Longo,Tyler J. Longo,2025-10-06 What if you could learn financial literacy from Warren Buffett himself Finance is a language like any other the more fluently you speak it the further and more comfortably you travel And if you want to improve your financial literacy what better teacher could you have than Warren Buffett Often described as the greatest investor of all time Warren Buffett started his investment firm with 100 in the late 1950s and went on to become the billionaire and sage we know today Along the way he s reaped huge profits for fellow investors in Berkshire Hathaway and remains one of the most sought after and closely watched figures in the business world So how did he do it In Buffett s Tips award winning professor and professional investor John M Longo demonstrates just how by translating decades of Buffett s writings and media appearances into a 100 straightforward tips and strategies anyone can follow for enhanced financial literacy and independence including Essential concepts like the time value of money and compound interest Basic financial instruments such as savings and checking accounts and certificates of deposit Approaches to valuing stock including discounted cash flow and relative valuation How to build a portfolio in accordance with Buffett s two golden rules Whether you want to grow your personal finances develop your business acumen or improve softer career skills such as emotional intelligence there s no one better to learn from than the most famous investor in the world and no better way to do that than having a copy of Buffett s Tips close at hand **Scholarship Unbound** Kerry Ann O'Meara,2015-12-22 Examining a number of academic institutions this book highlights how they have broadened their promotion policies in order to weigh faculty professional service equally with scholarship **Winning Grants** Sean Ekins,2023-06-12 As an academic or a small business owner you will need to write grants at some point in your career Writing them though is not enough what you also need to know is how to win grants Much has been written about writing grants the mysterious special ability called grantsmanship so it occurred to me that there is a need to come at this differently and spill the beans The difficulty in getting a grant in particular an NIH grant like an R01 in the USA is often described it is competitive and gets tougher every year Your proposal therefore must stand out it must connect with the reviewers This is true for all types of grants give the reviewer what they want always But also you need to connect to the program officer the committee that ultimately makes funding decisions and you must take care of a myriad of other details outside of the main event which is describing the science This means you cannot rely on just out writing the competition it is more than that as you have to out think out strategize and out schmooze them If you have been continually funded for decades that is terrific but if you want to keep being funded there is no guarantee what got you there will keep you there What was a hot technology 4 5 years ago is not the new thing anymore you will need to do something different but what You therefore need to not only

think about writing great grants you need to put it into practice and win them Having written and won grants from the NIH and DOD over the past 17 years and longer by the time you read this I possess a valuable perspective Each grant and study section will be different Whether a big or small grant it does not seem to make a difference the reviewers will critique your efforts they may not like it they may reject your ideas or they may love it You have some small degree of control until the proposal leaves your hands or more correctly you click submit You will need to differentiate your grant from the hundreds of others in many ways but you cannot change who you are your history so how you describe yourself and team will also have an impact You could spend hundreds of hours on your proposal or just a day and the outcome might still be the same This small book is a summary of my own personal experiences and will provide some advice that will help you learn how to do a better job of winning grants This book is written by a scientist who writes the grants and develops commercial products Provides a unique perspective on what you need to write better grants Teaches you how to continually win grants This book provides examples from the authors own grant applications The reader will be inspired to start a company to win small business grants
