well as neurodegeneration related to hereditary conditions like Huntington's disease and infectious diseases such as SARS-CoV-2. The chapters review the epidemiology and etiology of each neurodegenerative disease with a medical overview covering the pathophysiology, clinical features, and prognosis of each condition. The emphasis throughout is on communication disorders associated with each neurodegenerative disease; the discussion includes research findings in the literature with data from patients used to illustrate speech, hearing, voice fluency, and language impairments. The book also explores the clinical management of communication disorders by speech language pathologists.
