representational and the sensory The importance of these areas as well as of digital research more generally makes visual methods ever more important for social scientists hence this handbook is also valuable for those studying general research methods courses and in related fields such as sociology health studies and social work

Durlington,2024-04-26 Multimodal Methods in Anthropology develops several goals simultaneously First it is an introduction to the ways that multimodality might work for students and practitioners of anthropology using multiple examples from the authors research and from the field Second the book carefully examines the ethics of a multimodal project including the ways in which multimodality challenges and reproduces digital divides Finally the book is a theoretical introduction that repositions the history of anthropology along axes of multimodality and reframes many of the essential questions in anthropology alongside collaboration and access Each chapter introduces new methods and techniques frames the ethical considerations and contextualizes the method in the work of other anthropologists Multimodal Methods in Anthropology takes both students and practitioners through historical and contemporary sites of multimodality and introduces the methodological and theoretical challenges of multimodal anthropology in a digital world Like multimodality itself readers will come away with new ideas and new perspectives on established ideas together with the tools to make them part of their practice It is an ideal text for a variety of methods based courses in anthropology and qualitative research at both the undergraduate and the graduate level

Participatory Visual and Digital Research in Action Aline Gubrium,Krista Harper,Marty Otañez,2016-07 This collection of original articles a companion to the authors Participatory Visual and Digital Methods illustrates how a variety of innovative techniques are being used in various field projects across disciplines and geographic locations Media, Anthropology and Public Engagement Sarah Pink,Simone Abram,2015-10-01 Contemporary anthropology is done in a world

where social and digital media are playing an increasingly significant role where anthropological and arts practices are often intertwined in museum and public intervention contexts and where anthropologists are encouraged to engage with mass media. Because anthropologists are often expected and inspired to ensure their work engages with public issues, these opportunities to disseminate work in new ways and to new publics simultaneously create challenges as anthropologists move their practice into unfamiliar collaborative domains and expose their research to new forms of scrutiny. In this volume, contributors question whether a fresh public anthropology is emerging through these new practices.

Digital Environments Urte Undine Frömming, Steffen Köhn, Samantha Fox, Mike Terry, 2017-03-15. Digital technology permeates the physical world. Social media and virtual reality accessed via internet-capable devices (computers, smartphones, tablets, and wearables) affect nearly all aspects of social life. The contributions to this volume apply innovative forms of ethnographic research to the digital realm. They examine the emergence of new forms of digital life, such as political participation through comments on East Greenlandic news blogs, the personal use of video broadcasting applications, the rise of transnational migrant networks facilitated by social media, or the effects of Facebook, Twitter, and Instagram on global conflicts.

Researching Cybercrimes Anita Lavorgna, Thomas J. Holt, 2021-07-29. This edited book promotes and facilitates cybercrime research by providing a cutting-edge collection of perspectives on the critical usage of online data across platforms, as well as the implementation of both traditional and innovative analysis methods. The accessibility, variety, and wealth of data available online presents substantial opportunities for researchers from different disciplines to study cybercrimes and more generally human behavior in cyberspace. The unique and dynamic characteristics of cyberspace often demand cross-disciplinary and cross-national research endeavors, but disciplinary, cultural, and legal differences can hinder the ability of researchers to collaborate. This work also provides a review of the ethics associated with the use of online data sources across the globe. The authors are drawn from multiple disciplines and nations, providing unique insights into the value and challenges evident in online data use for cybercrime scholarship. It is a key text for researchers at the upper undergraduate level and above.

Queer Chinese Cultures and Mobilities John Wei, 2020-01-02.

In *Queer Chinese Cultures and Mobilities* John Wei brings light to the germination and movements of queer cultures and social practices in today's China and Sinophone Asia. While many scholars attribute China's emergent queer cultures to the neoliberal turn and the global political landscape, Wei refuses to take these assumptions for granted. He finds that the values and pitfalls of the development-induced mobilities and post-development syndromes have conjointly structured and sustained people's ongoing longings and sufferings under the dual pressure of compulsory familism and compulsory development. While young gay men are increasingly mobilized in their decision-making to pursue sociocultural and socioeconomic capital to afford a queer life, the ubiquitous and compulsory mobilities have significantly reshaped and redefined today's queer kinship structure, transnational cultural network, and social stratification in China and capitalist Asia. With *Queer Chinese Cultures and Mobilities*, Wei interrogates the meanings and functions of mobilities at the forefront of China's internal transformation and international expansion for its great dream of revival when gender and sexuality have become increasingly mobilized with geographical, cultural, and social class migrations and mobilizations beyond traditional and conventional frameworks, categories, and boundaries. This timely and compelling contribution to Chinese Sinophone studies and queer sexuality studies is a pleasure to read. John Wei explores a diverse, fascinating, and unevenly explored archive of queer materials deftly deploying scholarship in multiple fields to analyze the emergent formation of queer Sinophone cultures. David L. Eng, University of Pennsylvania. John Wei's meticulously researched and rigorously argued new book sets a new standard for queer Chinese studies. Bringing together a dazzling array of ethnographic materials, films, and digital media, Wei proposes the concept of stretched kinship to show us how questions of sexuality are always questions of mobilities as queer migrants become ineluctably entangled with China's compulsory familism and developmentalism. Petrus Liu, Boston University.

Crisis, Conflict and Celebration Katarzyna Kajdanek, Anna Bednarczyk, Rui Carvalho, 2025-02-03. This book illuminates how the profound challenges faced by contemporary societies over the past few decades encompassing climate change and other environmental risks, global health threats, warfare, and mass migration manifest themselves in European cities. The chapters bring cutting-edge ethnographic studies which address these complex issues through three key conceptual dimensions of urban life: crisis, conflict, and celebration. The concept of crisis is critically explored in its various economic, political, and cultural dimensions affecting urban residents in multiple social and spatial aspects of their lives. Crises often lead to conflicts, dynamic processes that give rise to interest groups and complex social landscapes of resistance. By examining conflicts in urban contexts, the book uncovers the power dynamics and vulnerabilities emerging during turbulent times. Crises and conflicts also present opportunities for urban transformation and regeneration, bringing underlying beliefs and norms into question, paving the way for new social dynamics within urban environments. These conflictual spaces can therefore become arenas for celebration of urbanity where communities express resilience, cultural identity, and collective solidarity. As well as providing new insights into the present and future of European cities and the pivotal role of urban areas.

as centers of social change contestation and community building the book provides an important methodological contribution through innovative qualitative research in a diverse range of European urban areas
