Neurocinema When Film Meets Neurology:

Neurocinema Eelco F. M. Wijdicks, 2014 Film directors recognize that neurologic disease impacts mind and motility and often use it in a plot or defining scene It should be informative and educational to deconstruct neurologic representation in film Neurocinema When Film Meets Neurology is a collection of film essays that summarize the portrayal of major neurologic syndromes and clinical signs in cinema Many films approach the reality of disease quite closely and as a result are deeply moving and memorable Equally important these films say as much about consequences as they say about the disorder Therefore the main themes include sudden confrontation with a major neurologic illness disability from chronic neurologic disease and failure to lead a normal life Neurocinema—The Sequel Eelco F. M. Wijdicks, 2022-04-21 The history of neurology as seen through the lens of the filmmaker is fascinating and extraordinary Neurocinema The Sequel is a review of the history of neurology as seen in film starting with the early days of cinema and concluding with contemporary films now available in theaters and on streaming sites The major themes of this book encompass how neurology has been represented in the history of cinema and how neurologic topics emerged and then disappeared with some staging a comeback in more recent films 180 films are assessed and rated and many of these are exemplary depictions of neurological disorders The author examines whether film from a neurologic perspective can provide insight and even debate Each of the films discussed in this book demands serious attention by those who see and manage neurologic patients and support their families Neurocinema The Sequel chronicles this archive of neurologic representation drawing readers in a rich collection of cinematic wonders of permanent cultural and historical value *Neurocinema* Eelco F. Neuroscience and Art Amy Ione, 2024-08-27 This book is focused on how understanding ourselves as humans is incomplete without considering both biological and cultural aspects Using the neurocultural perspective the book explores how everything in the world is filtered back and forth through the brain and culture The thrust of the book therefore is to explore the power of art in creating a bridge between cultural and neuroscientific lines of inquiry Looking at both clinical and non clinical populations the text examines historical foundations distinguishes congenital developmental conditions from those that are acquired and emphasizes how the brain constructs our sensory experiences Several distinctive features separate this research from other publications First the book opens with a review of how the historical literature is still etched into the ideas we employ to explain elements across the interdisciplinary fields of art aesthetics our sensory experience psychology cognition and well being Second the research adopts a humanistic rather than a philosophical or social science perspective in demonstrating the value of coupling anatomy and physiology with the natural and social environment In this artists from all genres are incorporated Among them are Iris Murdoch Ludwig van Beethoven Leonardo da Vinci Cristoforo de Predis Rembrandt Federico Fellini Chuck Close and David Hockney Case studies demonstrate how neuroscientific research meshes with art individual and cultural variables in ways that range from health and well being to physiological decline and biological traumas These include a case study that examines how Oliver Sacks combined biology and biography in his writings It also explores art projects in several genres inspired by his studies Another case study is on the role of film as a useful clinical tool Here the book also demonstrates that cinematic devices used by filmmakers intersect with perceptual and cognitive neuroscience A defining feature of the analysis is the integration of research on brain injuries with humanistic responses in film literature and the visual arts This section outlines the lack of consensus regarding the causes and treatment of shell shock in World War I before introducing how research and art now work with PTSD TBI Finally the book examines therapeutic cases of professional and non professional artists concluding with a discussion of synesthesia and the senses

Il corpo nello spettro Lorenzo Donghi,Deborah Toschi,2024-06-28T00:00:00+02:00 Nel contemporaneo il visuale si delinea sempre pi come un orizzonte in continua espansione anche grazie al costante proliferare di nuovi device e avanzate tecniche di imaging Comprendere come si articola il processo di costruzione culturale della visione sia in riferimento alle tecnologie impiegate sia in merito alla ricezione e all interpretazione delle immagini prodotto divenuto cos un obiettivo di ricerca cruciale nel campo delle teorie visuali Il presente studio si muove in questa direzione adottando

uno sguardo inedito e dedicando attenzione a quei processi di reificazione dell'immaginario medico scientifico che sostituiscono le tradizionali forme della visione ottica con nuove forme di visualizzazione postottica del corpo. La struttura del volume consta di un'introduzione generale e di quattro capitoli dedicati ad altrettante configurazioni di medical imaging somatico ottenibili in bande di spettro elettromagnetico e acustico estranee alla luce visibile.

Cefalea: dal dolore alla sofferenza dell'anima Vittorio Di Piero, Edmond Robert Gilliéron, 2022-01-17. Il grande impatto che la cefalea ha sulla vita familiare, lavorativa e sociale e gli alti costi diretti e indiretti che comporta dimostrano la difficoltà dei pazienti a trovare valide risposte alla loro sofferenza. Uno dei motivi che la cefalea come l'idra il serpente a pi teste della mitologia greca che mostra una testa diversa ogni volta che ci avviciniamo. Questo libro dedicato ai nostri pazienti e nasce dalla collaborazione tra il Centro per la Diagnosi e la Terapia delle Cefalee del Dipartimento di Neuroscienze Umane della Sapienza e l'Istituto Europeo di Ricerca in Psicoterapia Psicoanalitica. In modo accessibile a tutti prova a dare una visione del pianeta cefalea da diversi punti di vista: dalle basi biologiche del dolore alle varie forme di cefalea ad aspetti curiosi come la descrizione della cefalea dai tempi dell'antica Mesopotamia o la sua rappresentazione nei mass media fino alle sue implicazioni psicodinamiche. Affrontare il mal di testa significa spesso fronteggiare una sorta di dolore dell'anima, qualcosa di più complesso di un semplice sintomo somatico che riflette uno stile di vita, un modo di trattare se stesso e gli altri, qualcosa che deriva non solo dalla predisposizione genetica ma anche dall'esperienza vissuta dal paziente sia dal punto di vista fisico che psicologico.

Neurociencia y cine Alberto, Vélez van Meerbeke, 2019-06-30. Esta obra es un aporte a la enseñanza de la neurociencia. Como bien dice uno de los autores, sería recomendable crear en las diferentes universidades cineforos en los que de una manera amena pero crítica se pueda complementar lo que se aprende en las asignaturas formales. Nuestra misión pedagógica parte justamente de uno de los legados recientes de la neurociencia a la educación: cuando se aprende con placer se aprende mejor. Y qué mejor que el séptimo arte para introducir debate y generar pensamiento crítico respecto a temas tan complejos como aquellos que se expresan a través de los problemas neurológicos y mentales. Los autores hacen un análisis crítico de algunas películas sobre la base de las patologías que están mostrando. No se trata de una enciclopedia de todas las películas que en mayor o menor grado tratan aspectos relacionados con las neurociencias sino una muestra de la interpretación que cada autor de capítulo hace respecto a la forma como la enfermedad o el tema es mostrado en la película. Extracto del Prólogo.

Neurocinema-the Sequel Eelco F. M. Wijdicks, 2022. The history of neurology as seen through the lens of the filmmaker is fascinating and extraordinary. Neurocinema: The Sequel is a review of the history of neurology as seen in film, starting with the early days of cinema and concluding with contemporary films now available in theaters and on streaming sites. The major themes of this book encompass how neurology has been represented in the history of cinema and how neurologic topics emerged and then disappeared with some staging a comeback in more recent films. 180 films are assessed and rated, and many of these are

exemplary depictions of neurological disorders The author examines whether film from a neurologic perspective can provide insight and even debate Each of the films discussed in this book demands serious attention by those who see and manage neurologic patients and support their families Neurocinema The Sequel chronicles this archive of neurologic representation drawing readers in a rich collection of cinematic wonders of permanent cultural and historical value
