Abstract

Academic staff hold multiple identities by relating to the organization and to their profession. Merging higher education institutions involves organizational changes which may impact identities of academic staff. This paper studies potential impacts on staff perceptions of their organizational and academic identities through a 2-year in-depth study of a merger between a large university and three university colleges in Norway. We find that academics have multiple nested identities and engage in identification at different levels. While they may identify with the new organization, they may simultaneously experience tensions and pressures on their academic identity, or they may have strong academic identity and low identification with the new organization. Moreover, space to develop local accommodations in the new organization and access to symbolic resources plays significant roles in the identification processes.

Handbook of Musical Identities Raymond MacDonald, David J. Hargreaves, Dorothy Miell, 2017-03-09 Music is a tremendously powerful channel through which people develop their personal and social identities Music is used to communicate emotions thoughts political statements social relationships and physical expressions But just as language can mediate the construction and negotiation of developing identities so music can also be a means of communication through which aspects of people's identities are constructed Music can have a profound influence on our developing sense of identity our values and our beliefs be it from rock music classical music or jazz Musical identities MacDonald Hargreaves and Miell 2002 was unique in being in being one of the first books to explore this fascinating topic This new book documents the remarkable expansion and growth in the study of musical identities since the publication of the earlier work The editors identify three main features of current psychological approaches to musical identities which concern their definition development and the identification of individual differences as well as four main real life contexts in which musical identities have been investigated namely in music and musical institutions specific geographical communities education and in health and well being This conceptual framework provides the rationale for the structure of the Handbook The book is divided into seven main sections The first Sociological discursive and narrative approaches includes several general theoretical accounts of musical identities from this perspective as well as some more specific investigations The second and third main sections deal in depth with two of the three psychological topics described above namely the development of and individual differences in musical identities The fourth fifth and sixth main sections pursue three of the real life contexts identified above namely Musical institutions and practitioners Education and Health and well being The seventh and final main section of the Handbook Case studies includes chapters which look at particular musical identities in specific times places or contexts The multidisciplinary range and breadth of the Handbook's contents reflect the rapid changes that are taking place in music in digital technology and in their role in society as a whole such that the study of musical identity is likely to proliferate even further in the future

European Identity Kenneth Keulman, Agnes Katalin Koós, 2014-08-20 The further evolution of the European Union is mainly dependent on how its citizens relate to their fellow Europeans speaking a score of languages and belonging to a variety of cultures This book addresses the question of whether a new sense of collective self identification labeled European identity a special form of socio territorial identities is emerging Collective identities are works in progress they entail a salient strategic activist and future oriented dimension Divergent strategic goals of the constituent groups induce a perpetual contestation and negotiation of the group identity a process that in the case of the EU is intensified by the continuously changing boundaries and institutional structure of the super polity To confront these challenges this book has a double focus The first part weighs in on the feasibility of a European identity in

light of what the two main paradigms in the field primordialism and constructivism can predict The second part maps the social forces that are either favorable or inimical to the creation of a common social identity on the continent Both parts develop hypotheses about the processes we witness and test them with the available empirical data Part II distinguishes between passive and active supporters of the integration project besides the Euroskeptic segment of the public Provision of public goods by regional integration is believed to explain passive permissiveness while the main impetus for integration comes from those who may reap above average benefits from it This book contends that the groups of active supporters have historically been changing within the Union namely the political Left and Right are changing their roles in negotiating future developments Yet the evolution of the EU is also shaped by the solutions adopted to accommodate ethnic and cultural diversity The empirical tests involve opinion survey data taken from the Eurobarometer series World Value and European Social Surveys and the International Social Survey Programme expert ratings as well as party elite documents from the Manifesto Project Database

Integration and Disintegration Nick Cohen,Ayana Dootalieva,2022-06-09 European integration is an ambitious goal that attempts to reconcile grandiose visions for the future of Europe with complicated national attitudes toward unity The added complexity of political crises which have characterized the European project from its outset makes the success of the European Union far from guaranteed Today European unity is once again at an existential crossroad with internal and external challenges threatening its integration This volume uniquely brings together the novel perspectives of Europe s emergent generation of thinkers to analyze through interdisciplinary lenses these various disintegrative pressures Students and scholars of Europe as well as those interested in the future of European cohesion will enjoy this volume both for the interdisciplinary analysis it brings forth and for the window it provides into the thinking of Europe s next generation of leaders **Burial and Social Change in First Millennium BC Italy** Elisa Perego,Rafael Scopacasa,2016-11-30 In the first millennium BC communities in Italy underwent crucial transformations which scholars have often subsumed under the heading of state formation namely increased social stratification the centralization of political power and in some cases urbanization Most research has tended to approach the phenomenon of state formation and social change in relation to specific territorial dynamics of growth and expansion changing modes of exploitation of food and other resources over time and the adoption of selected socio ritual practices by the ruling lites in order to construct and negotiate authority In contrast comparatively little attention has been paid to the question of how these key developments resonated across the broader social transect and how social groups other than ruling lites both promoted these changes and experienced their effects The chief aim of this collection of 14 papers is to harness innovative approaches to the exceptionally rich mortuary evidence of first millennium BC Italy in order to investigate the roles and identities of social actors who either struggled for power and social recognition or were manipulated and exploited by superior authorities in a phase of tumultuous sociopolitical change throughout the entire Mediterranean basin Contributors provide a diverse range of approaches in order to examine how power operated in society how it was exercised and resisted and how this can be studied through mortuary evidence Section

1 addresses the construction of identity by focusing mainly on the manipulation of age ethnic and gender categories in society in regions and sites that reached notable power and splendor in first millennium BC Italy These include Etruria Latium Campania and the rich settlement of Verucchio in Emilia Romagna Each paper in Section 2 offers a counterpoint to a contribution in Section 1 with an overall emphasis on scholarly multivocality and the multiplicity of the theoretical approaches that can be used to read the archaeological evidence
