Neural Networks In A Softcomputing Framework By Du Ke Lin Swamy Mns 2006 Hardcover:

Neural Networks in a Softcomputing Framework Ke-Lin Du, M.N.S. Swamy, 2006-08-02 Conventional model based data processing methods are computationally expensive and require experts knowledge for the modelling of a system Neural networks are a model free adaptive parallel processing solution This textbook provides a powerful and universal paradigm for information processing it reviews the most popular neural network methods and their associated techniques Each chapter has a systematic survey of each neural network model Computational intelligence topics like fuzzy logic and genetic algorithms tools for neural network learning are introduced Array signal processing problems are used to show the applications of each model This is an ideal textbook for graduate students and researchers as well as introducing the basics the exhaustive list of references included will aid their future research It is also a valuable reference for scientists and practitioners working in pattern recognition signal processing speech and image processing data analysis and A I

Neural Networks and Statistical Learning Ke-Lin Du, M. N. S. Swamy, 2013-12-09 Providing a broad but in depth introduction to neural network and machine learning in a statistical framework this book provides a single comprehensive resource for study and further research All the major popular neural network models and statistical learning approaches are covered with examples and exercises in every chapter to develop a practical working understanding of the content Each of the twenty five chapters includes state of the art descriptions and important research results on the respective topics The broad coverage includes the multilayer perceptron the Hopfield network associative memory models clustering models and algorithms the radial basis function network recurrent neural networks principal component analysis nonnegative matrix factorization independent component analysis discriminant analysis support vector machines kernel methods reinforcement learning probabilistic and Bayesian networks data fusion and ensemble learning fuzzy sets and logic neurofuzzy models hardware implementations and some machine learning topics Applications to biometric bioinformatics and data mining are also included Focusing on the prominent accomplishments and their practical aspects academic and technical staff graduate students and researchers will find that this provides a solid foundation and encompassing reference for the fields of neural networks pattern recognition signal processing machine learning computational intelligence and data mining
