Working with AI c't-Redaktion, 2024-01-24 The special issue of c't KI Praxis provides tests and practical instructions for working with chatbots. It explains why language models make mistakes and how they can be minimised. This not only helps when you send questions and orders to one of the chatbots offered online. If you do not want to or are not allowed to use the cloud services for data protection reasons, for example, you can also set up your own voice AI. The c't editorial team explains where to find a suitable voice model, how to host it locally, and which service providers can host it. The fact that generative AI is becoming increasingly productive harbours both opportunities and risks. Suitable rules for the use of AI in schools, training, and at work help to exploit opportunities and minimise risks.

News Literacy Across the Undergraduate Curriculum Amy M. Damico, Melissa M. Yang, 2024-08-08 Librarians and faculty members offer perspectives, workshop initiatives, and classroom strategies to assist readers in increasing news literacy on their campus. We are living in a time when the evolving media ecosystem requires individuals to pay critical attention to content, developing ways to make sense of information, data, news reports, and research. Undergraduate college student learners in all disciplines must possess skills to critically identify, assess, and challenge the ideas to which they're being exposed. Both librarians and faculty know this, but they may not know how to develop and implement information literacy material. In this valuable collection, reference librarians, instructional librarians, and undergraduate faculty across disciplines share best practices for establishing relationships with each other and for increasing students' news and information literacy skills. Contributions include perspectives on pedagogy, reflections on successes and challenges, and reports of research on student learning. This book teaches librarians and faculty how to

implement news and information literacy content across the curriculum to empower students to be smarter more critical and more engaged news consumers
